How to Draw Fountain — Free Practice Sheets

ANSWER / CASE 1

fountain: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

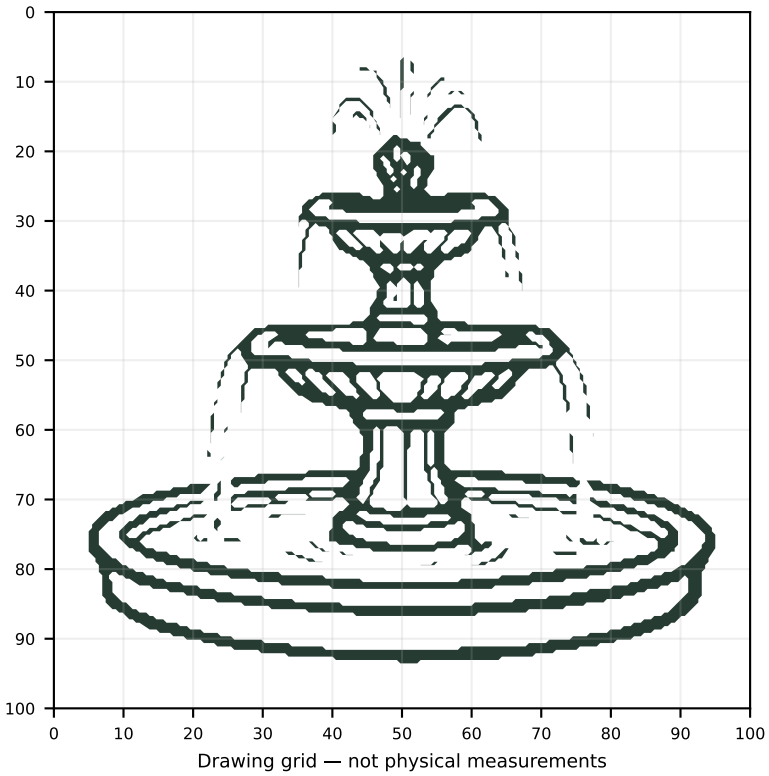

ANSWER: Example solution: preserve three stacked oval basins of decreasing size, central vertical spout with radiating water lines at the top, curved water arcs falling from the upper and middle basins into the base pool. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a wide flattened oval for the ground-level base pool, then add a smaller oval above it for the middle basin and an even smaller oval for the top basin.
2. Connect the basins with tapered vertical pedestals, using curved sides and horizontal bands to suggest the tiered structure.
3. Add a small central spout on the top basin and draw short radiating lines to show water spraying upward.
4. Draw curved lines falling from the rims of the top and middle basins down into the lower pool, and add a few ripple lines inside the base.

ANSWER / CASE 2

fountain: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

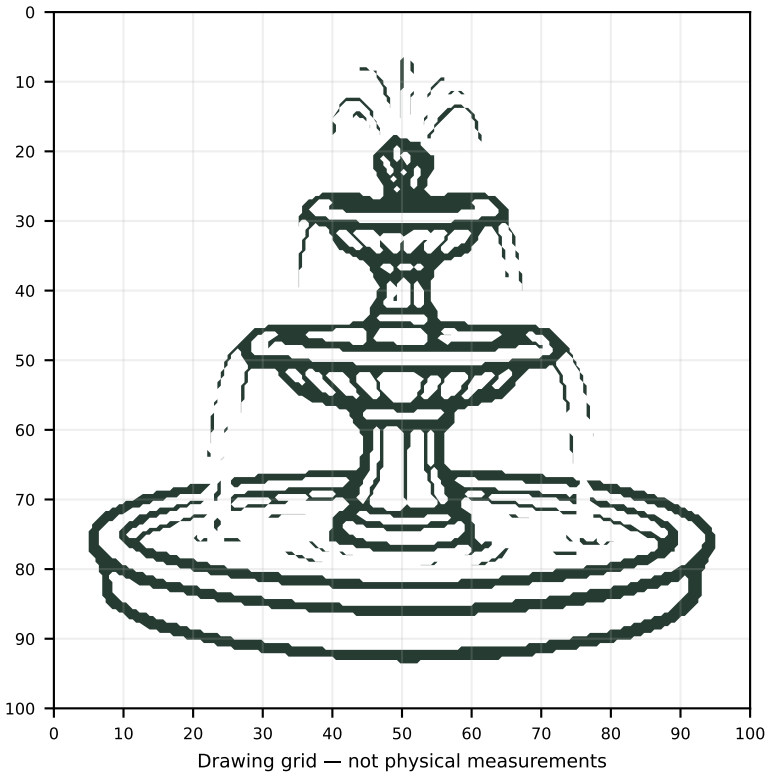

ANSWER: Example solution: preserve three stacked oval basins of decreasing size, central vertical spout with radiating water lines at the top, curved water arcs falling from the upper and middle basins into the base pool. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a wide flattened oval for the ground-level base pool, then add a smaller oval above it for the middle basin and an even smaller oval for the top basin.
2. Connect the basins with tapered vertical pedestals, using curved sides and horizontal bands to suggest the tiered structure.
3. Add a small central spout on the top basin and draw short radiating lines to show water spraying upward.
4. Draw curved lines falling from the rims of the top and middle basins down into the lower pool, and add a few ripple lines inside the base.

ANSWER / CASE 3

fountain: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

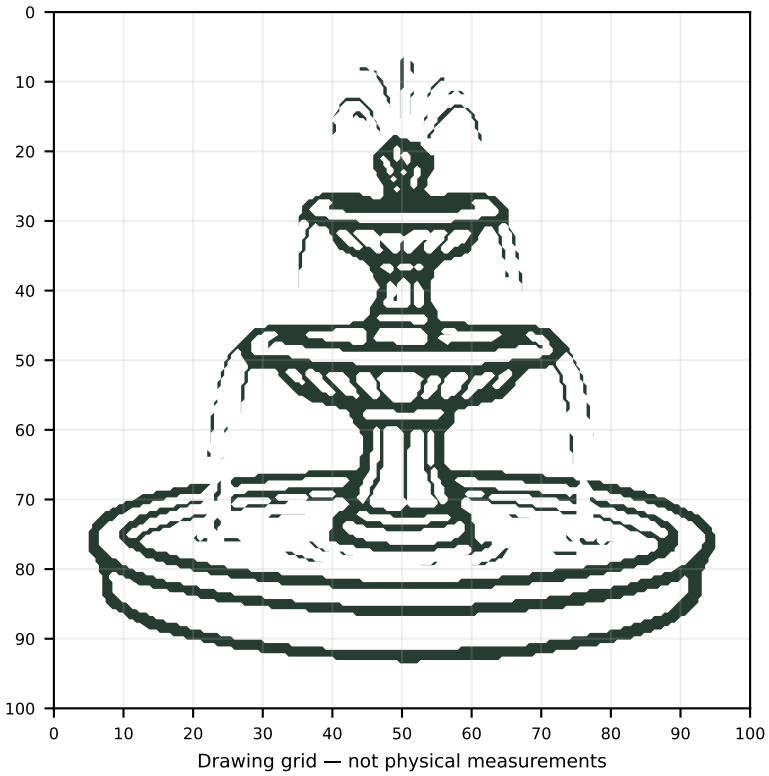

ANSWER: Example solution: preserve three stacked oval basins of decreasing size, central vertical spout with radiating water lines at the top, curved water arcs falling from the upper and middle basins into the base pool. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a wide flattened oval for the ground-level base pool, then add a smaller oval above it for the middle basin and an even smaller oval for the top basin.
2. Connect the basins with tapered vertical pedestals, using curved sides and horizontal bands to suggest the tiered structure.
3. Add a small central spout on the top basin and draw short radiating lines to show water spraying upward.
4. Draw curved lines falling from the rims of the top and middle basins down into the lower pool, and add a few ripple lines inside the base.

How to Draw Fountain — Free Practice Sheets

ANSWER / CASE 4

fountain: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve three stacked oval basins of decreasing size, central vertical spout with radiating water lines at the top, curved water arcs falling from the upper and middle basins into the base pool. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a wide flattened oval for the ground-level base pool, then add a smaller oval above it for the middle basin and an even smaller oval for the top basin.
2. Connect the basins with tapered vertical pedestals, using curved sides and horizontal bands to suggest the tiered structure.
3. Add a small central spout on the top basin and draw short radiating lines to show water spraying upward.
4. Draw curved lines falling from the rims of the top and middle basins down into the lower pool, and add a few ripple lines inside the base.
