How to Draw Vacuum Cleaner — Free Practice Sheets

REFERENCE / CASE 1

vacuum cleaner: Trace the reference outline, then practise the contour independently.
Compare with the separate full reference sheet.

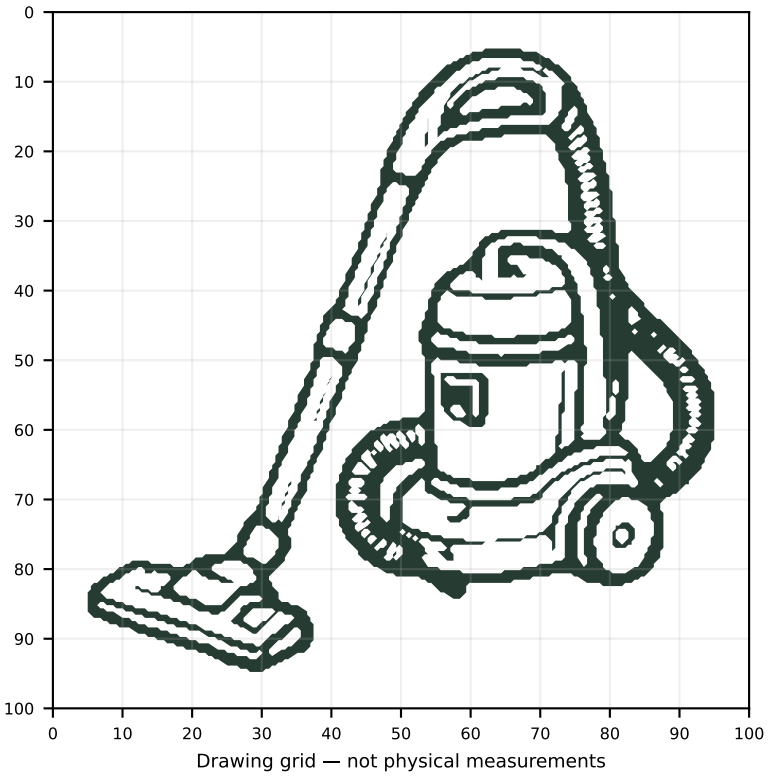

METHOD: Draw the central canister body as a vertical cylinder with a rounded top and a small rectangular latch detail. Add the base platform beneath the canister and attach the large rear wheel on the right and a small front caster near the left. Draw the long wand extending diagonally down-left from the top handle area, ending in a flat rectangular floor nozzle. Connect the ribbed hose from the top of the canister, looping it around the right side and down to the lower wand/nozzle junction.
Use the separate practice sheet before checking the answer.

REFERENCE / CASE 3

vacuum cleaner: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

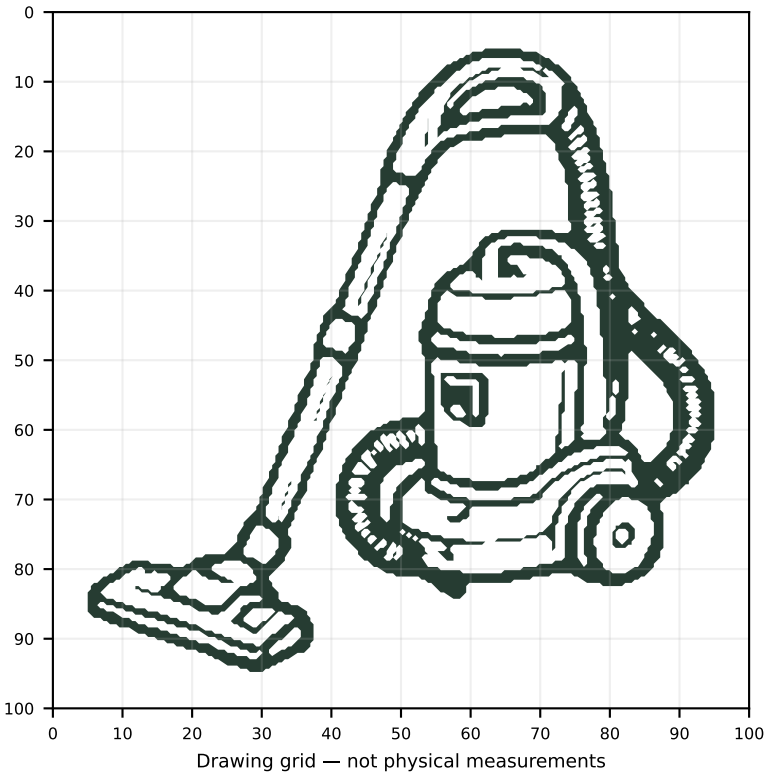

METHOD: Draw the central canister body as a vertical cylinder with a rounded top and a small rectangular latch detail. Add the base platform beneath the canister and attach the large rear wheel on the right and a small front caster near the left. Draw the long wand extending diagonally down-left from the top handle area, ending in a flat rectangular floor nozzle. Connect the ribbed hose from the top of the canister, looping it around the right side and down to the lower wand/nozzle junction.
Use the separate practice sheet before checking the answer.

How to Draw Vacuum Cleaner — Free Practice Sheets

REFERENCE / CASE 4

vacuum cleaner: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

METHOD: Draw the central canister body as a vertical cylinder with a rounded top and a small rectangular latch detail. Add the base platform beneath the canister and attach the large rear wheel on the right and a small front caster near the left. Draw the long wand extending diagonally down-left from the top handle area, ending in a flat rectangular floor nozzle. Connect the ribbed hose from the top of the canister, looping it around the right side and down to the lower wand/nozzle junction.
Use the separate practice sheet before checking the answer.
