How to Draw Security Camera — Free Practice Sheets

ANSWER / CASE 1

security camera: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

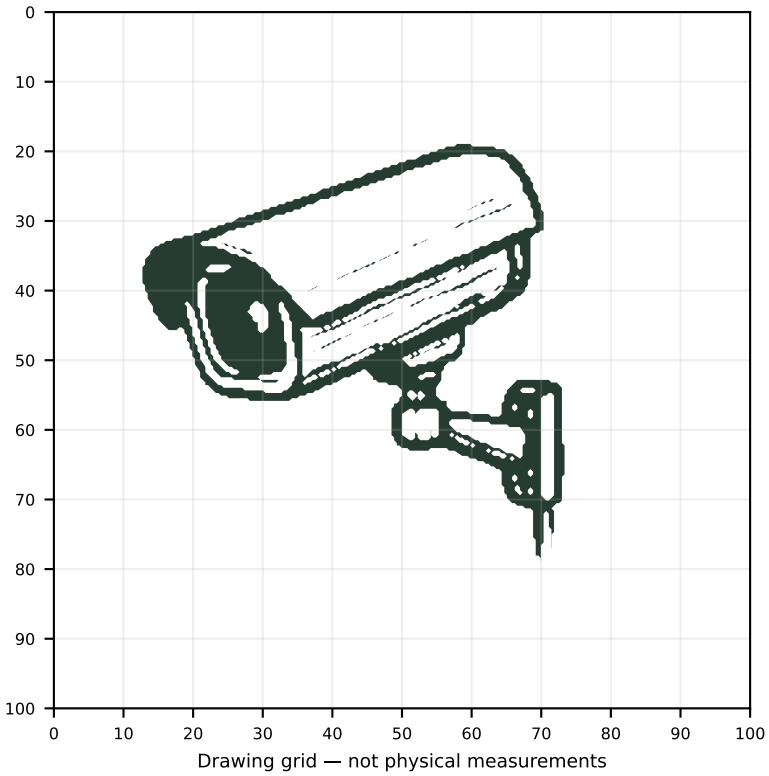

ANSWER: Example solution: preserve angled cylindrical body with a rounded rear end, front lens housing with concentric circular lens rings, L-shaped mounting bracket attached beneath the body. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the main cylindrical body as a long rounded rectangle tilted downward toward the left.
2. Add the front lens housing as a smaller rounded rectangle at the left end, then draw concentric circles inside for the lens.
3. Sketch the mounting bracket below the body: a short vertical neck, a horizontal arm, and a rectangular wall plate.
4. Outline the body and bracket with clean contour lines, adding a few interior lines to suggest the body's cylindrical form.

How to Draw Security Camera — Free Practice Sheets

ANSWER / CASE 2

security camera: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

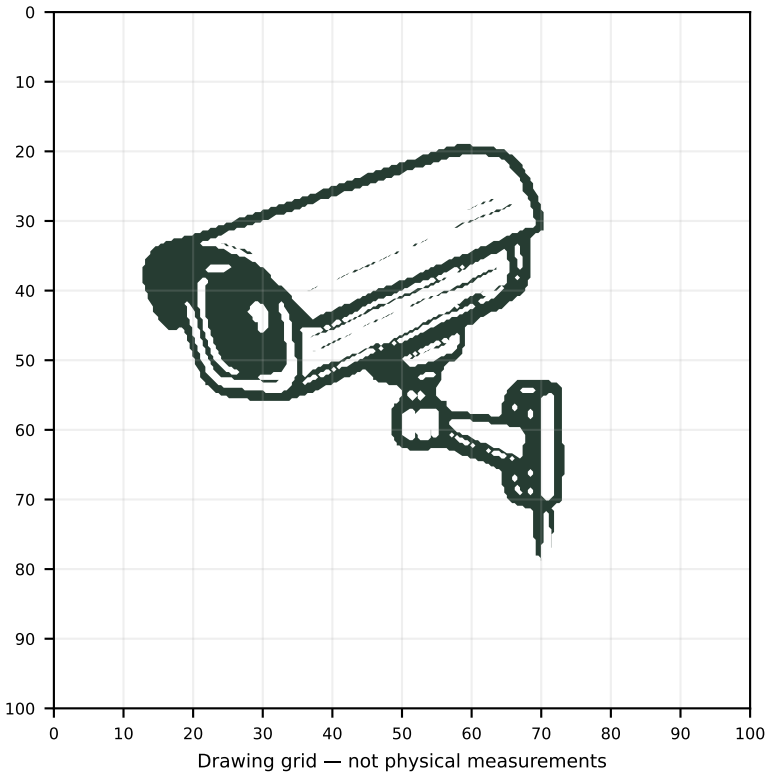

ANSWER: Example solution: preserve angled cylindrical body with a rounded rear end, front lens housing with concentric circular lens rings, L-shaped mounting bracket attached beneath the body. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the main cylindrical body as a long rounded rectangle tilted downward toward the left.
2. Add the front lens housing as a smaller rounded rectangle at the left end, then draw concentric circles inside for the lens.
3. Sketch the mounting bracket below the body: a short vertical neck, a horizontal arm, and a rectangular wall plate.
4. Outline the body and bracket with clean contour lines, adding a few interior lines to suggest the body's cylindrical form.

How to Draw Security Camera — Free Practice Sheets

ANSWER / CASE 3

security camera: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

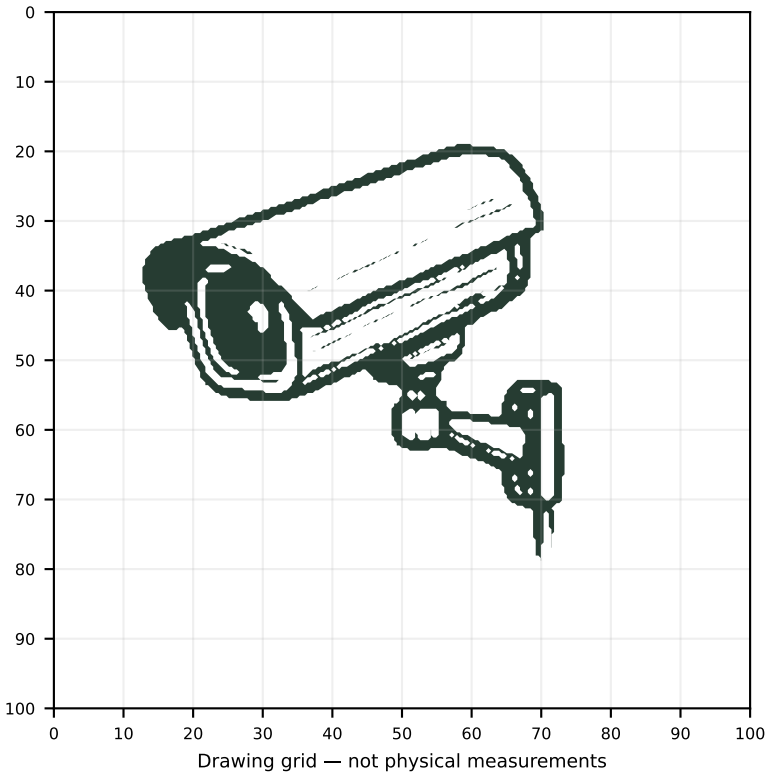

ANSWER: Example solution: preserve angled cylindrical body with a rounded rear end, front lens housing with concentric circular lens rings, L-shaped mounting bracket attached beneath the body. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the main cylindrical body as a long rounded rectangle tilted downward toward the left.
2. Add the front lens housing as a smaller rounded rectangle at the left end, then draw concentric circles inside for the lens.
3. Sketch the mounting bracket below the body: a short vertical neck, a horizontal arm, and a rectangular wall plate.
4. Outline the body and bracket with clean contour lines, adding a few interior lines to suggest the body's cylindrical form.

How to Draw Security Camera — Free Practice Sheets

ANSWER / CASE 4

security camera: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve angled cylindrical body with a rounded rear end, front lens housing with concentric circular lens rings, L-shaped mounting bracket attached beneath the body. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the main cylindrical body as a long rounded rectangle tilted downward toward the left.
2. Add the front lens housing as a smaller rounded rectangle at the left end, then draw concentric circles inside for the lens.
3. Sketch the mounting bracket below the body: a short vertical neck, a horizontal arm, and a rectangular wall plate.
4. Outline the body and bracket with clean contour lines, adding a few interior lines to suggest the body's cylindrical form.
