How to Draw Tuba — Free Practice Sheets

ANSWER / CASE 1

tuba: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

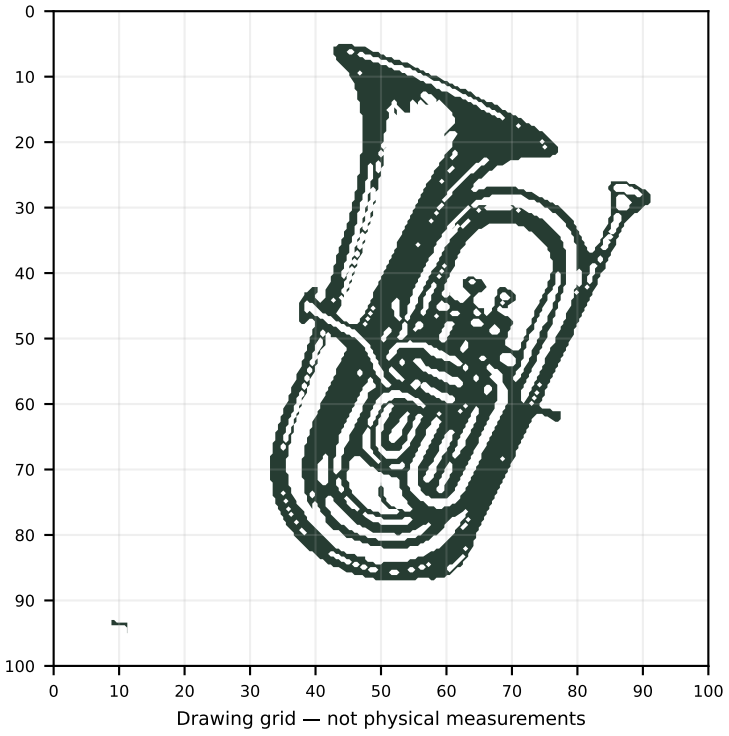

ANSWER: Example solution: preserve large flared bell pointing upward, cluster of three valve pistons with finger buttons, thick curved main tubing forming a loop below the bell. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the large upward-facing bell as a flared cone with an elliptical rim.
2. Sketch the thick U-shaped main tubing loop beneath the bell to establish the body.
3. Add the valve block with three vertical pistons and connecting valve tubing in the center.
4. Draw the leadpipe and mouthpiece extending to the right, then outline the inner tubing loops.

How to Draw Tuba — Free Practice Sheets

ANSWER / CASE 2

tuba: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

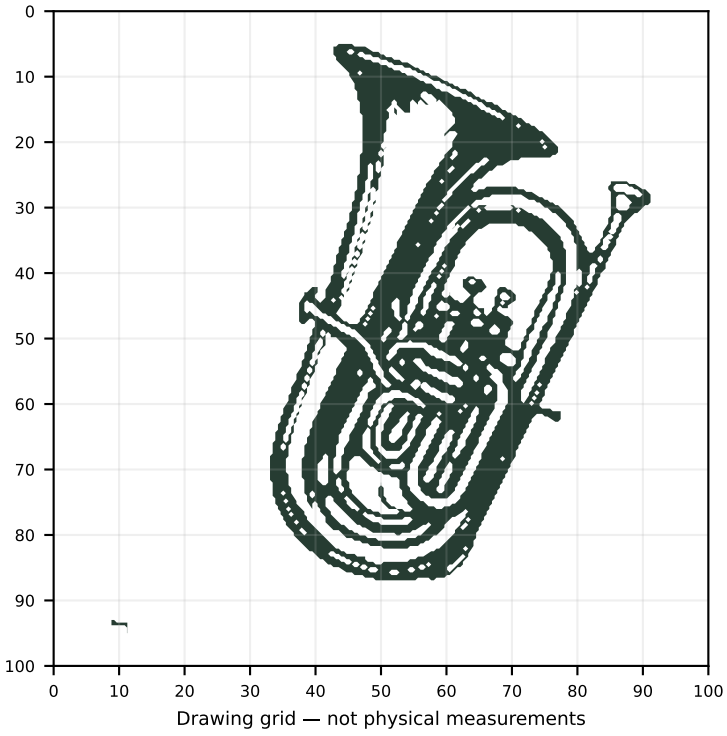

ANSWER: Example solution: preserve large flared bell pointing upward, cluster of three valve pistons with finger buttons, thick curved main tubing forming a loop below the bell. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the large upward-facing bell as a flared cone with an elliptical rim.
2. Sketch the thick U-shaped main tubing loop beneath the bell to establish the body.
3. Add the valve block with three vertical pistons and connecting valve tubing in the center.
4. Draw the leadpipe and mouthpiece extending to the right, then outline the inner tubing loops.

How to Draw Tuba — Free Practice Sheets

ANSWER / CASE 3

tuba: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

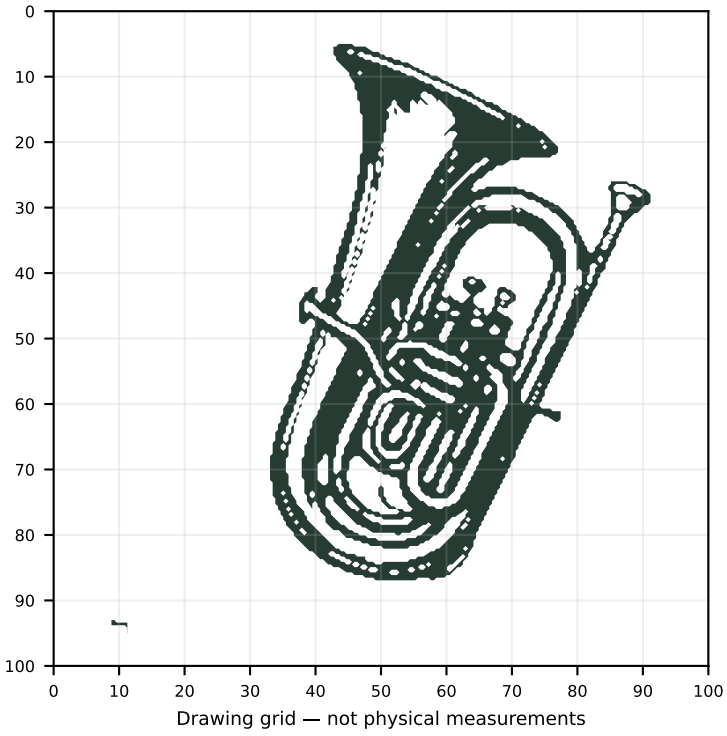

ANSWER: Example solution: preserve large flared bell pointing upward, cluster of three valve pistons with finger buttons, thick curved main tubing forming a loop below the bell. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the large upward-facing bell as a flared cone with an elliptical rim.
2. Sketch the thick U-shaped main tubing loop beneath the bell to establish the body.
3. Add the valve block with three vertical pistons and connecting valve tubing in the center.
4. Draw the leadpipe and mouthpiece extending to the right, then outline the inner tubing loops.

How to Draw Tuba — Free Practice Sheets

ANSWER / CASE 4

tuba: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve large flared bell pointing upward, cluster of three valve pistons with finger buttons, thick curved main tubing forming a loop below the bell. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the large upward-facing bell as a flared cone with an elliptical rim.
2. Sketch the thick U-shaped main tubing loop beneath the bell to establish the body.
3. Add the valve block with three vertical pistons and connecting valve tubing in the center.
4. Draw the leadpipe and mouthpiece extending to the right, then outline the inner tubing loops.
