How to Draw Mirror — Free Practice Sheets

ANSWER / CASE 1

mirror: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

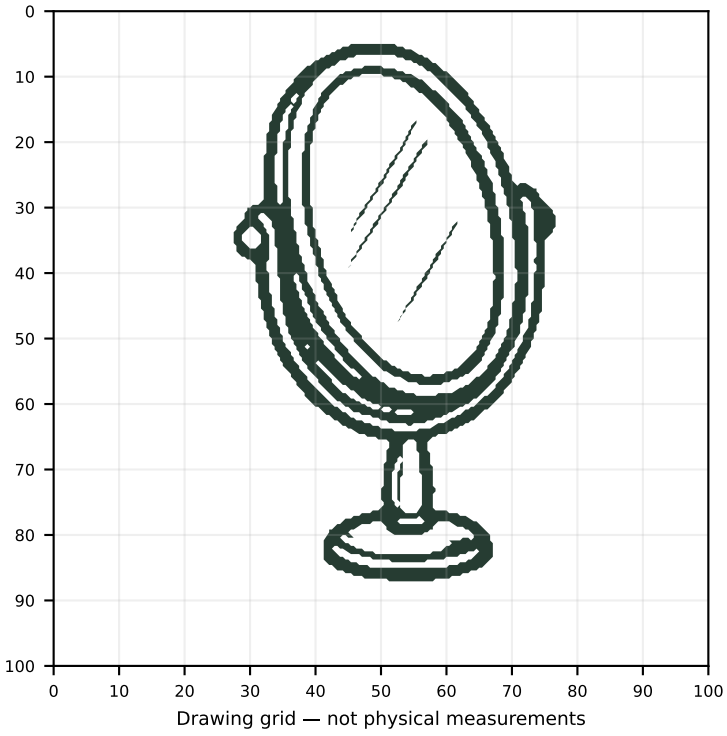

ANSWER: Example solution: preserve oval reflective surface with diagonal reflection lines, thick double-line frame with side pivot knobs, central pedestal stand on a rounded base. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a large oval for the mirror face and add a second concentric oval to form the frame.
2. Place small circular knobs on the left and right sides of the frame to indicate pivot points.
3. Draw a short vertical stem descending from the bottom center of the frame.
4. Add a rounded, slightly flattened base at the bottom of the stem to complete the stand.

How to Draw Mirror — Free Practice Sheets

ANSWER / CASE 2

mirror: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

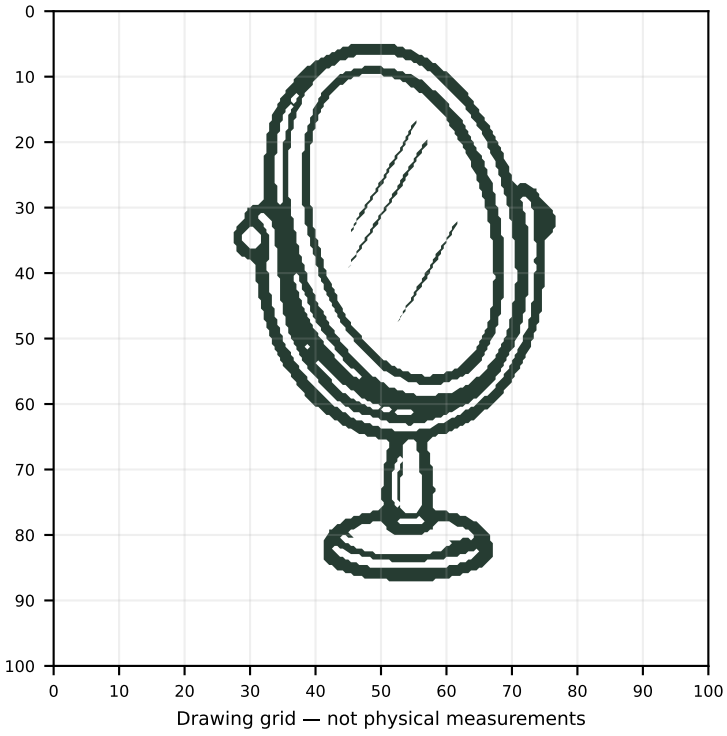

ANSWER: Example solution: preserve oval reflective surface with diagonal reflection lines, thick double-line frame with side pivot knobs, central pedestal stand on a rounded base. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a large oval for the mirror face and add a second concentric oval to form the frame.
2. Place small circular knobs on the left and right sides of the frame to indicate pivot points.
3. Draw a short vertical stem descending from the bottom center of the frame.
4. Add a rounded, slightly flattened base at the bottom of the stem to complete the stand.

ANSWER / CASE 3

mirror: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

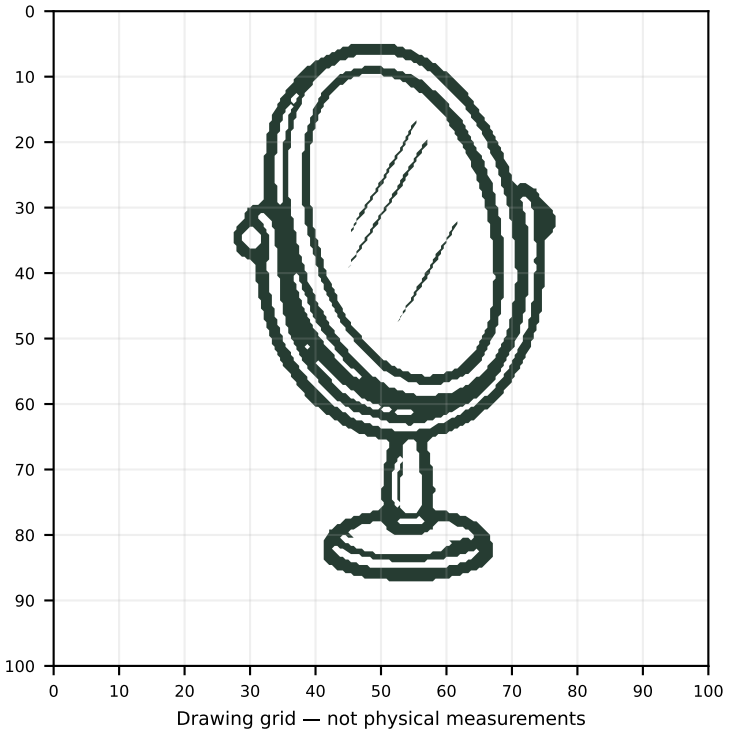

ANSWER: Example solution: preserve oval reflective surface with diagonal reflection lines, thick double-line frame with side pivot knobs, central pedestal stand on a rounded base. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a large oval for the mirror face and add a second concentric oval to form the frame.
2. Place small circular knobs on the left and right sides of the frame to indicate pivot points.
3. Draw a short vertical stem descending from the bottom center of the frame.
4. Add a rounded, slightly flattened base at the bottom of the stem to complete the stand.

How to Draw Mirror — Free Practice Sheets

ANSWER / CASE 4

mirror: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve oval reflective surface with diagonal reflection lines, thick double-line frame with side pivot knobs, central pedestal stand on a rounded base. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a large oval for the mirror face and add a second concentric oval to form the frame.
2. Place small circular knobs on the left and right sides of the frame to indicate pivot points.
3. Draw a short vertical stem descending from the bottom center of the frame.
4. Add a rounded, slightly flattened base at the bottom of the stem to complete the stand.
