How to Draw Glasses — Free Practice Sheets

ANSWER / CASE 1

glasses: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

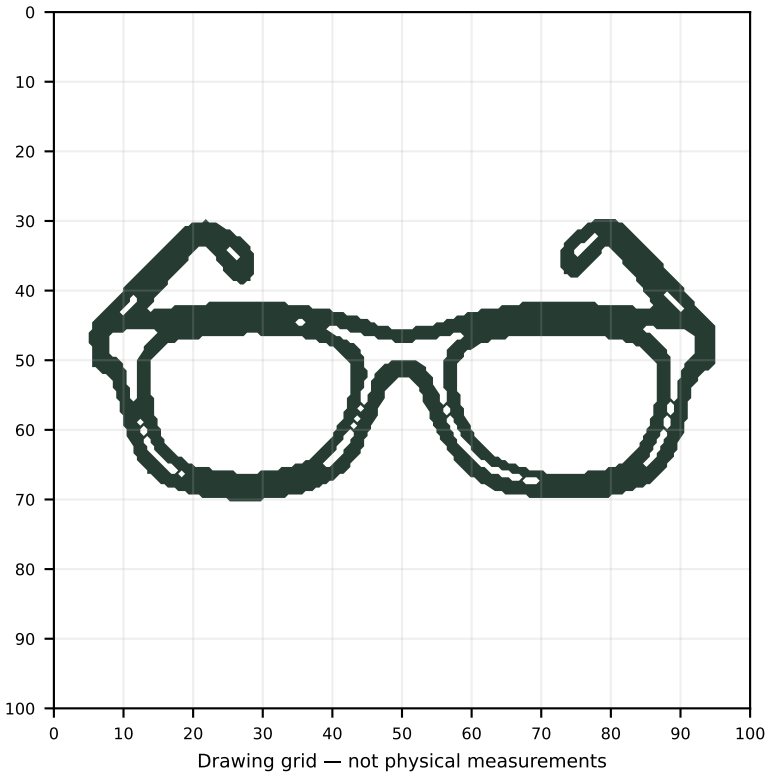

ANSWER: Example solution: preserve two rounded rectangular lenses, central bridge connecting the lenses, two short temple arms extending upward/back from the outer edges. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw two rounded rectangular lens outlines side by side with a small gap between them.
2. Connect the inner edges of the lenses with a curved bridge.
3. Add a short temple arm at each outer corner, angled upward and slightly inward.
4. Outline the frame thickness around the lenses and temples to finish the glasses shape.

How to Draw Glasses — Free Practice Sheets

ANSWER / CASE 2

glasses: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

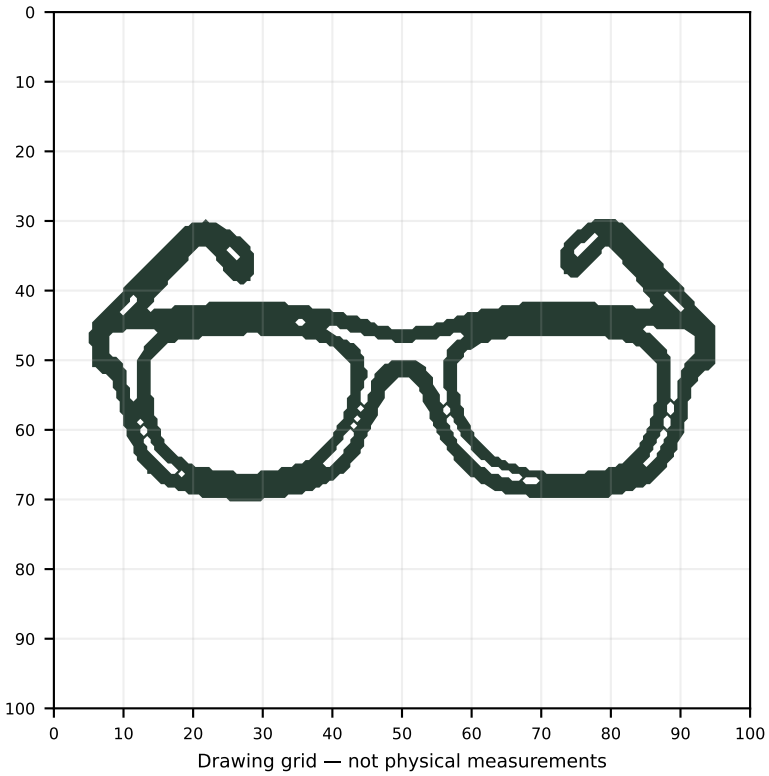

ANSWER: Example solution: preserve two rounded rectangular lenses, central bridge connecting the lenses, two short temple arms extending upward/back from the outer edges. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw two rounded rectangular lens outlines side by side with a small gap between them.
2. Connect the inner edges of the lenses with a curved bridge.
3. Add a short temple arm at each outer corner, angled upward and slightly inward.
4. Outline the frame thickness around the lenses and temples to finish the glasses shape.

How to Draw Glasses — Free Practice Sheets

ANSWER / CASE 3

glasses: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

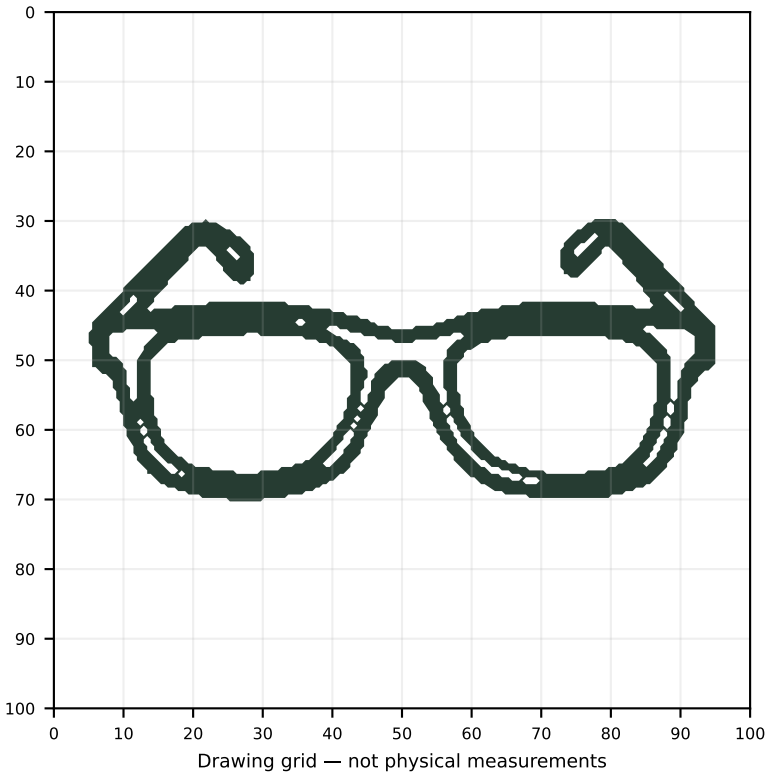

ANSWER: Example solution: preserve two rounded rectangular lenses, central bridge connecting the lenses, two short temple arms extending upward/back from the outer edges. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw two rounded rectangular lens outlines side by side with a small gap between them.
2. Connect the inner edges of the lenses with a curved bridge.
3. Add a short temple arm at each outer corner, angled upward and slightly inward.
4. Outline the frame thickness around the lenses and temples to finish the glasses shape.

How to Draw Glasses — Free Practice Sheets

ANSWER / CASE 4

glasses: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve two rounded rectangular lenses, central bridge connecting the lenses, two short temple arms extending upward/back from the outer edges. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw two rounded rectangular lens outlines side by side with a small gap between them.
2. Connect the inner edges of the lenses with a curved bridge.
3. Add a short temple arm at each outer corner, angled upward and slightly inward.
4. Outline the frame thickness around the lenses and temples to finish the glasses shape.
