How to Draw Hammer — Free Practice Sheets

ANSWER / CASE 1

hammer: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

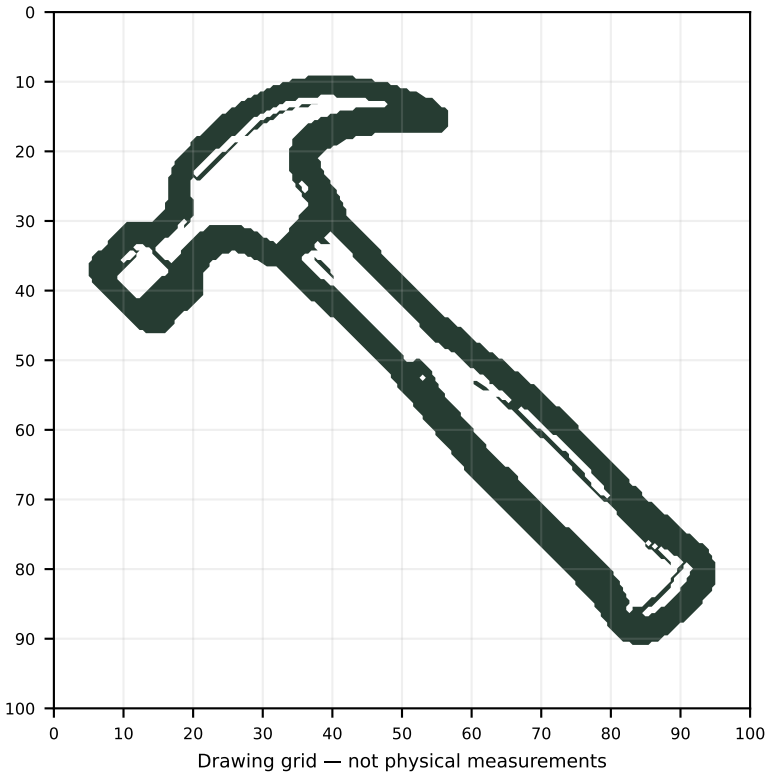

ANSWER: Example solution: preserve rectangular striking head on the left, curved claw extending to the right, long tapered handle angled downward. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the rectangular head block at the upper left.
2. Add the curved claw arching from the top of the head to the right.
3. Extend a long tapered handle downward and to the right from the head.
4. Outline the handle with a slightly wider base and connect it cleanly to the head.

How to Draw Hammer — Free Practice Sheets

ANSWER / CASE 2

hammer: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

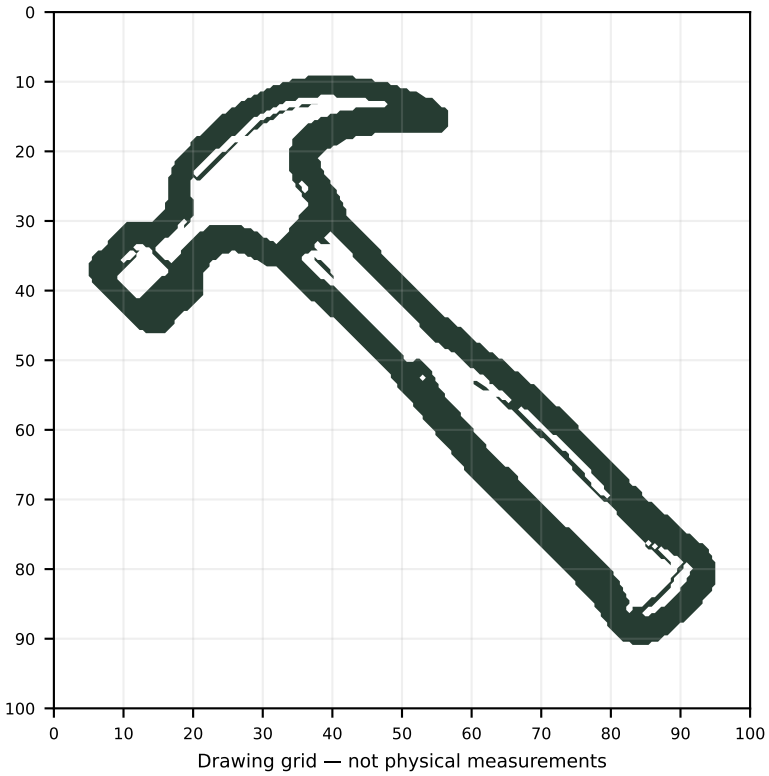

ANSWER: Example solution: preserve rectangular striking head on the left, curved claw extending to the right, long tapered handle angled downward. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the rectangular head block at the upper left.
2. Add the curved claw arching from the top of the head to the right.
3. Extend a long tapered handle downward and to the right from the head.
4. Outline the handle with a slightly wider base and connect it cleanly to the head.

How to Draw Hammer — Free Practice Sheets

ANSWER / CASE 3

hammer: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

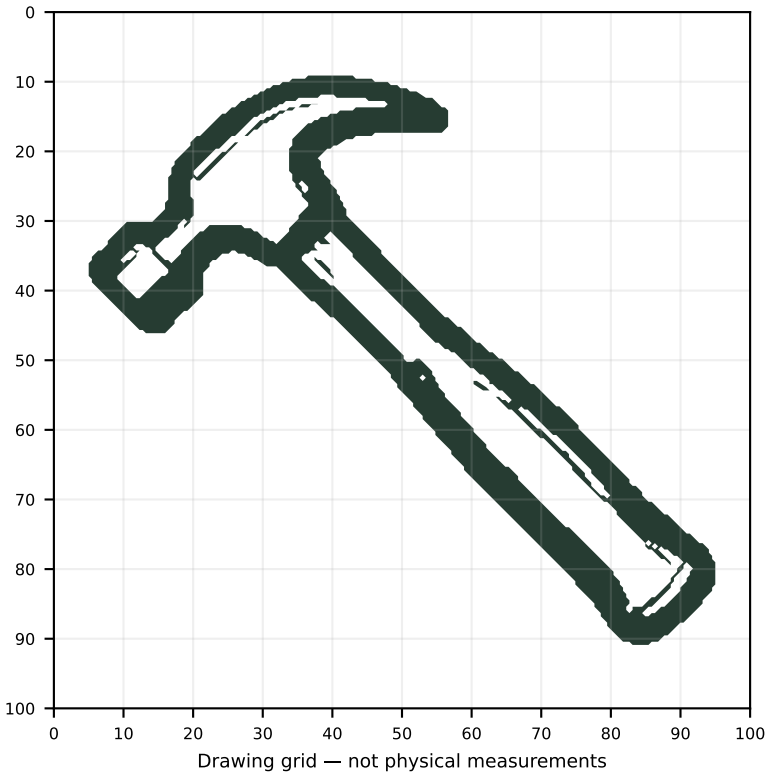

ANSWER: Example solution: preserve rectangular striking head on the left, curved claw extending to the right, long tapered handle angled downward. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the rectangular head block at the upper left.
2. Add the curved claw arching from the top of the head to the right.
3. Extend a long tapered handle downward and to the right from the head.
4. Outline the handle with a slightly wider base and connect it cleanly to the head.

How to Draw Hammer — Free Practice Sheets

ANSWER / CASE 4

hammer: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve rectangular striking head on the left, curved claw extending to the right, long tapered handle angled downward. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the rectangular head block at the upper left.
2. Add the curved claw arching from the top of the head to the right.
3. Extend a long tapered handle downward and to the right from the head.
4. Outline the handle with a slightly wider base and connect it cleanly to the head.
