# How to Draw Curtain — Free Practice Sheets

### ANSWER / CASE 1

curtain: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

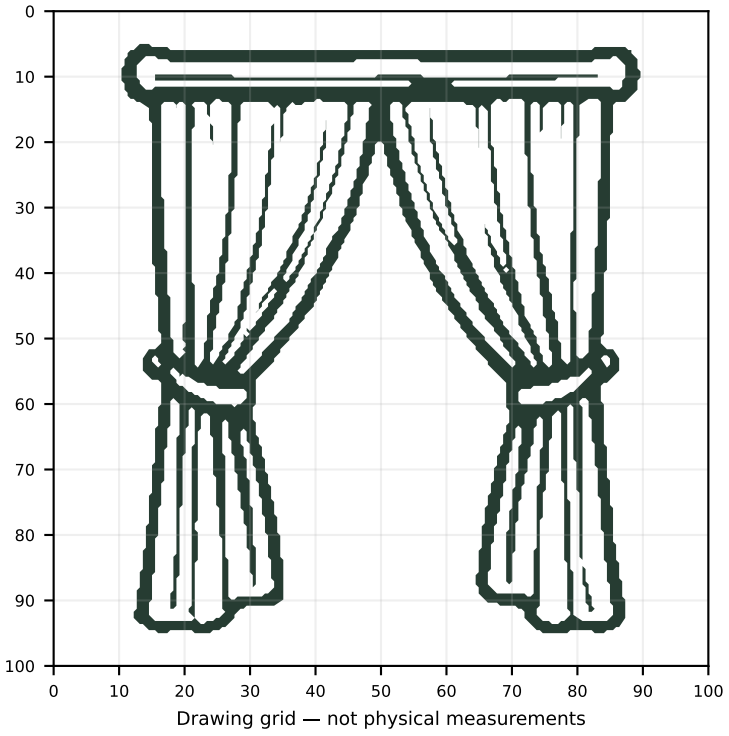

ANSWER: Example solution: preserve horizontal rod/rail at the top with rounded end caps, two symmetric draped fabric panels hanging from the rod, vertical fold lines running down each panel. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a horizontal rounded bar at the top to represent the curtain rod.
2. From the rod, draw two mirrored panels that curve inward toward the center, leaving a gap between them.
3. Add several vertical curved lines inside each panel to indicate fabric folds.
4. Draw a small tieback band around each panel at mid-height, then flare the fabric outward below it to the bottom edge.

### ANSWER / CASE 2

curtain: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

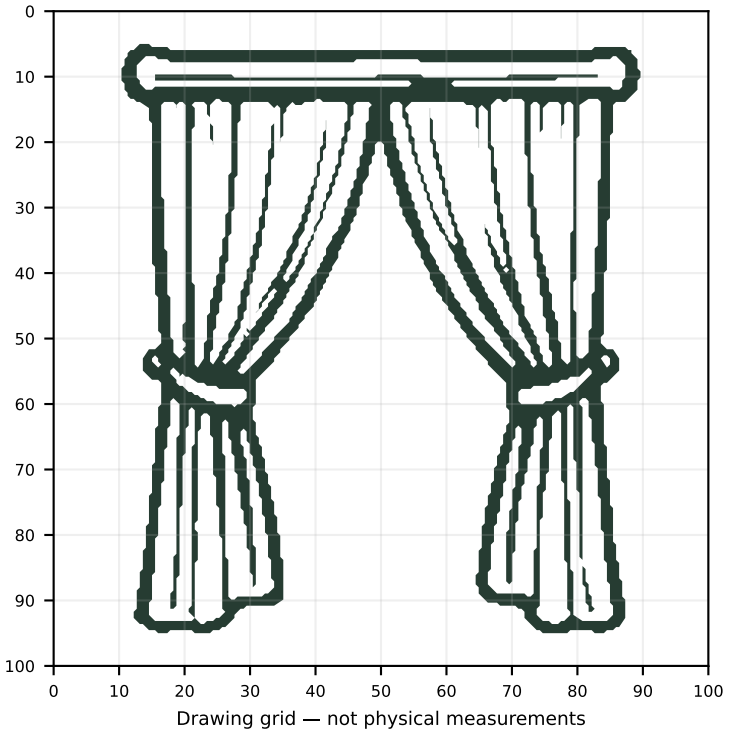

ANSWER: Example solution: preserve horizontal rod/rail at the top with rounded end caps, two symmetric draped fabric panels hanging from the rod, vertical fold lines running down each panel. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a horizontal rounded bar at the top to represent the curtain rod.
2. From the rod, draw two mirrored panels that curve inward toward the center, leaving a gap between them.
3. Add several vertical curved lines inside each panel to indicate fabric folds.
4. Draw a small tieback band around each panel at mid-height, then flare the fabric outward below it to the bottom edge.

### ANSWER / CASE 3

curtain: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

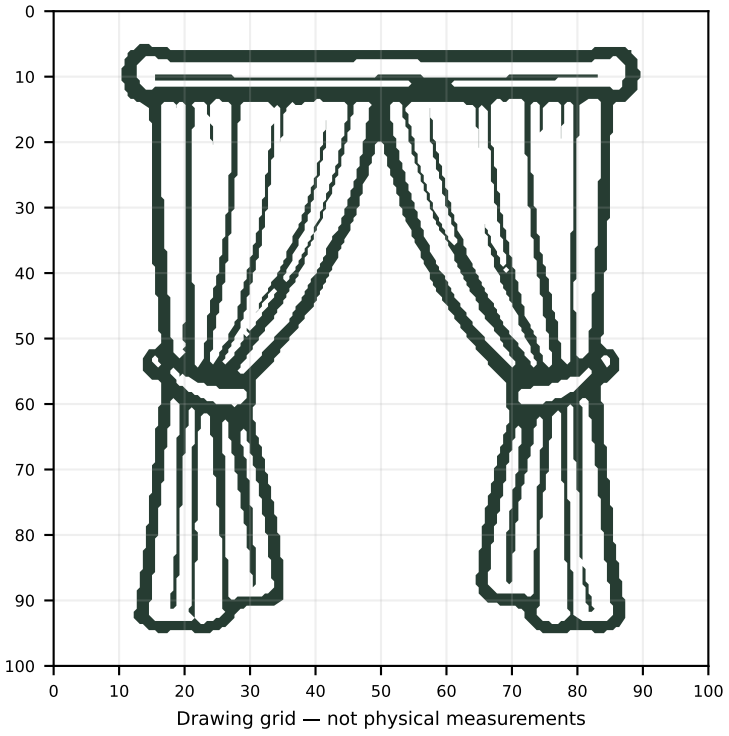

ANSWER: Example solution: preserve horizontal rod/rail at the top with rounded end caps, two symmetric draped fabric panels hanging from the rod, vertical fold lines running down each panel. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a horizontal rounded bar at the top to represent the curtain rod.
2. From the rod, draw two mirrored panels that curve inward toward the center, leaving a gap between them.
3. Add several vertical curved lines inside each panel to indicate fabric folds.
4. Draw a small tieback band around each panel at mid-height, then flare the fabric outward below it to the bottom edge.

### ANSWER / CASE 4

curtain: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve horizontal rod/rail at the top with rounded end caps, two symmetric draped fabric panels hanging from the rod, vertical fold lines running down each panel. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a horizontal rounded bar at the top to represent the curtain rod.
2. From the rod, draw two mirrored panels that curve inward toward the center, leaving a gap between them.
3. Add several vertical curved lines inside each panel to indicate fabric folds.
4. Draw a small tieback band around each panel at mid-height, then flare the fabric outward below it to the bottom edge.
