How to Draw Gear — Free Practice Sheets

ANSWER / CASE 1

gear: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

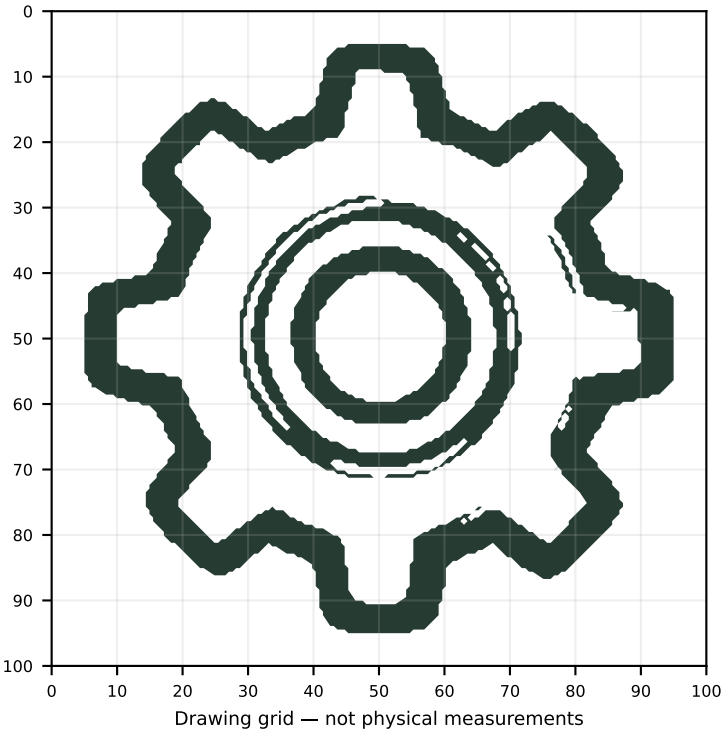

ANSWER: Example solution: preserve toothed outer edge with multiple rectangular teeth, circular body with concentric inner rings, central hole. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a large circle for the gear body.
2. Add evenly spaced rectangular teeth around the outer edge of the circle.
3. Draw two concentric circles in the center to form the hub.
4. Draw a smaller central circle for the hole.

How to Draw Gear — Free Practice Sheets

ANSWER / CASE 2

gear: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

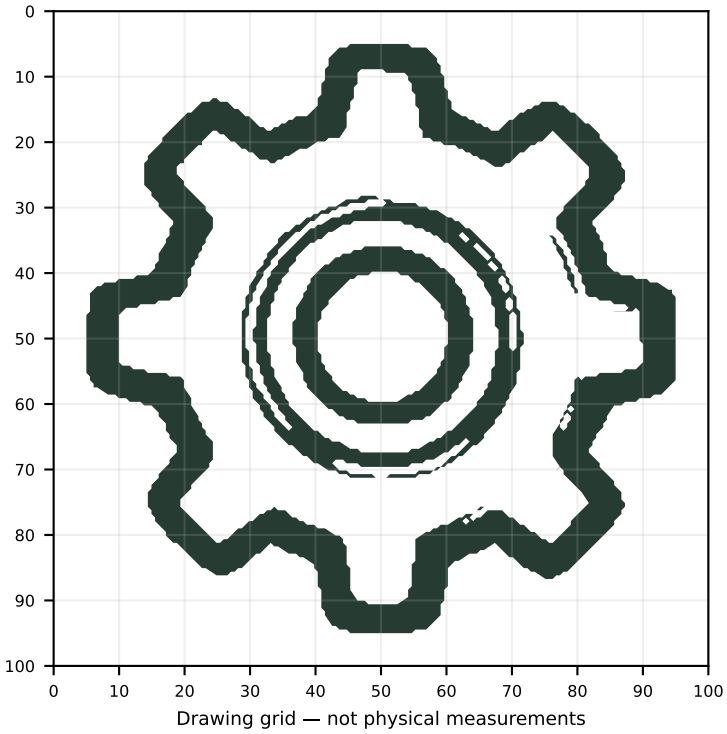

ANSWER: Example solution: preserve toothed outer edge with multiple rectangular teeth, circular body with concentric inner rings, central hole. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a large circle for the gear body.
2. Add evenly spaced rectangular teeth around the outer edge of the circle.
3. Draw two concentric circles in the center to form the hub.
4. Draw a smaller central circle for the hole.

How to Draw Gear — Free Practice Sheets

ANSWER / CASE 3

gear: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

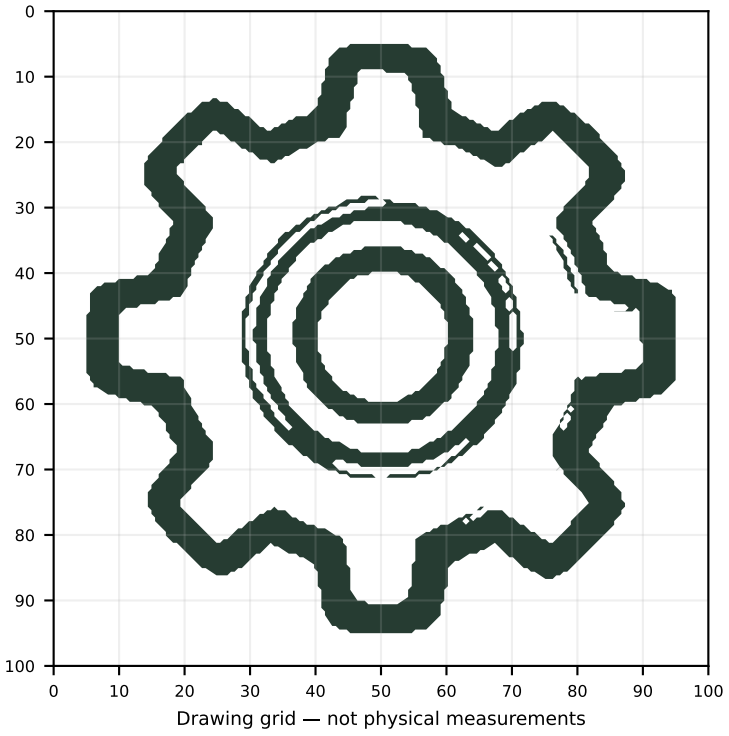

ANSWER: Example solution: preserve toothed outer edge with multiple rectangular teeth, circular body with concentric inner rings, central hole. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a large circle for the gear body.
2. Add evenly spaced rectangular teeth around the outer edge of the circle.
3. Draw two concentric circles in the center to form the hub.
4. Draw a smaller central circle for the hole.

How to Draw Gear — Free Practice Sheets

ANSWER / CASE 4

gear: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve toothed outer edge with multiple rectangular teeth, circular body with concentric inner rings, central hole. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a large circle for the gear body.
2. Add evenly spaced rectangular teeth around the outer edge of the circle.
3. Draw two concentric circles in the center to form the hub.
4. Draw a smaller central circle for the hole.
