How to Draw Toothbrush — Free Practice Sheets

ANSWER / CASE 1

toothbrush: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

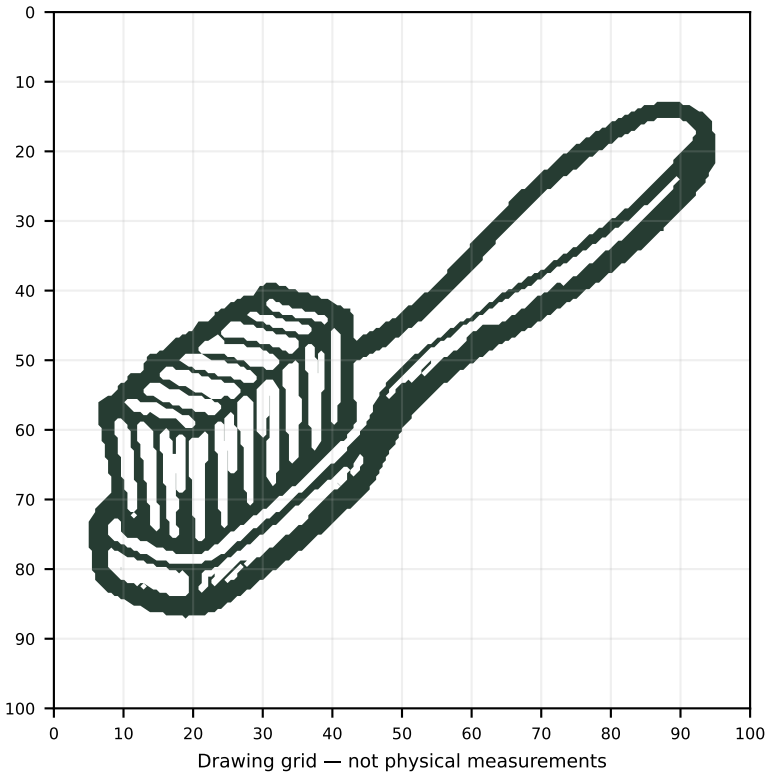

ANSWER: Example solution: preserve long tapered handle with a rounded end, rectangular bristle head with parallel vertical bristle lines, angled neck connecting the handle to the head. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the long handle as an elongated rounded outline, wider at the grip and tapering toward the neck.
2. Add the angled neck by extending the handle outline into a short curved transition toward the head.
3. Draw the rectangular head base at the end of the neck, with a slightly rounded lower edge.
4. Add the bristles as a block of parallel vertical lines rising from the head, then outline the bristle mass.

ANSWER / CASE 2

toothbrush: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

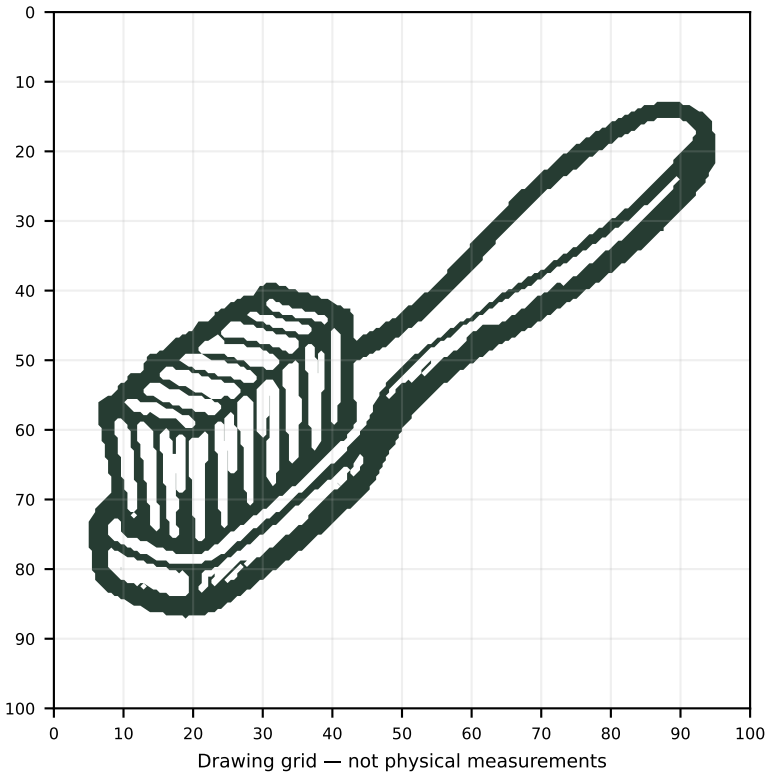

ANSWER: Example solution: preserve long tapered handle with a rounded end, rectangular bristle head with parallel vertical bristle lines, angled neck connecting the handle to the head. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the long handle as an elongated rounded outline, wider at the grip and tapering toward the neck.
2. Add the angled neck by extending the handle outline into a short curved transition toward the head.
3. Draw the rectangular head base at the end of the neck, with a slightly rounded lower edge.
4. Add the bristles as a block of parallel vertical lines rising from the head, then outline the bristle mass.

ANSWER / CASE 3

toothbrush: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

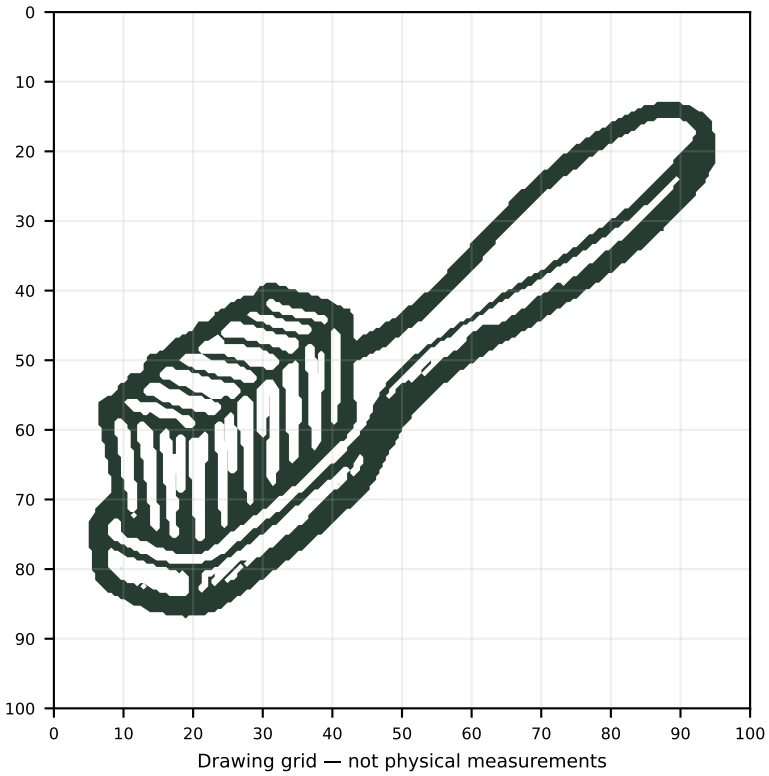

ANSWER: Example solution: preserve long tapered handle with a rounded end, rectangular bristle head with parallel vertical bristle lines, angled neck connecting the handle to the head. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the long handle as an elongated rounded outline, wider at the grip and tapering toward the neck.
2. Add the angled neck by extending the handle outline into a short curved transition toward the head.
3. Draw the rectangular head base at the end of the neck, with a slightly rounded lower edge.
4. Add the bristles as a block of parallel vertical lines rising from the head, then outline the bristle mass.

How to Draw Toothbrush — Free Practice Sheets

ANSWER / CASE 4

toothbrush: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve long tapered handle with a rounded end, rectangular bristle head with parallel vertical bristle lines, angled neck connecting the handle to the head. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the long handle as an elongated rounded outline, wider at the grip and tapering toward the neck.
2. Add the angled neck by extending the handle outline into a short curved transition toward the head.
3. Draw the rectangular head base at the end of the neck, with a slightly rounded lower edge.
4. Add the bristles as a block of parallel vertical lines rising from the head, then outline the bristle mass.
