How to Draw Engine — Free Practice Sheets

REFERENCE / CASE 1

engine: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

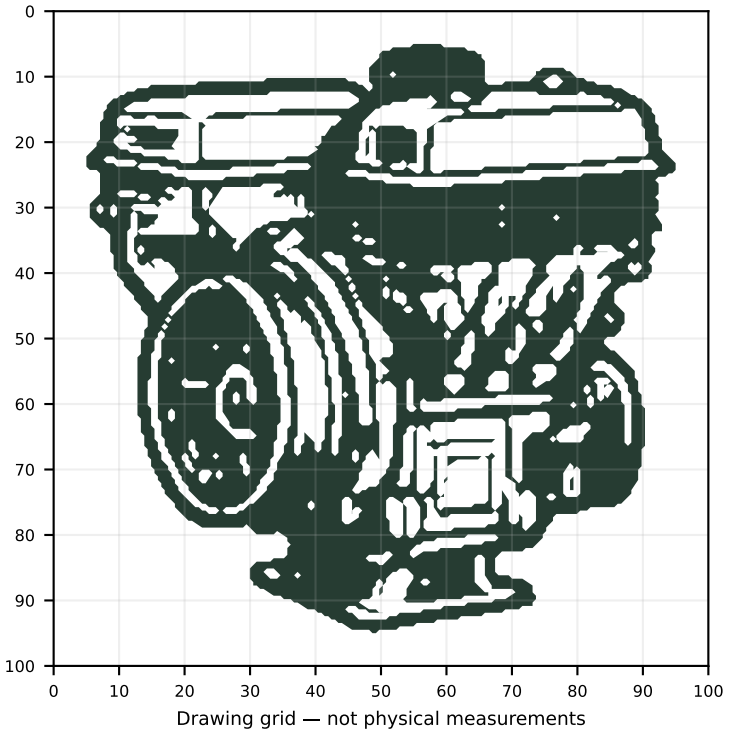

METHOD: Draw the overall blocky silhouette: a tall finned cylinder section on the right and a rounded housing on the left. Add the large circular pulley/fan on the left with concentric rings and radial spoke lines. Draw the top tank/cover with cap and the horizontal cooling fins across the right-hand block. Add the lower base, small side details, and connecting pipes/belts between the pulley and block.
Use the separate practice sheet before checking the answer.

How to Draw Engine — Free Practice Sheets

REFERENCE / CASE 2

engine: Copy the reference onto the blank grid, using matching grid intersections.
Compare with the separate full reference sheet.

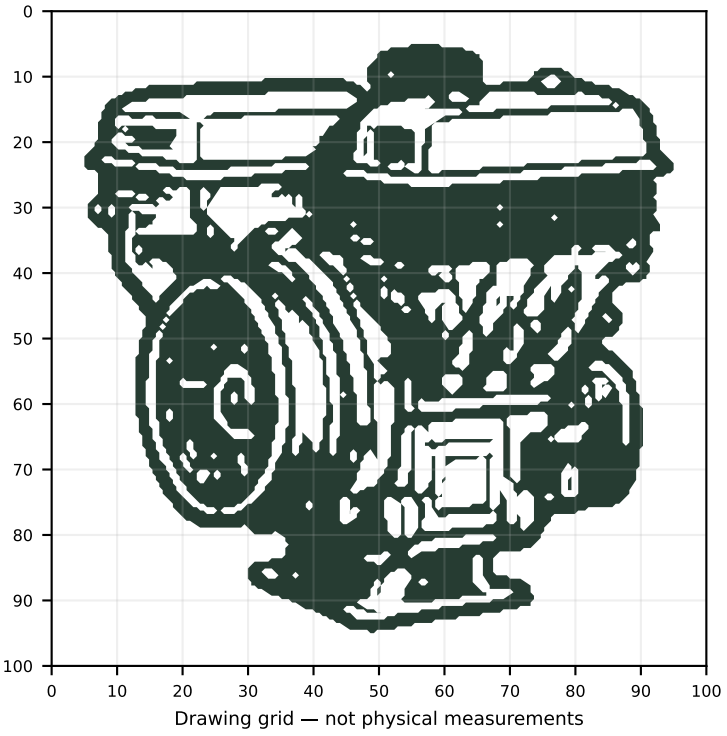

METHOD: Draw the overall blocky silhouette: a tall finned cylinder section on the right and a rounded housing on the left. Add the large circular pulley/fan on the left with concentric rings and radial spoke lines. Draw the top tank/cover with cap and the horizontal cooling fins across the right-hand block. Add the lower base, small side details, and connecting pipes/belts between the pulley and block.
Use the separate practice sheet before checking the answer.

How to Draw Engine — Free Practice Sheets

REFERENCE / CASE 3

engine: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

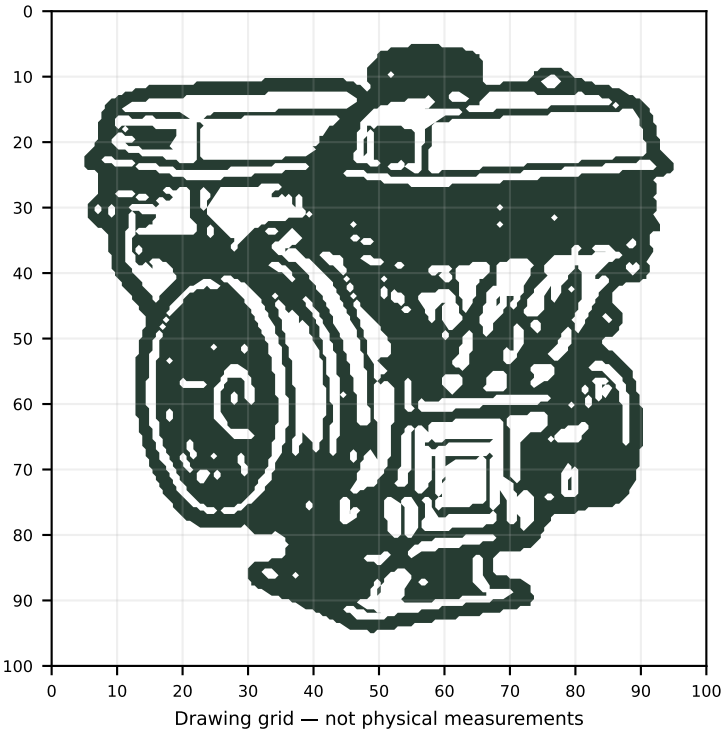

METHOD: Draw the overall blocky silhouette: a tall finned cylinder section on the right and a rounded housing on the left. Add the large circular pulley/fan on the left with concentric rings and radial spoke lines. Draw the top tank/cover with cap and the horizontal cooling fins across the right-hand block. Add the lower base, small side details, and connecting pipes/belts between the pulley and block.
Use the separate practice sheet before checking the answer.

How to Draw Engine — Free Practice Sheets

REFERENCE / CASE 4

engine: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

METHOD: Draw the overall blocky silhouette: a tall finned cylinder section on the right and a rounded housing on the left. Add the large circular pulley/fan on the left with concentric rings and radial spoke lines. Draw the top tank/cover with cap and the horizontal cooling fins across the right-hand block. Add the lower base, small side details, and connecting pipes/belts between the pulley and block.
Use the separate practice sheet before checking the answer.
