How to Draw Oar — Free Practice Sheets

ANSWER / CASE 1

oar: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

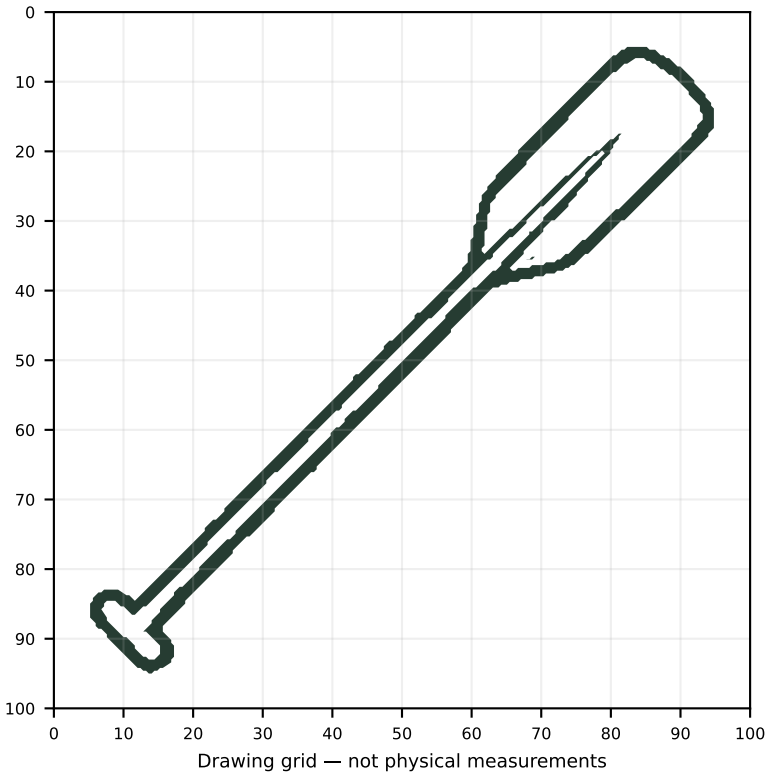

ANSWER: Example solution: preserve long straight shaft running diagonally, flat rectangular blade at the upper end, T-shaped handle grip at the lower end. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long straight double line for the shaft at a diagonal angle.
2. At the top end, widen the shaft into a flat rectangular blade with rounded corners.
3. Add a pointed line inside the blade to suggest its flat surface.
4. At the bottom end, draw a short perpendicular bar to form the T-shaped handle grip.

How to Draw Oar — Free Practice Sheets

ANSWER / CASE 2

oar: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

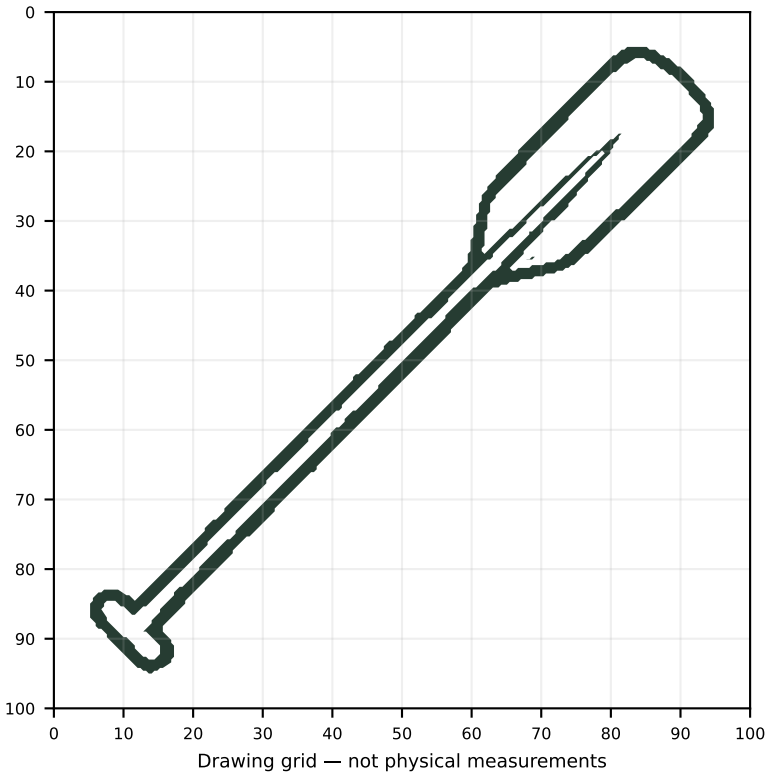

ANSWER: Example solution: preserve long straight shaft running diagonally, flat rectangular blade at the upper end, T-shaped handle grip at the lower end. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long straight double line for the shaft at a diagonal angle.
2. At the top end, widen the shaft into a flat rectangular blade with rounded corners.
3. Add a pointed line inside the blade to suggest its flat surface.
4. At the bottom end, draw a short perpendicular bar to form the T-shaped handle grip.

ANSWER / CASE 3

oar: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

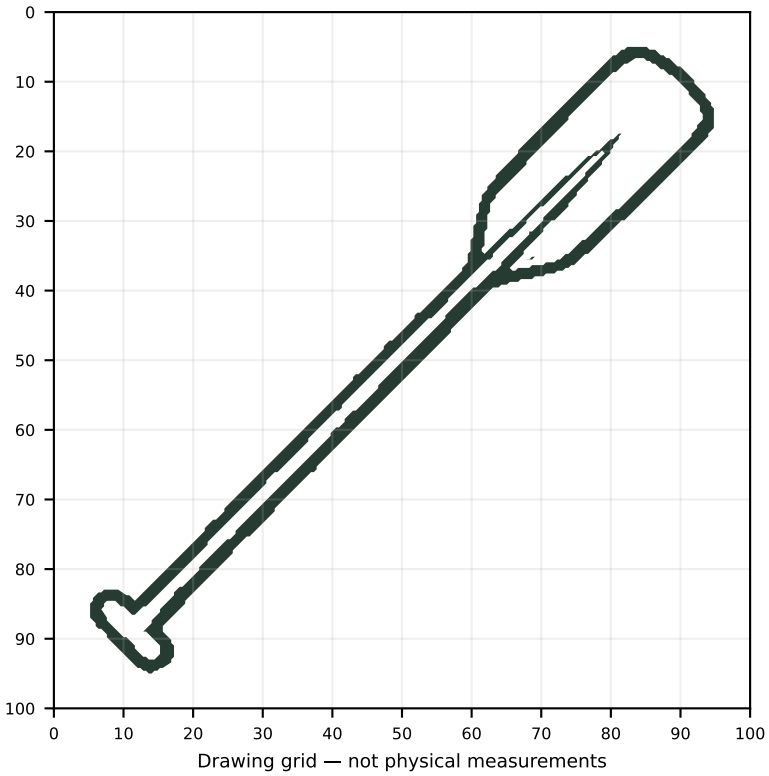

ANSWER: Example solution: preserve long straight shaft running diagonally, flat rectangular blade at the upper end, T-shaped handle grip at the lower end. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long straight double line for the shaft at a diagonal angle.
2. At the top end, widen the shaft into a flat rectangular blade with rounded corners.
3. Add a pointed line inside the blade to suggest its flat surface.
4. At the bottom end, draw a short perpendicular bar to form the T-shaped handle grip.

How to Draw Oar — Free Practice Sheets

ANSWER / CASE 4

oar: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve long straight shaft running diagonally, flat rectangular blade at the upper end, T-shaped handle grip at the lower end. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long straight double line for the shaft at a diagonal angle.
2. At the top end, widen the shaft into a flat rectangular blade with rounded corners.
3. Add a pointed line inside the blade to suggest its flat surface.
4. At the bottom end, draw a short perpendicular bar to form the T-shaped handle grip.
