How to Draw Radiator — Free Practice Sheets

REFERENCE / CASE 1

radiator: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

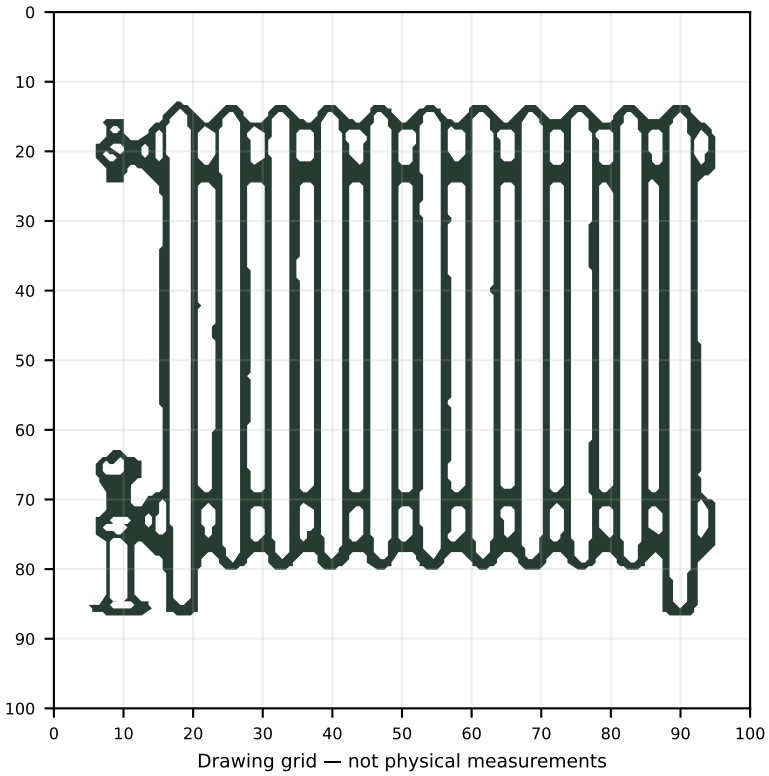

METHOD: Draw a horizontal top pipe and a parallel horizontal bottom pipe to set the radiator's width. Draw a series of evenly spaced vertical fins between the top and bottom pipes, giving each fin a rounded top and bottom. Add the small valve/pipe fitting at the lower left and the small fitting at the upper left. Outline the whole silhouette with clean lines and erase interior construction marks.
Use the separate practice sheet before checking the answer.

How to Draw Radiator — Free Practice Sheets

REFERENCE / CASE 2

radiator: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

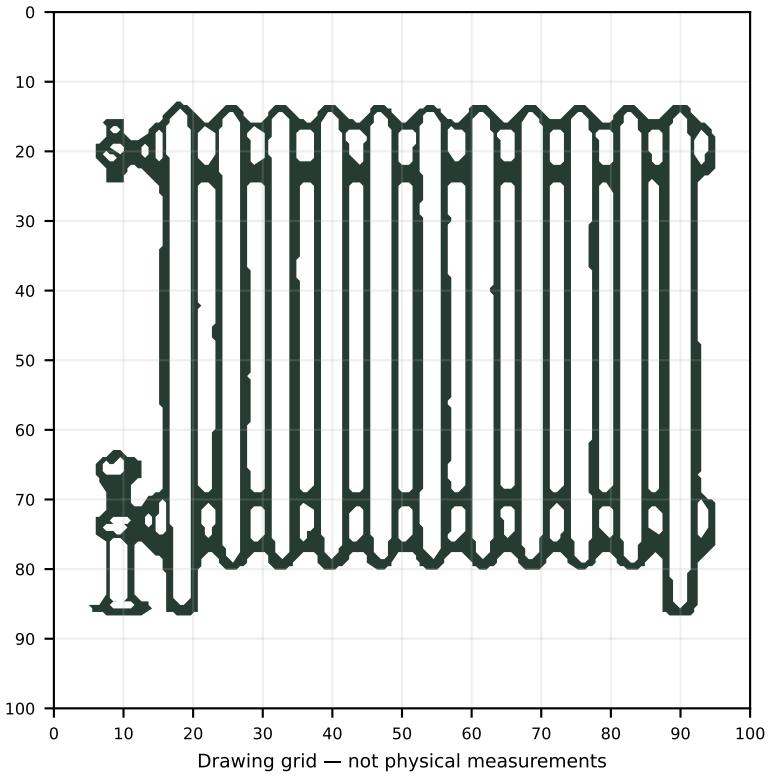

METHOD: Draw a horizontal top pipe and a parallel horizontal bottom pipe to set the radiator's width. Draw a series of evenly spaced vertical fins between the top and bottom pipes, giving each fin a rounded top and bottom. Add the small valve/pipe fitting at the lower left and the small fitting at the upper left. Outline the whole silhouette with clean lines and erase interior construction marks.
Use the separate practice sheet before checking the answer.

How to Draw Radiator — Free Practice Sheets

REFERENCE / CASE 3

radiator: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

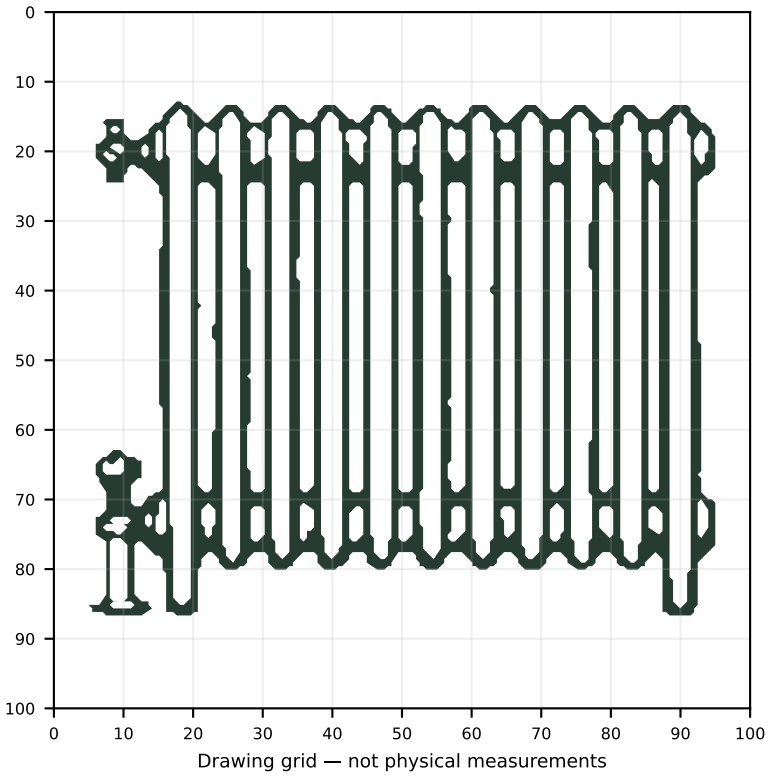

METHOD: Draw a horizontal top pipe and a parallel horizontal bottom pipe to set the radiator's width. Draw a series of evenly spaced vertical fins between the top and bottom pipes, giving each fin a rounded top and bottom. Add the small valve/pipe fitting at the lower left and the small fitting at the upper left. Outline the whole silhouette with clean lines and erase interior construction marks.
Use the separate practice sheet before checking the answer.

How to Draw Radiator — Free Practice Sheets

REFERENCE / CASE 4

radiator: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

METHOD: Draw a horizontal top pipe and a parallel horizontal bottom pipe to set the radiator's width. Draw a series of evenly spaced vertical fins between the top and bottom pipes, giving each fin a rounded top and bottom. Add the small valve/pipe fitting at the lower left and the small fitting at the upper left. Outline the whole silhouette with clean lines and erase interior construction marks.
Use the separate practice sheet before checking the answer.
