How to Draw Pulley — Free Practice Sheets

ANSWER / CASE 1

pulley: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

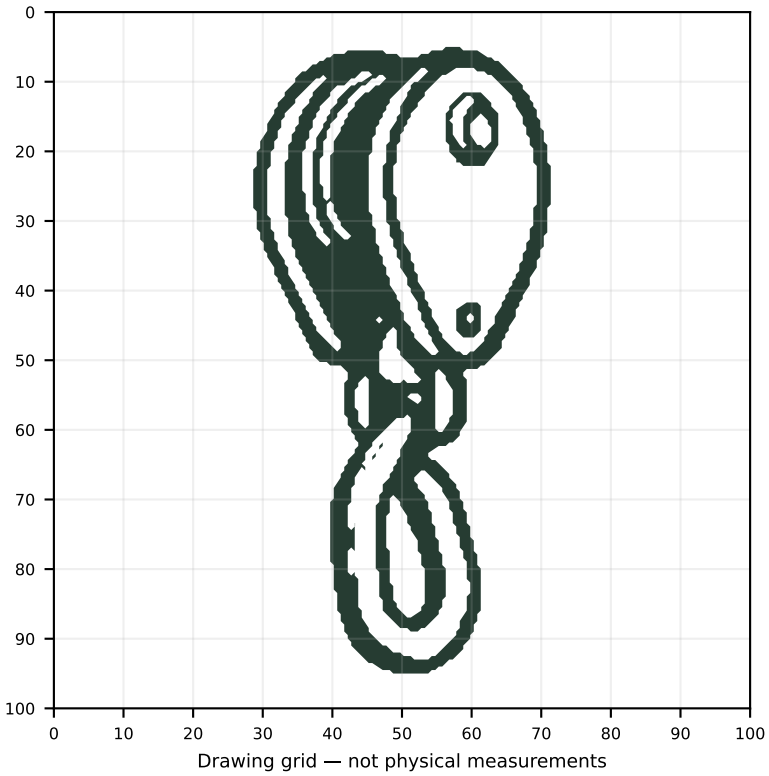

ANSWER: Example solution: preserve grooved wheel with concentric circular lines, teardrop-shaped mounting bracket/cheek plate with two circular holes, rope loop hanging from the bottom of the bracket. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the teardrop-shaped side plate with a rounded top and tapered bottom, adding two small circular holes for mounting/rivet points.
2. Draw the grooved wheel as a set of nested curved lines attached to the left side of the plate, showing the rope groove.
3. Draw a small connecting ring or shackle at the bottom tip of the plate.
4. Draw the rope loop as an elongated oval hanging from the bottom ring, with an inner line to indicate thickness.

How to Draw Pulley — Free Practice Sheets

ANSWER / CASE 2

pulley: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

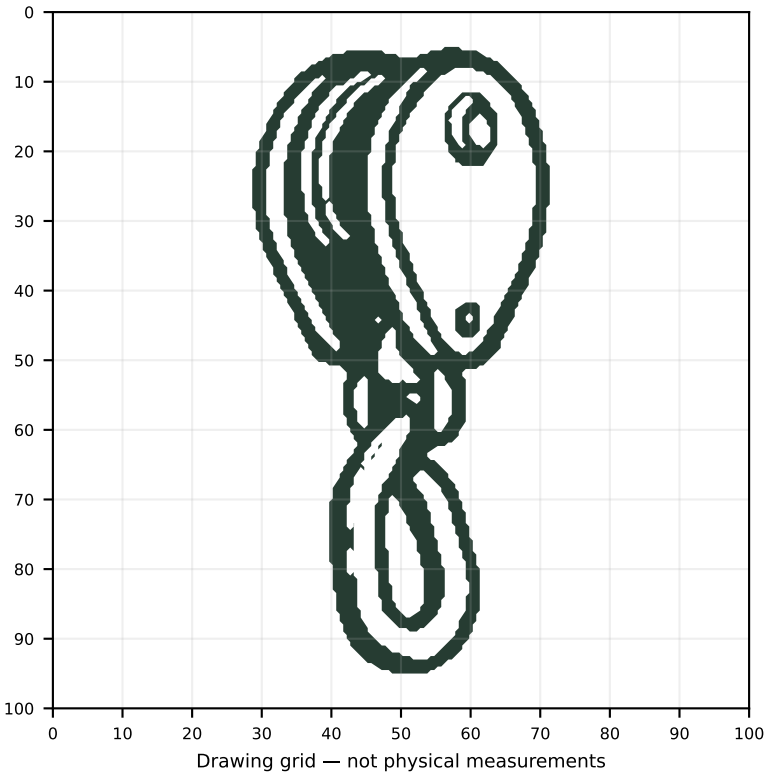

ANSWER: Example solution: preserve grooved wheel with concentric circular lines, teardrop-shaped mounting bracket/cheek plate with two circular holes, rope loop hanging from the bottom of the bracket. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the teardrop-shaped side plate with a rounded top and tapered bottom, adding two small circular holes for mounting/rivet points.
2. Draw the grooved wheel as a set of nested curved lines attached to the left side of the plate, showing the rope groove.
3. Draw a small connecting ring or shackle at the bottom tip of the plate.
4. Draw the rope loop as an elongated oval hanging from the bottom ring, with an inner line to indicate thickness.

How to Draw Pulley — Free Practice Sheets

ANSWER / CASE 3

pulley: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

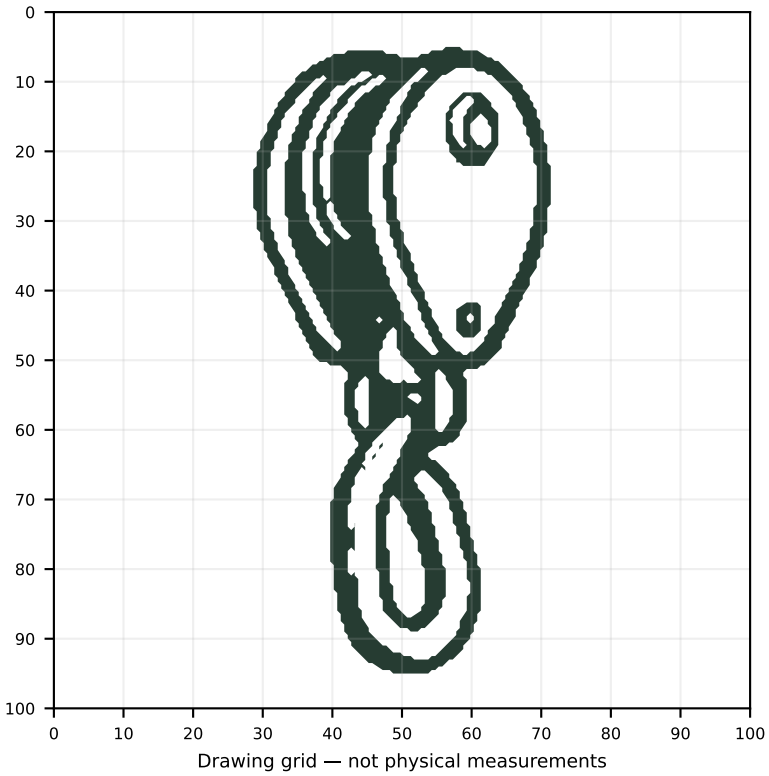

ANSWER: Example solution: preserve grooved wheel with concentric circular lines, teardrop-shaped mounting bracket/cheek plate with two circular holes, rope loop hanging from the bottom of the bracket. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the teardrop-shaped side plate with a rounded top and tapered bottom, adding two small circular holes for mounting/rivet points.
2. Draw the grooved wheel as a set of nested curved lines attached to the left side of the plate, showing the rope groove.
3. Draw a small connecting ring or shackle at the bottom tip of the plate.
4. Draw the rope loop as an elongated oval hanging from the bottom ring, with an inner line to indicate thickness.

How to Draw Pulley — Free Practice Sheets

ANSWER / CASE 4

pulley: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve grooved wheel with concentric circular lines, teardrop-shaped mounting bracket/cheek plate with two circular holes, rope loop hanging from the bottom of the bracket. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the teardrop-shaped side plate with a rounded top and tapered bottom, adding two small circular holes for mounting/rivet points.
2. Draw the grooved wheel as a set of nested curved lines attached to the left side of the plate, showing the rope groove.
3. Draw a small connecting ring or shackle at the bottom tip of the plate.
4. Draw the rope loop as an elongated oval hanging from the bottom ring, with an inner line to indicate thickness.
