How to Draw Rubber Duck — Free Practice Sheets

ANSWER / CASE 1

rubber duck: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

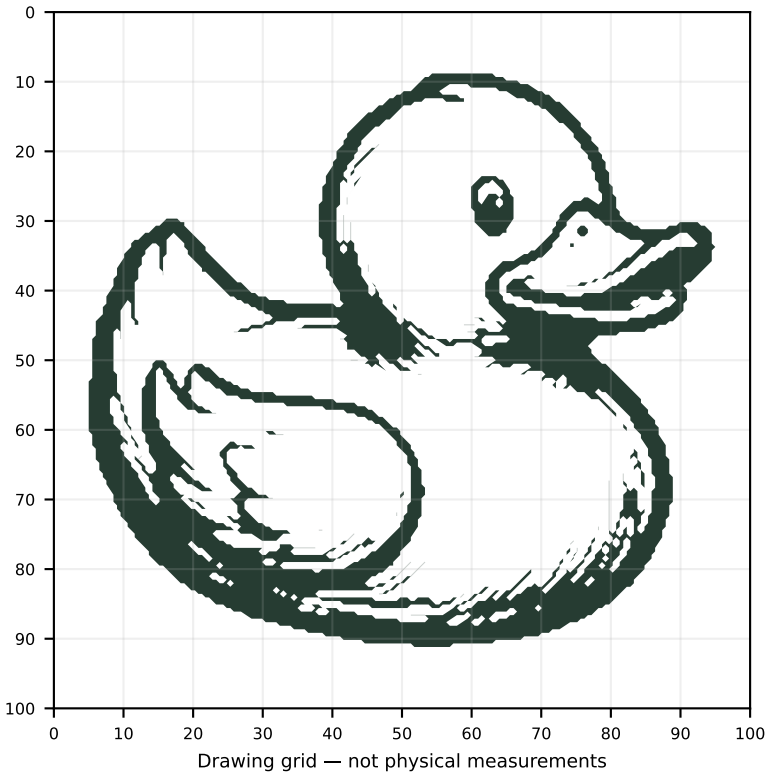

ANSWER: Example solution: preserve Large circular head contour with a small dark oval eye and a protruding beak shape extending to the right., Rounded body mass with a distinct upward-pointing tail contour on the left side., Thick dark outline defining the lower body and wing area, with internal curved lines suggesting a wing fold.. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a large circle for the head and a smaller oval for the eye.
2. Attach a horizontal, slightly curved beak shape to the right side of the head.
3. Create a large, rounded body contour below the head, extending to the left.
4. Add a pointed tail shape on the upper left of the body and a curved wing line inside the body.

ANSWER / CASE 2

rubber duck: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

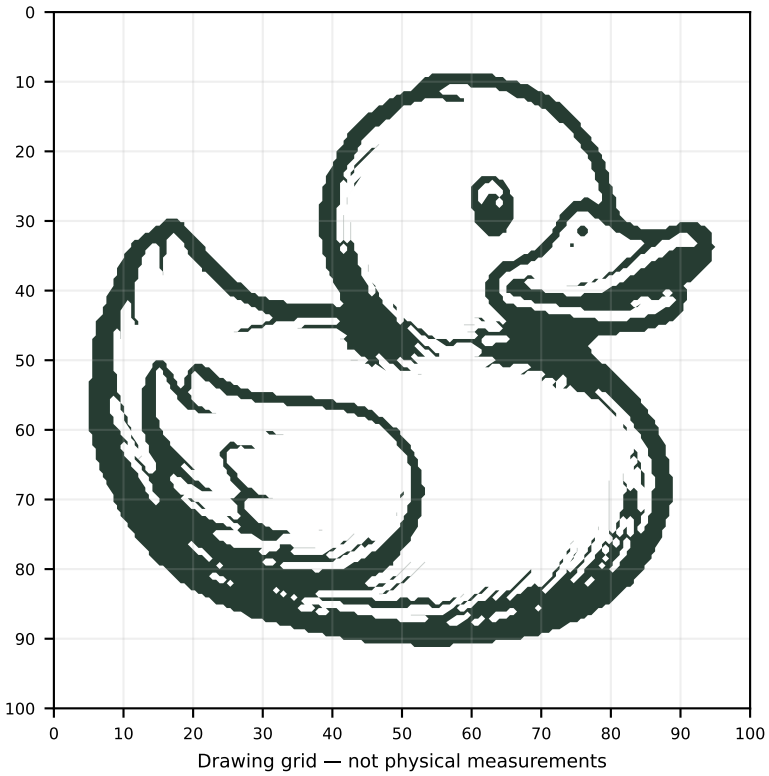

ANSWER: Example solution: preserve Large circular head contour with a small dark oval eye and a protruding beak shape extending to the right., Rounded body mass with a distinct upward-pointing tail contour on the left side., Thick dark outline defining the lower body and wing area, with internal curved lines suggesting a wing fold.. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a large circle for the head and a smaller oval for the eye.
2. Attach a horizontal, slightly curved beak shape to the right side of the head.
3. Create a large, rounded body contour below the head, extending to the left.
4. Add a pointed tail shape on the upper left of the body and a curved wing line inside the body.

ANSWER / CASE 3

rubber duck: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

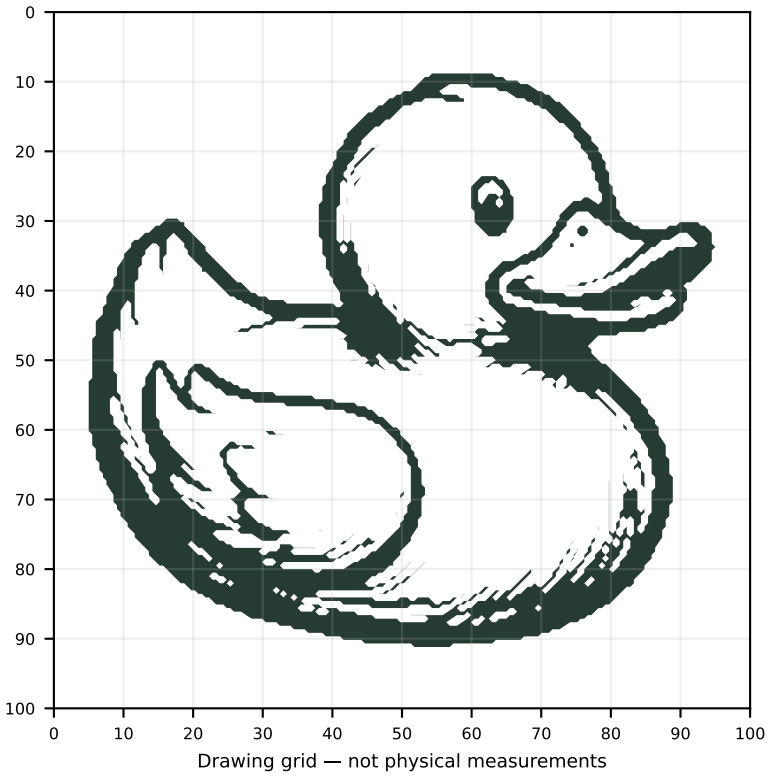

ANSWER: Example solution: preserve Large circular head contour with a small dark oval eye and a protruding beak shape extending to the right., Rounded body mass with a distinct upward-pointing tail contour on the left side., Thick dark outline defining the lower body and wing area, with internal curved lines suggesting a wing fold.. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a large circle for the head and a smaller oval for the eye.
2. Attach a horizontal, slightly curved beak shape to the right side of the head.
3. Create a large, rounded body contour below the head, extending to the left.
4. Add a pointed tail shape on the upper left of the body and a curved wing line inside the body.
