How to Draw Comb — Free Practice Sheets

ANSWER / CASE 1

comb: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

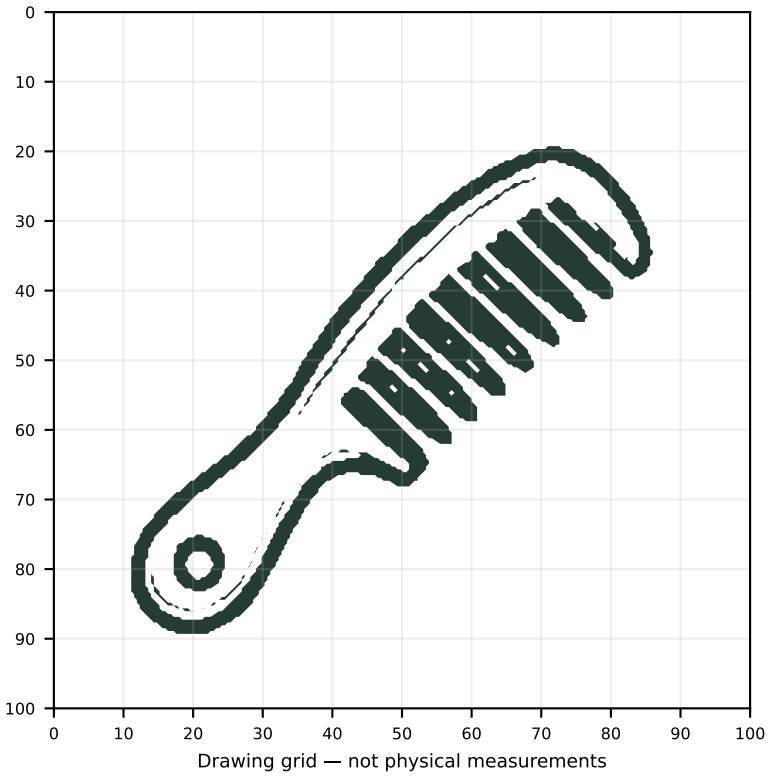

ANSWER: Example solution: preserve row of evenly spaced teeth along the upper edge, long narrow spine connecting the teeth to the handle, rounded handle with a circular hole at the end. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.

1. Draw the long narrow spine as a gently curved elongated shape from the handle end to the tip.
2. Add the rounded handle at the lower end, including a small circular hole near its center.
3. Along the upper edge of the spine, draw a row of evenly spaced teeth projecting outward.
4. Connect the teeth to the spine with clean lines and close the outline, keeping the handle and spine continuous.

How to Draw Comb — Free Practice Sheets

ANSWER / CASE 2

comb: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

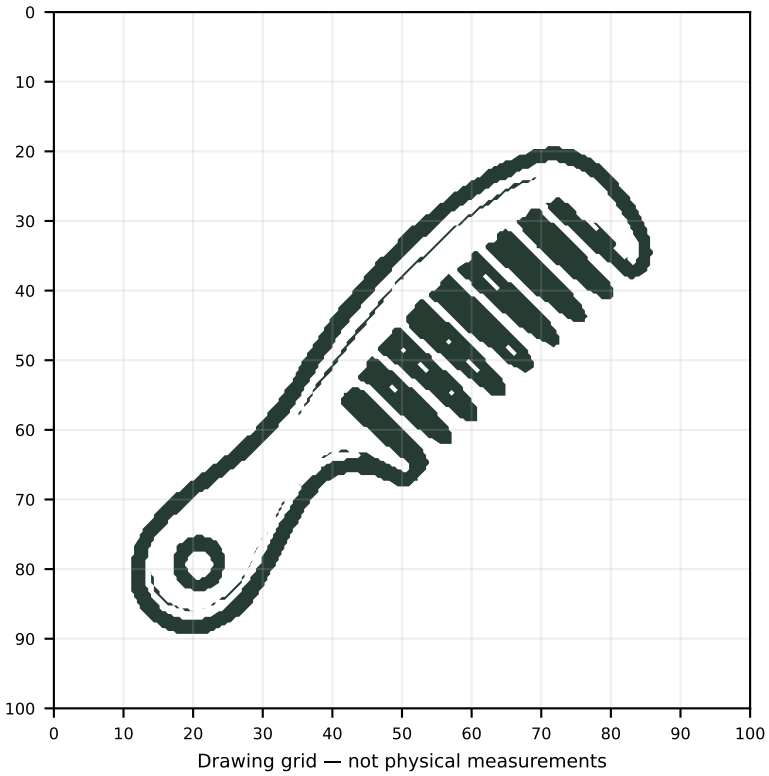

ANSWER: Example solution: preserve row of evenly spaced teeth along the upper edge, long narrow spine connecting the teeth to the handle, rounded handle with a circular hole at the end. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.

1. Draw the long narrow spine as a gently curved elongated shape from the handle end to the tip.
2. Add the rounded handle at the lower end, including a small circular hole near its center.
3. Along the upper edge of the spine, draw a row of evenly spaced teeth projecting outward.
4. Connect the teeth to the spine with clean lines and close the outline, keeping the handle and spine continuous.

ANSWER / CASE 3

comb: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

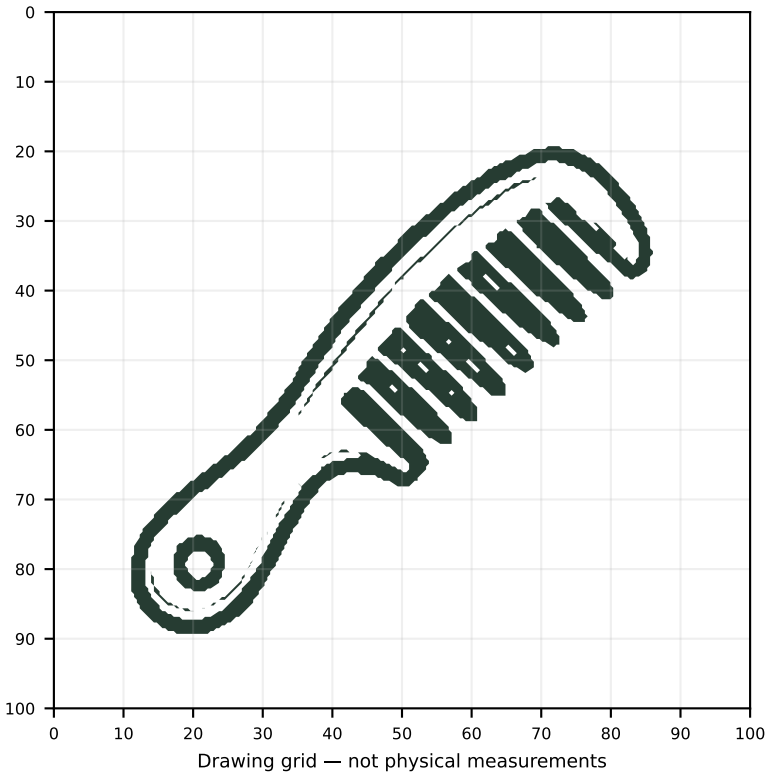

ANSWER: Example solution: preserve row of evenly spaced teeth along the upper edge, long narrow spine connecting the teeth to the handle, rounded handle with a circular hole at the end. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.

1. Draw the long narrow spine as a gently curved elongated shape from the handle end to the tip.
2. Add the rounded handle at the lower end, including a small circular hole near its center.
3. Along the upper edge of the spine, draw a row of evenly spaced teeth projecting outward.
4. Connect the teeth to the spine with clean lines and close the outline, keeping the handle and spine continuous.

How to Draw Comb — Free Practice Sheets

ANSWER / CASE 4

comb: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve row of evenly spaced teeth along the upper edge, long narrow spine connecting the teeth to the handle, rounded handle with a circular hole at the end. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.

1. Draw the long narrow spine as a gently curved elongated shape from the handle end to the tip.
2. Add the rounded handle at the lower end, including a small circular hole near its center.
3. Along the upper edge of the spine, draw a row of evenly spaced teeth projecting outward.
4. Connect the teeth to the spine with clean lines and close the outline, keeping the handle and spine continuous.
