How to Draw Crutch — Free Practice Sheets

ANSWER / CASE 1

crutch: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

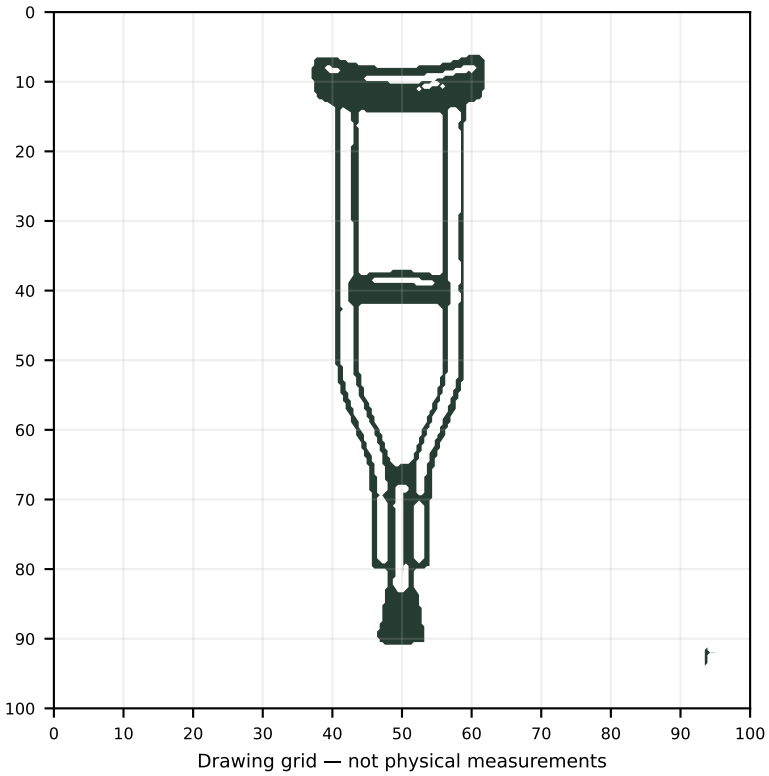

ANSWER: Example solution: preserve curved underarm pad at the top, two long parallel side support poles, horizontal hand grip bar between the poles. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the curved underarm pad as a wide horizontal shape at the top.
2. Draw two long vertical support poles descending from the pad, keeping them parallel.
3. Add a horizontal hand grip bar connecting the two poles partway down.
4. Taper the poles inward to meet a single lower shaft and finish with a small rubber foot at the bottom.

How to Draw Crutch — Free Practice Sheets

ANSWER / CASE 2

crutch: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

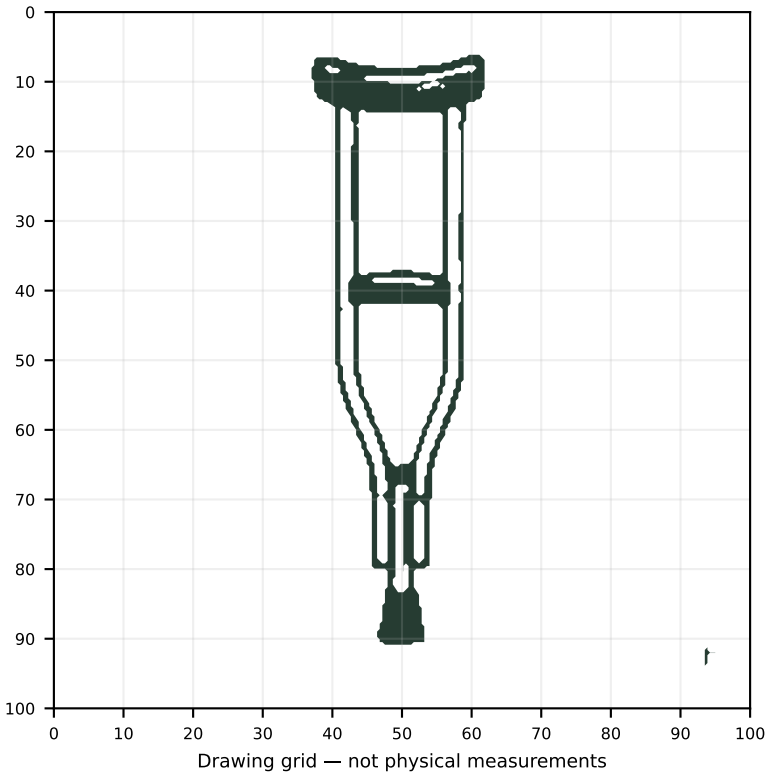

ANSWER: Example solution: preserve curved underarm pad at the top, two long parallel side support poles, horizontal hand grip bar between the poles. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the curved underarm pad as a wide horizontal shape at the top.
2. Draw two long vertical support poles descending from the pad, keeping them parallel.
3. Add a horizontal hand grip bar connecting the two poles partway down.
4. Taper the poles inward to meet a single lower shaft and finish with a small rubber foot at the bottom.

How to Draw Crutch — Free Practice Sheets

ANSWER / CASE 3

crutch: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

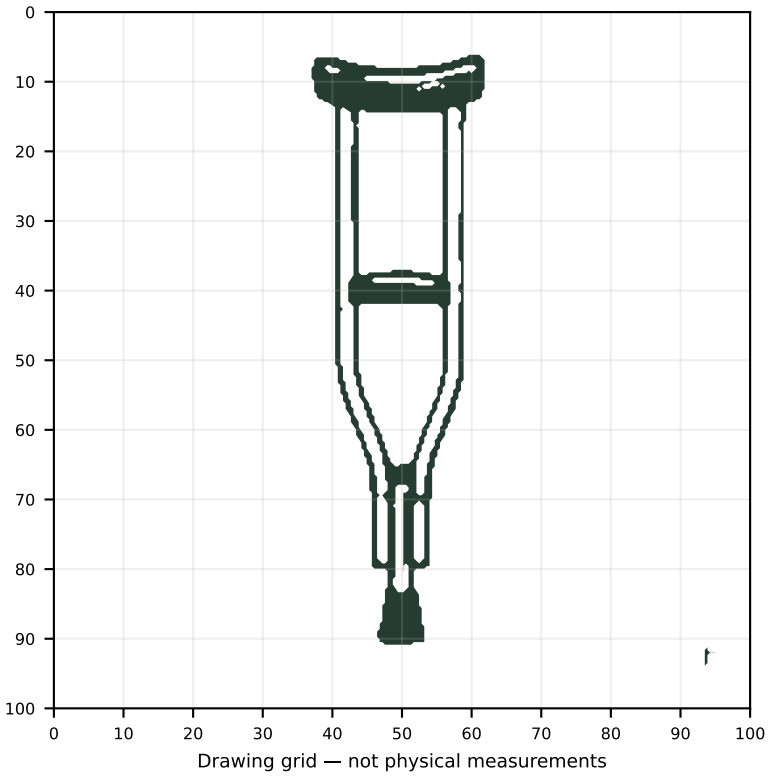

ANSWER: Example solution: preserve curved underarm pad at the top, two long parallel side support poles, horizontal hand grip bar between the poles. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the curved underarm pad as a wide horizontal shape at the top.
2. Draw two long vertical support poles descending from the pad, keeping them parallel.
3. Add a horizontal hand grip bar connecting the two poles partway down.
4. Taper the poles inward to meet a single lower shaft and finish with a small rubber foot at the bottom.

How to Draw Crutch — Free Practice Sheets

ANSWER / CASE 4

crutch: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve curved underarm pad at the top, two long parallel side support poles, horizontal hand grip bar between the poles. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the curved underarm pad as a wide horizontal shape at the top.
2. Draw two long vertical support poles descending from the pad, keeping them parallel.
3. Add a horizontal hand grip bar connecting the two poles partway down.
4. Taper the poles inward to meet a single lower shaft and finish with a small rubber foot at the bottom.
