# How to Draw Glass — Free Practice Sheets

### ANSWER / CASE 1

glass: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

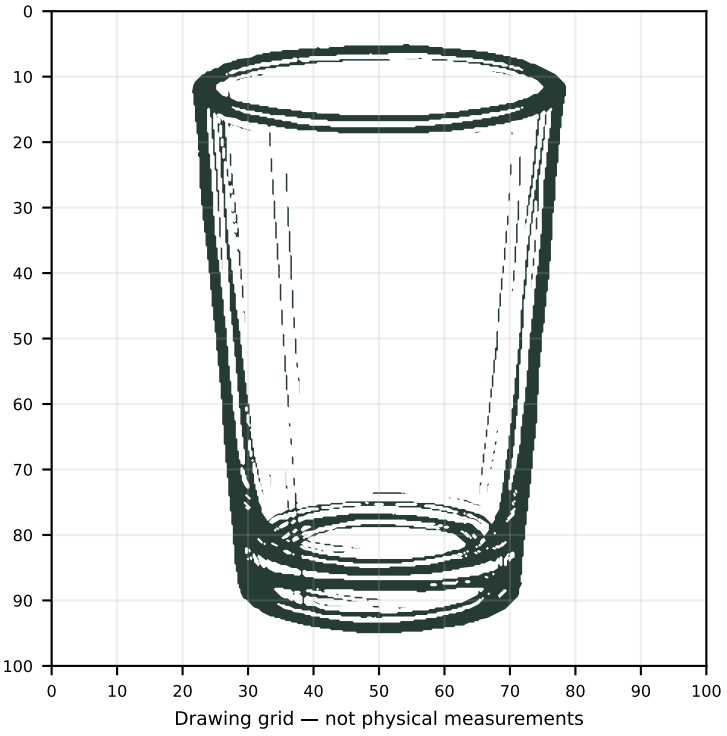

ANSWER: Example solution: preserve cylindrical sides tapering slightly toward the base, open elliptical rim at the top, flat base with a thick bottom edge. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a vertical ellipse for the open rim.
2. Draw two slightly converging vertical lines down from the rim to form the sides.
3. Draw a curved line connecting the bottom of the sides to form the base.
4. Add a second curved line near the bottom to indicate the thick glass base.

### ANSWER / CASE 2

glass: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

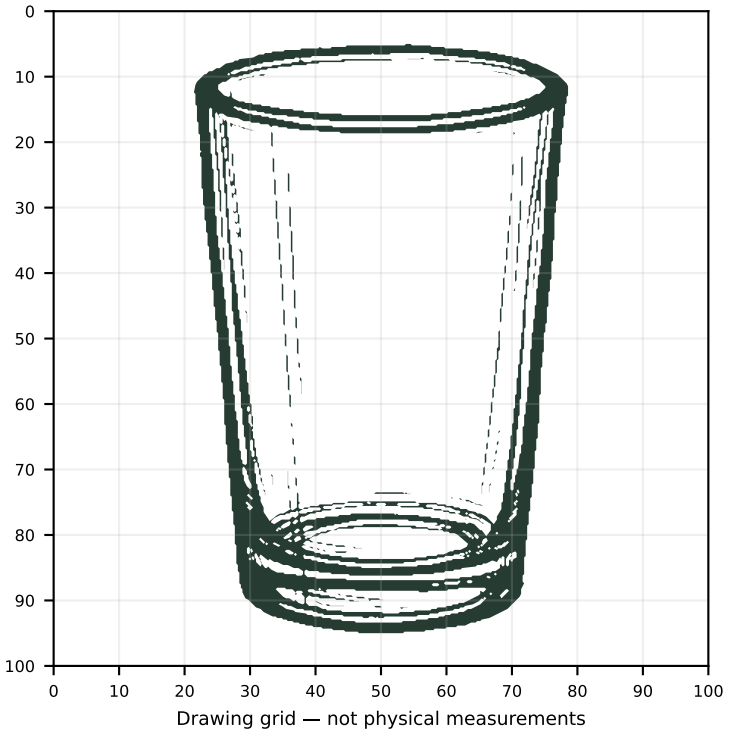

ANSWER: Example solution: preserve cylindrical sides tapering slightly toward the base, open elliptical rim at the top, flat base with a thick bottom edge. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a vertical ellipse for the open rim.
2. Draw two slightly converging vertical lines down from the rim to form the sides.
3. Draw a curved line connecting the bottom of the sides to form the base.
4. Add a second curved line near the bottom to indicate the thick glass base.

### ANSWER / CASE 3

glass: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

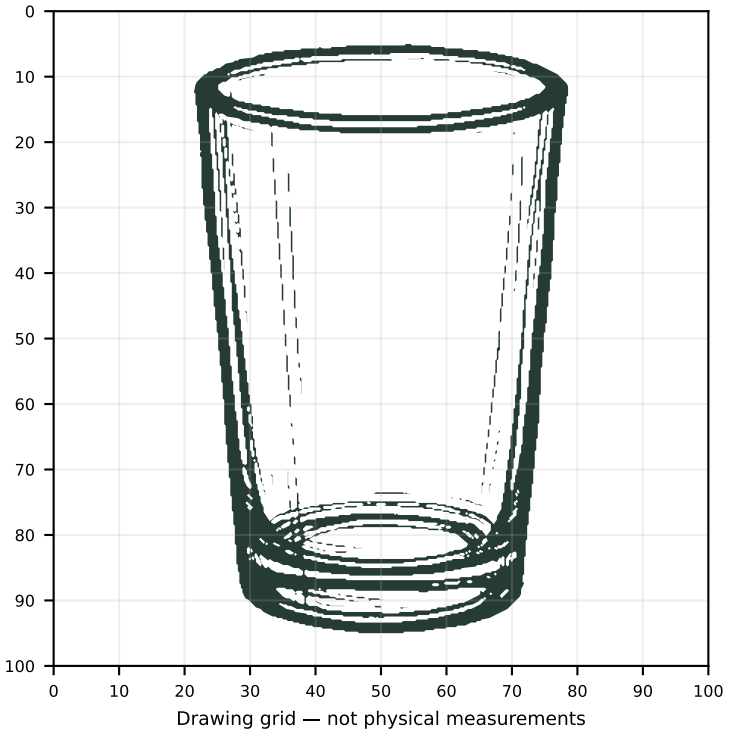

ANSWER: Example solution: preserve cylindrical sides tapering slightly toward the base, open elliptical rim at the top, flat base with a thick bottom edge. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a vertical ellipse for the open rim.
2. Draw two slightly converging vertical lines down from the rim to form the sides.
3. Draw a curved line connecting the bottom of the sides to form the base.
4. Add a second curved line near the bottom to indicate the thick glass base.

# How to Draw Glass — Free Practice Sheets

### ANSWER / CASE 4

glass: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve cylindrical sides tapering slightly toward the base, open elliptical rim at the top, flat base with a thick bottom edge. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a vertical ellipse for the open rim.
2. Draw two slightly converging vertical lines down from the rim to form the sides.
3. Draw a curved line connecting the bottom of the sides to form the base.
4. Add a second curved line near the bottom to indicate the thick glass base.
