How to Draw Hand Fan — Free Practice Sheets

ANSWER / CASE 1

hand fan: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

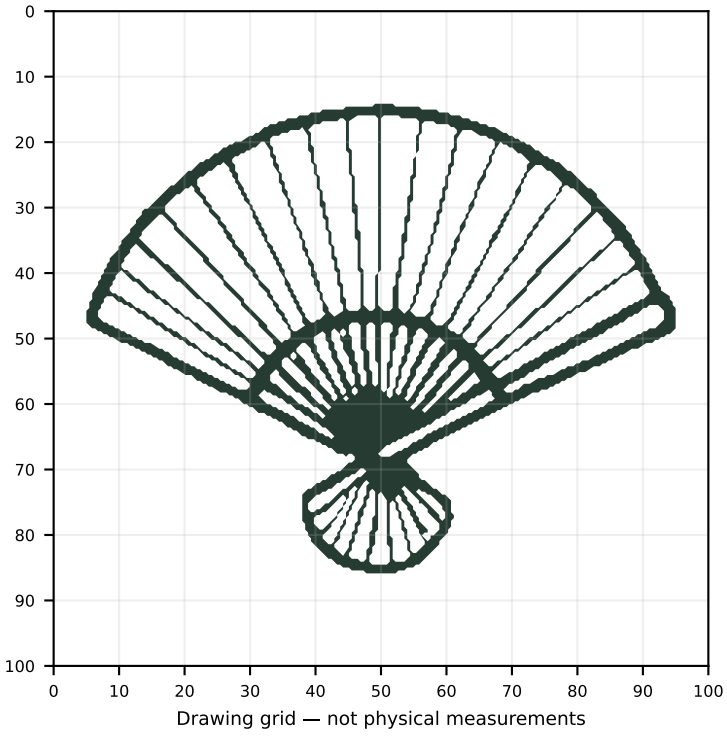

ANSWER: Example solution: preserve broad arc-shaped fan silhouette, radiating folded pleat lines from a central pivot, small rounded lower section below the pivot. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a wide arc for the top edge of the fan.
2. Draw a smaller arc below it to form the inner edge and connect the ends to make the fan body.
3. Add many straight radiating lines from the central pivot point to the top arc to show folded pleats.
4. Draw a small rounded fan-shaped section below the pivot to complete the handle/base area.

How to Draw Hand Fan — Free Practice Sheets

ANSWER / CASE 2

hand fan: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

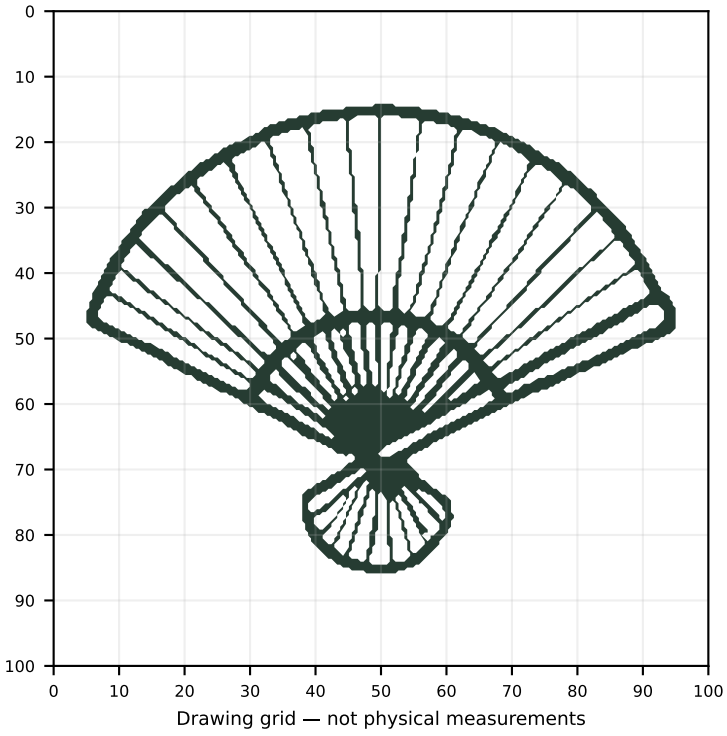

Drawing grid — not physical measurements

ANSWER: Example solution: preserve broad arc-shaped fan silhouette, radiating folded pleat lines from a central pivot, small rounded lower section below the pivot. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a wide arc for the top edge of the fan.
2. Draw a smaller arc below it to form the inner edge and connect the ends to make the fan body.
3. Add many straight radiating lines from the central pivot point to the top arc to show folded pleats.
4. Draw a small rounded fan-shaped section below the pivot to complete the handle/base area.

How to Draw Hand Fan — Free Practice Sheets

ANSWER / CASE 3

hand fan: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

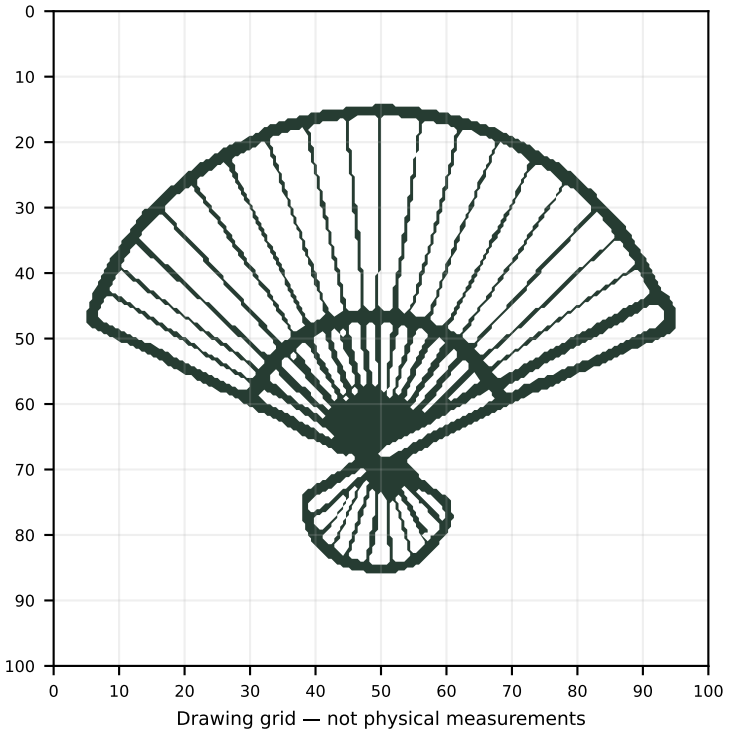

ANSWER: Example solution: preserve broad arc-shaped fan silhouette, radiating folded pleat lines from a central pivot, small rounded lower section below the pivot. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a wide arc for the top edge of the fan.
2. Draw a smaller arc below it to form the inner edge and connect the ends to make the fan body.
3. Add many straight radiating lines from the central pivot point to the top arc to show folded pleats.
4. Draw a small rounded fan-shaped section below the pivot to complete the handle/base area.

How to Draw Hand Fan — Free Practice Sheets

ANSWER / CASE 4

hand fan: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve broad arc-shaped fan silhouette, radiating folded pleat lines from a central pivot, small rounded lower section below the pivot. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a wide arc for the top edge of the fan.
2. Draw a smaller arc below it to form the inner edge and connect the ends to make the fan body.
3. Add many straight radiating lines from the central pivot point to the top arc to show folded pleats.
4. Draw a small rounded fan-shaped section below the pivot to complete the handle/base area.
