How to Draw Vault — Free Practice Sheets

ANSWER / CASE 1

vault: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

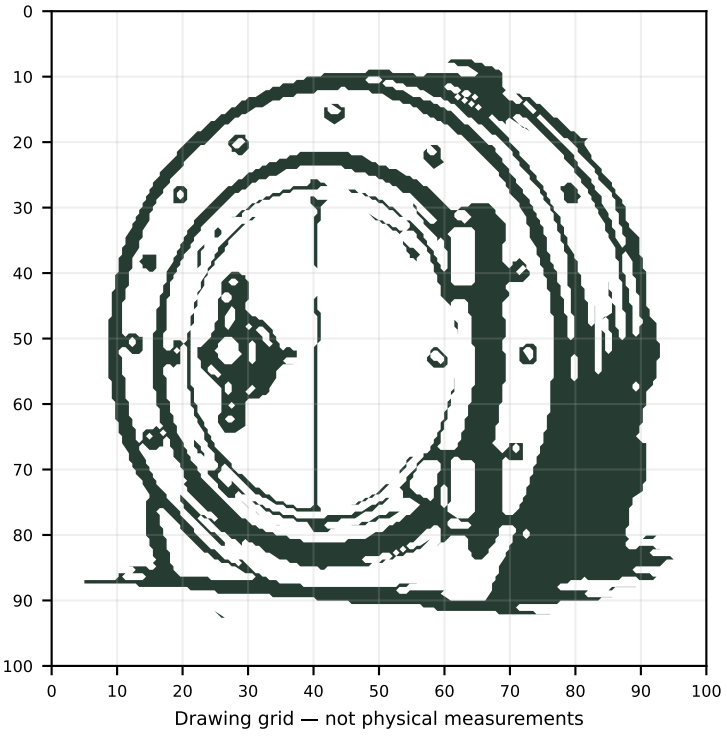

ANSWER: Example solution: preserve thick circular door with rivets around the rim, spoked handle on the left side of the door, hinged frame with two visible hinge blocks on the right. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a large circle for the door face and a slightly larger offset arc for the thick rim.
2. Add a vertical seam line down the center of the door and place the spoked handle on the left half.
3. Draw the cylindrical body behind the door as curved side arcs, then add two rectangular hinge blocks on the right edge.
4. Add rivets around the rim and a base block under the body, then outline the shadow line beneath.

How to Draw Vault — Free Practice Sheets

ANSWER / CASE 2

vault: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

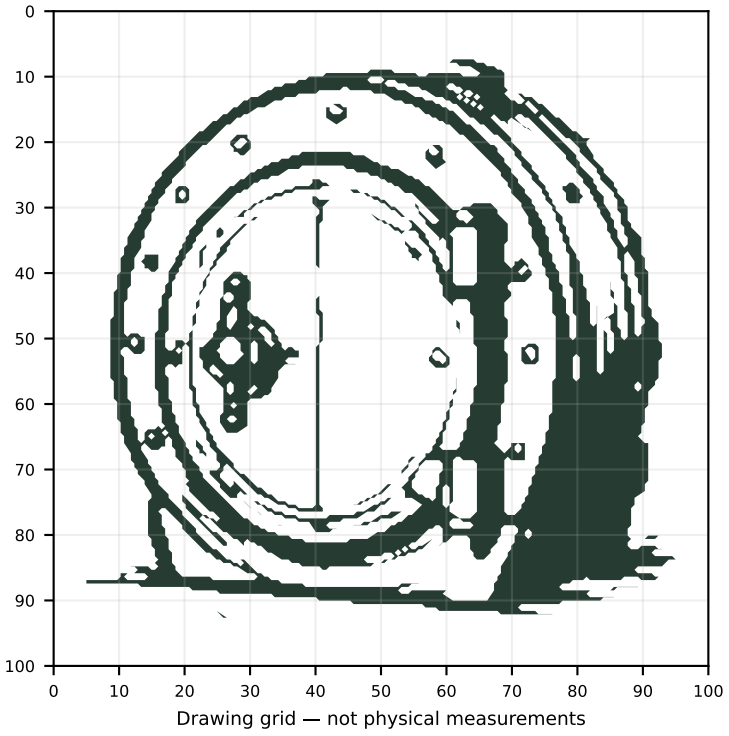

ANSWER: Example solution: preserve thick circular door with rivets around the rim, spoked handle on the left side of the door, hinged frame with two visible hinge blocks on the right. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a large circle for the door face and a slightly larger offset arc for the thick rim.
2. Add a vertical seam line down the center of the door and place the spoked handle on the left half.
3. Draw the cylindrical body behind the door as curved side arcs, then add two rectangular hinge blocks on the right edge.
4. Add rivets around the rim and a base block under the body, then outline the shadow line beneath.

ANSWER / CASE 3

vault: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

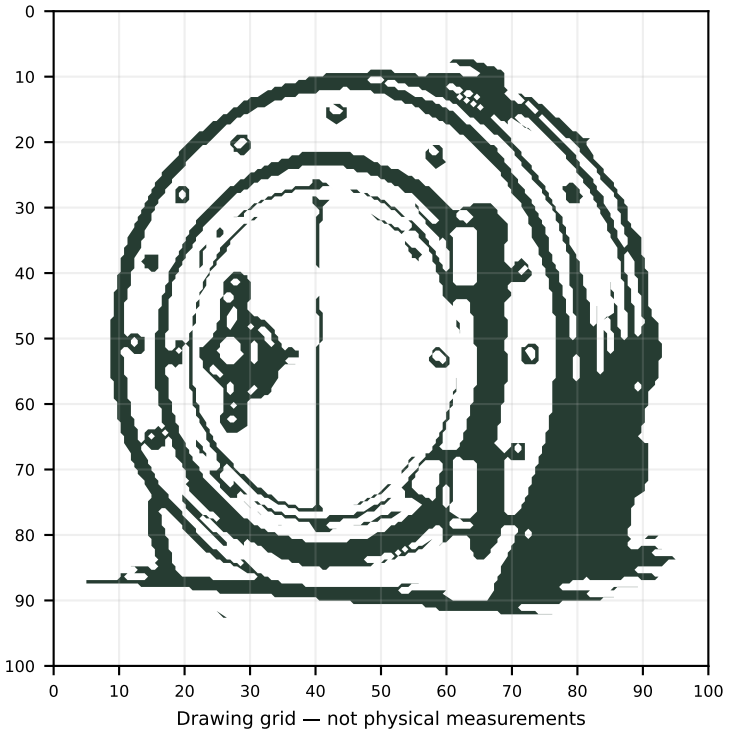

ANSWER: Example solution: preserve thick circular door with rivets around the rim, spoked handle on the left side of the door, hinged frame with two visible hinge blocks on the right. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a large circle for the door face and a slightly larger offset arc for the thick rim.
2. Add a vertical seam line down the center of the door and place the spoked handle on the left half.
3. Draw the cylindrical body behind the door as curved side arcs, then add two rectangular hinge blocks on the right edge.
4. Add rivets around the rim and a base block under the body, then outline the shadow line beneath.

How to Draw Vault — Free Practice Sheets

ANSWER / CASE 4

vault: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve thick circular door with rivets around the rim, spoked handle on the left side of the door, hinged frame with two visible hinge blocks on the right. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a large circle for the door face and a slightly larger offset arc for the thick rim.
2. Add a vertical seam line down the center of the door and place the spoked handle on the left half.
3. Draw the cylindrical body behind the door as curved side arcs, then add two rectangular hinge blocks on the right edge.
4. Add rivets around the rim and a base block under the body, then outline the shadow line beneath.
