How to Draw Globe — Free Practice Sheets

ANSWER / CASE 1

globe: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

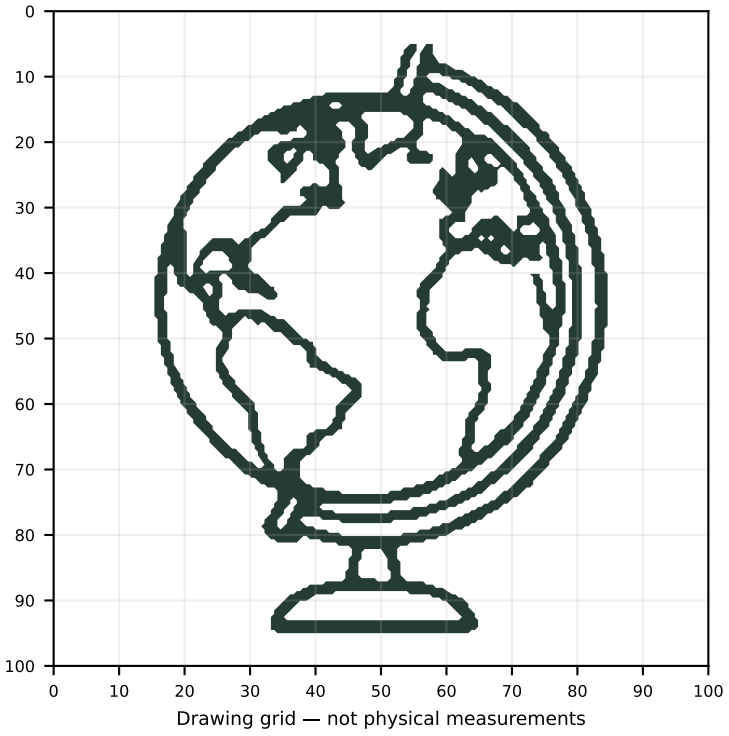

ANSWER: Example solution: preserve circular sphere with simplified continent outlines, tilted axis rod passing through the top and bottom of the sphere, curved meridian ring and flared base supporting the globe. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a large circle for the sphere and sketch simplified continent shapes inside it.
2. Add a tilted straight rod through the top and bottom of the sphere to indicate the axis.
3. Draw a curved ring around the sphere following its tilt, connecting to the axis points.
4. Attach a short stem and flared base beneath the ring to form the stand.

How to Draw Globe — Free Practice Sheets

ANSWER / CASE 2

globe: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

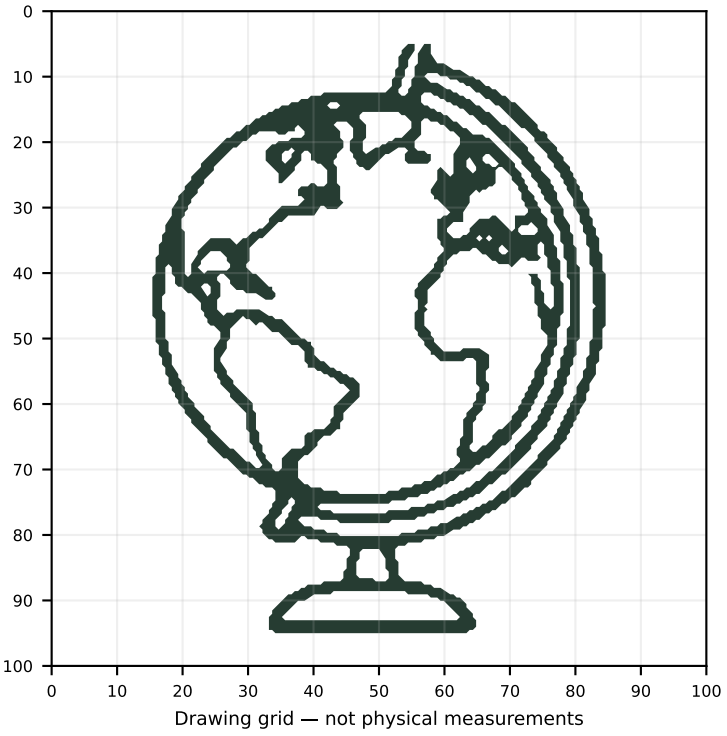

ANSWER: Example solution: preserve circular sphere with simplified continent outlines, tilted axis rod passing through the top and bottom of the sphere, curved meridian ring and flared base supporting the globe. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a large circle for the sphere and sketch simplified continent shapes inside it.
2. Add a tilted straight rod through the top and bottom of the sphere to indicate the axis.
3. Draw a curved ring around the sphere following its tilt, connecting to the axis points.
4. Attach a short stem and flared base beneath the ring to form the stand.

How to Draw Globe — Free Practice Sheets

ANSWER / CASE 3

globe: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

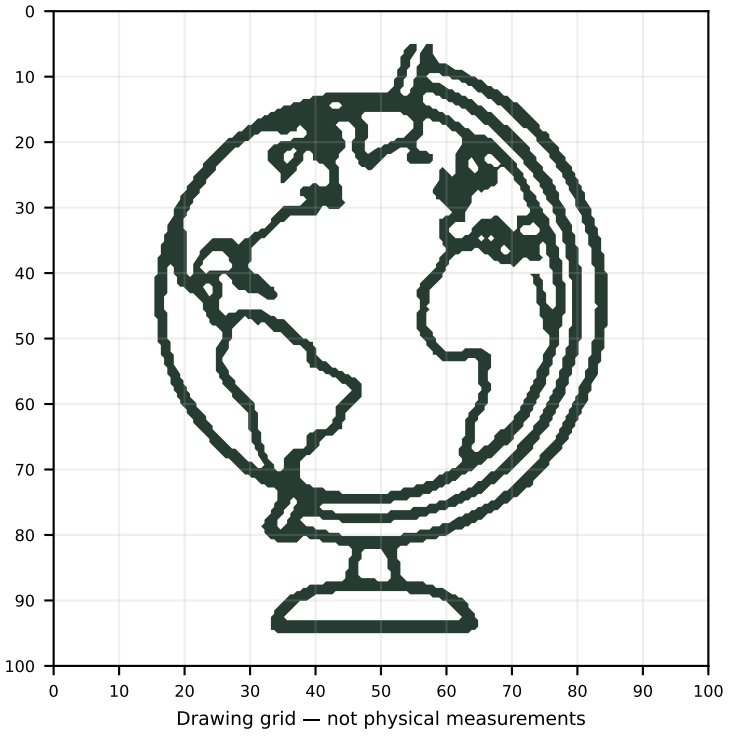

ANSWER: Example solution: preserve circular sphere with simplified continent outlines, tilted axis rod passing through the top and bottom of the sphere, curved meridian ring and flared base supporting the globe. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a large circle for the sphere and sketch simplified continent shapes inside it.
2. Add a tilted straight rod through the top and bottom of the sphere to indicate the axis.
3. Draw a curved ring around the sphere following its tilt, connecting to the axis points.
4. Attach a short stem and flared base beneath the ring to form the stand.

How to Draw Globe — Free Practice Sheets

ANSWER / CASE 4

globe: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve circular sphere with simplified continent outlines, tilted axis rod passing through the top and bottom of the sphere, curved meridian ring and flared base supporting the globe. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a large circle for the sphere and sketch simplified continent shapes inside it.
2. Add a tilted straight rod through the top and bottom of the sphere to indicate the axis.
3. Draw a curved ring around the sphere following its tilt, connecting to the axis points.
4. Attach a short stem and flared base beneath the ring to form the stand.
