How to Draw Magnet — Free Practice Sheets

ANSWER / CASE 1

magnet: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

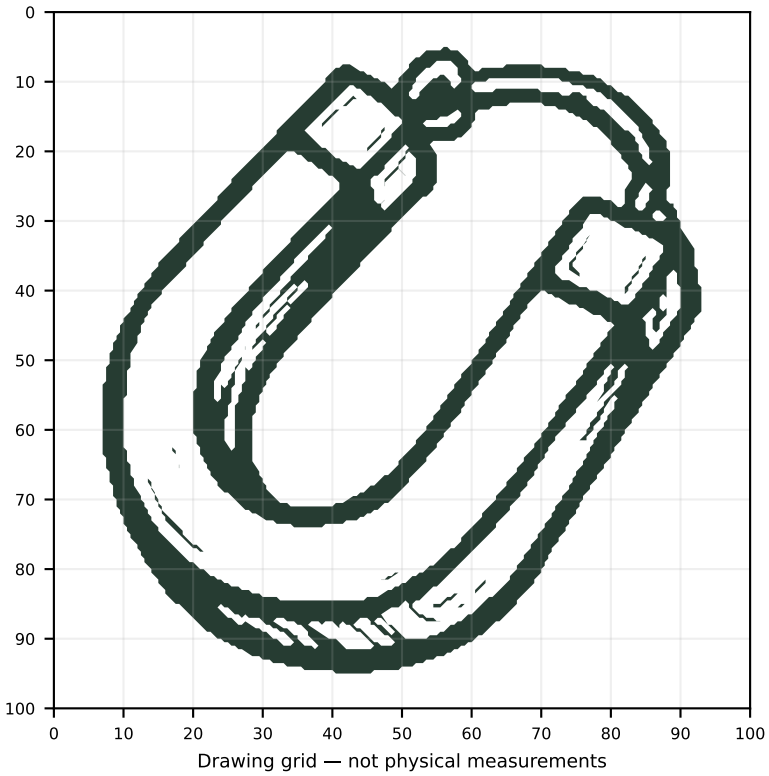

ANSWER: Example solution: preserve U-shaped curved body, two rectangular pole end caps, small loop/ring at the top connecting the poles. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a thick U-shaped curved band for the magnet body.
2. Add two rectangular blocks at the open ends to represent the poles.
3. Draw a small loop or ring at the top between the pole tips.
4. Outline the entire shape with bold lines and add simple shading strokes along the curve.

How to Draw Magnet — Free Practice Sheets

ANSWER / CASE 2

magnet: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

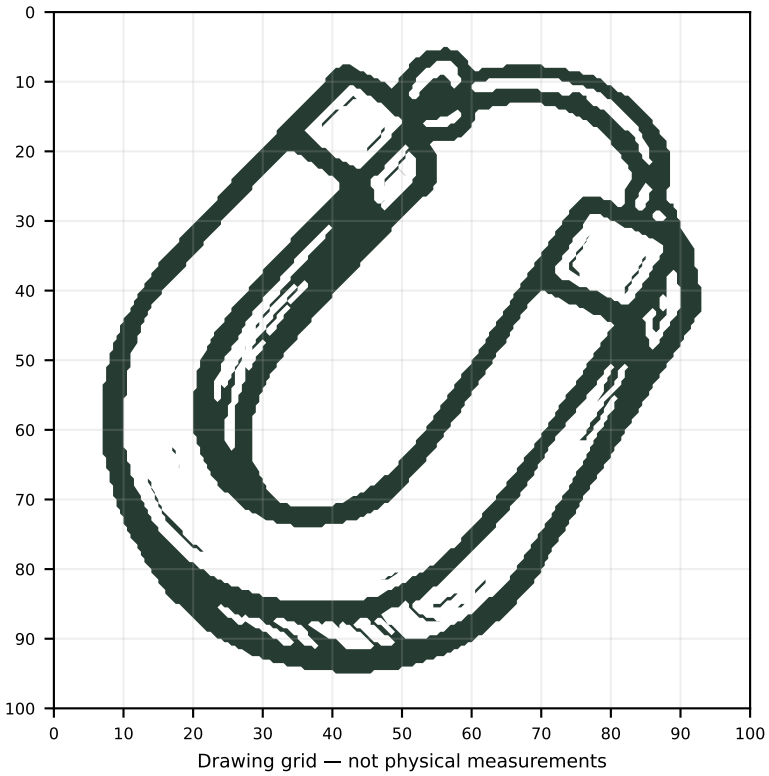

ANSWER: Example solution: preserve U-shaped curved body, two rectangular pole end caps, small loop/ring at the top connecting the poles. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a thick U-shaped curved band for the magnet body.
2. Add two rectangular blocks at the open ends to represent the poles.
3. Draw a small loop or ring at the top between the pole tips.
4. Outline the entire shape with bold lines and add simple shading strokes along the curve.

How to Draw Magnet — Free Practice Sheets

ANSWER / CASE 3

magnet: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

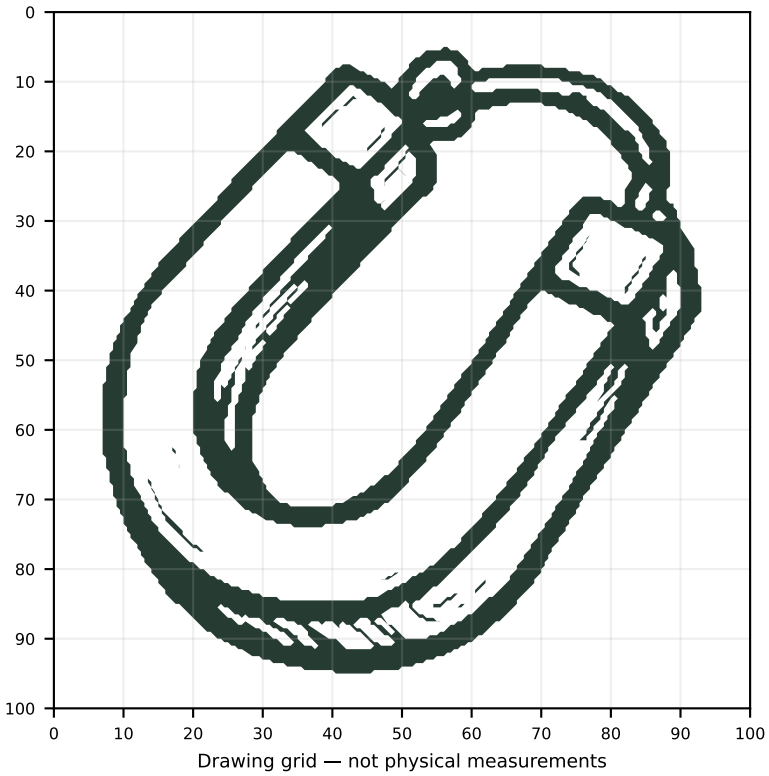

ANSWER: Example solution: preserve U-shaped curved body, two rectangular pole end caps, small loop/ring at the top connecting the poles. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a thick U-shaped curved band for the magnet body.
2. Add two rectangular blocks at the open ends to represent the poles.
3. Draw a small loop or ring at the top between the pole tips.
4. Outline the entire shape with bold lines and add simple shading strokes along the curve.

How to Draw Magnet — Free Practice Sheets

ANSWER / CASE 4

magnet: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve U-shaped curved body, two rectangular pole end caps, small loop/ring at the top connecting the poles. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a thick U-shaped curved band for the magnet body.
2. Add two rectangular blocks at the open ends to represent the poles.
3. Draw a small loop or ring at the top between the pole tips.
4. Outline the entire shape with bold lines and add simple shading strokes along the curve.
