How to Draw Domino — Free Practice Sheets

ANSWER / CASE 1

domino: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

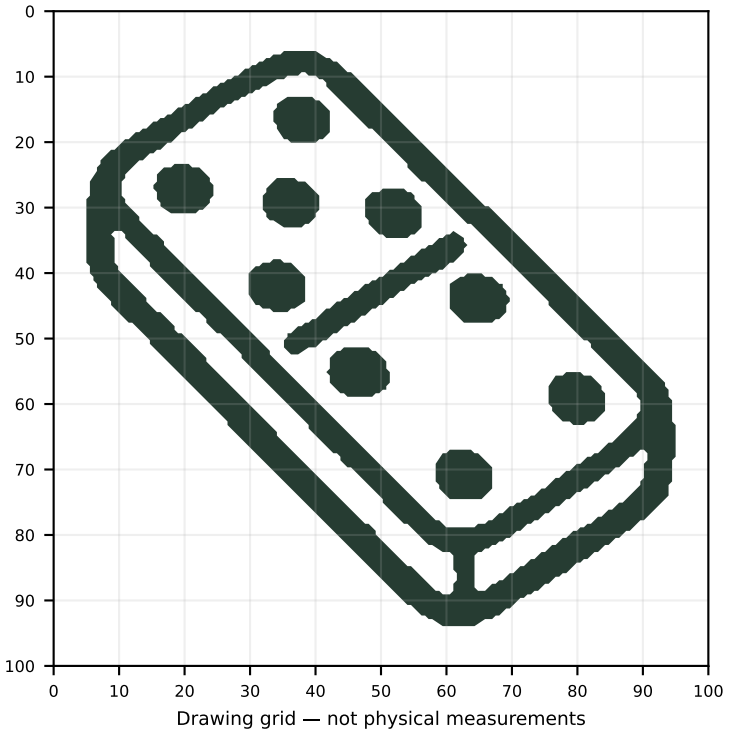

ANSWER: Example solution: preserve rectangular tile with rounded corners, a diagonal dividing line across the middle creating two halves, black dot patterns on each half (five dots on one side, four on the other). Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a rounded rectangle tilted diagonally to form the domino face.
2. Add a parallel offset outline along the lower edge to show the tile's thickness.
3. Draw a straight dividing line across the middle of the top face, splitting it into two halves.
4. Place dot patterns in each half: five dots arranged in a quincunx on the upper half and four dots in a square pattern on the lower half.

How to Draw Domino — Free Practice Sheets

ANSWER / CASE 2

domino: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

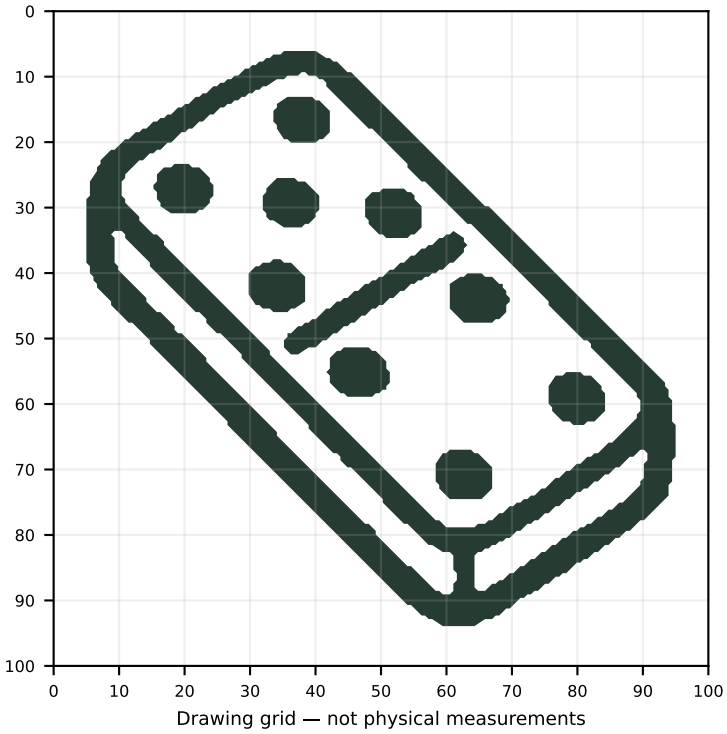

ANSWER: Example solution: preserve rectangular tile with rounded corners, a diagonal dividing line across the middle creating two halves, black dot patterns on each half (five dots on one side, four on the other). Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a rounded rectangle tilted diagonally to form the domino face.
2. Add a parallel offset outline along the lower edge to show the tile's thickness.
3. Draw a straight dividing line across the middle of the top face, splitting it into two halves.
4. Place dot patterns in each half: five dots arranged in a quincunx on the upper half and four dots in a square pattern on the lower half.

ANSWER / CASE 3

domino: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

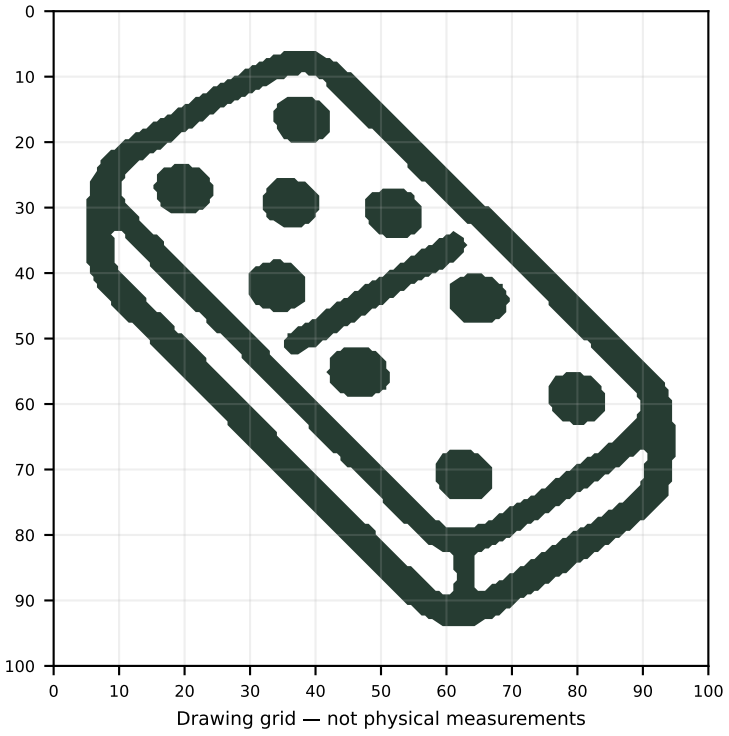

ANSWER: Example solution: preserve rectangular tile with rounded corners, a diagonal dividing line across the middle creating two halves, black dot patterns on each half (five dots on one side, four on the other). Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a rounded rectangle tilted diagonally to form the domino face.
2. Add a parallel offset outline along the lower edge to show the tile's thickness.
3. Draw a straight dividing line across the middle of the top face, splitting it into two halves.
4. Place dot patterns in each half: five dots arranged in a quincunx on the upper half and four dots in a square pattern on the lower half.

How to Draw Domino — Free Practice Sheets

ANSWER / CASE 4

domino: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve rectangular tile with rounded corners, a diagonal dividing line across the middle creating two halves, black dot patterns on each half (five dots on one side, four on the other). Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a rounded rectangle tilted diagonally to form the domino face.
2. Add a parallel offset outline along the lower edge to show the tile's thickness.
3. Draw a straight dividing line across the middle of the top face, splitting it into two halves.
4. Place dot patterns in each half: five dots arranged in a quincunx on the upper half and four dots in a square pattern on the lower half.
