How to Draw Windshield — Free Practice Sheets

ANSWER / CASE 1

windshield: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

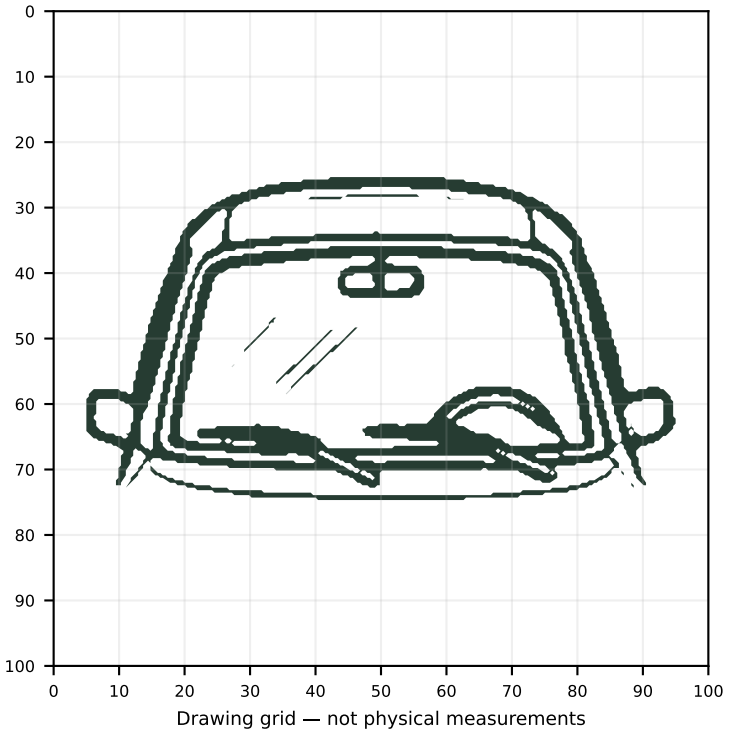

ANSWER: Example solution: preserve curved glass panel with rounded top corners, thick frame border surrounding the glass, two wiper blades resting near the bottom edge. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a wide rounded rectangle for the outer windshield frame, slightly wider at the bottom.
2. Inside the frame, draw a second parallel line to create the thick border around the glass panel.
3. Add a small rounded rectangle at the top center of the glass for the rearview mirror.
4. Draw two angled wiper blades along the lower portion of the glass, overlapping slightly, and add small side mirror shapes at the outer edges.

How to Draw Windshield — Free Practice Sheets

ANSWER / CASE 2

windshield: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

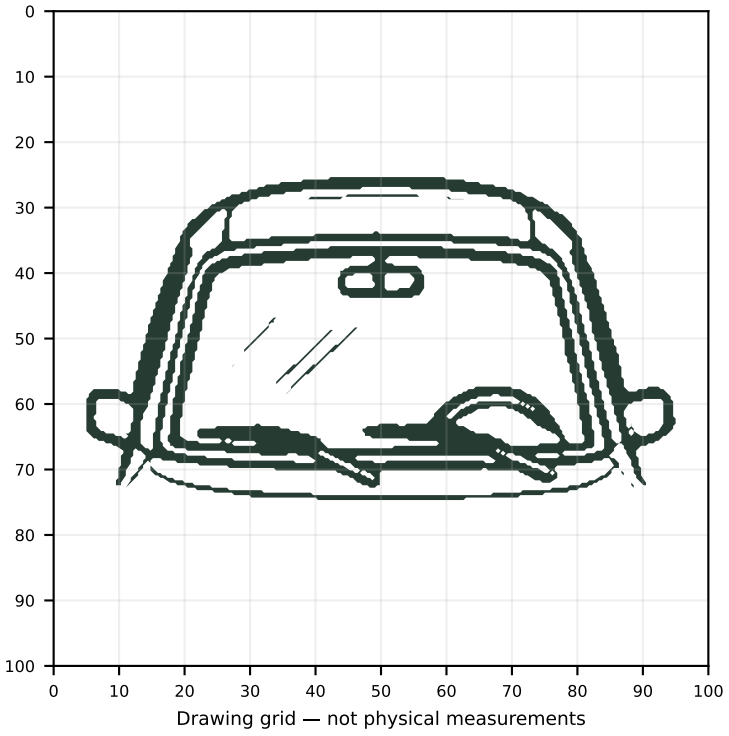

ANSWER: Example solution: preserve curved glass panel with rounded top corners, thick frame border surrounding the glass, two wiper blades resting near the bottom edge. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a wide rounded rectangle for the outer windshield frame, slightly wider at the bottom.
2. Inside the frame, draw a second parallel line to create the thick border around the glass panel.
3. Add a small rounded rectangle at the top center of the glass for the rearview mirror.
4. Draw two angled wiper blades along the lower portion of the glass, overlapping slightly, and add small side mirror shapes at the outer edges.

ANSWER / CASE 3

windshield: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

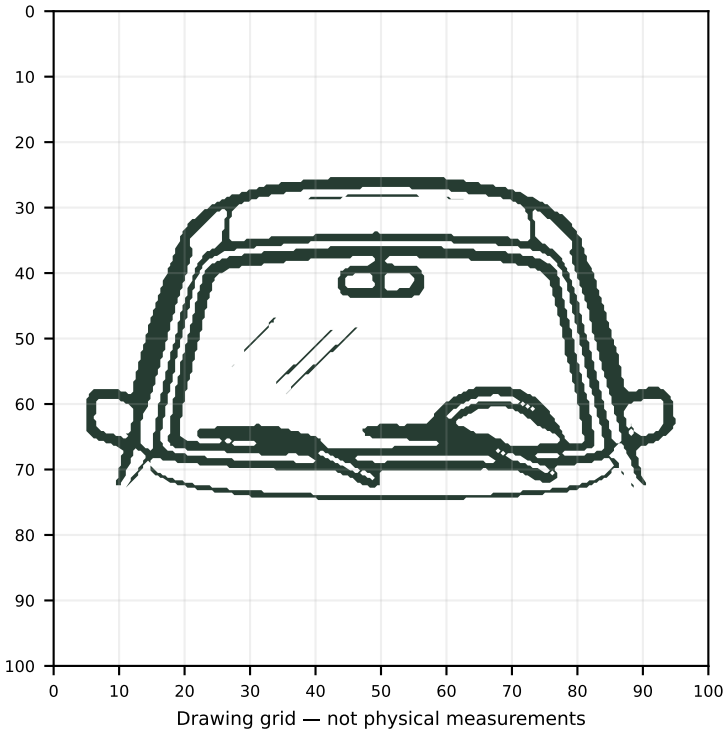

ANSWER: Example solution: preserve curved glass panel with rounded top corners, thick frame border surrounding the glass, two wiper blades resting near the bottom edge. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a wide rounded rectangle for the outer windshield frame, slightly wider at the bottom.
2. Inside the frame, draw a second parallel line to create the thick border around the glass panel.
3. Add a small rounded rectangle at the top center of the glass for the rearview mirror.
4. Draw two angled wiper blades along the lower portion of the glass, overlapping slightly, and add small side mirror shapes at the outer edges.

How to Draw Windshield — Free Practice Sheets

ANSWER / CASE 4

windshield: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve curved glass panel with rounded top corners, thick frame border surrounding the glass, two wiper blades resting near the bottom edge. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a wide rounded rectangle for the outer windshield frame, slightly wider at the bottom.
2. Inside the frame, draw a second parallel line to create the thick border around the glass panel.
3. Add a small rounded rectangle at the top center of the glass for the rearview mirror.
4. Draw two angled wiper blades along the lower portion of the glass, overlapping slightly, and add small side mirror shapes at the outer edges.
