How to Draw Mangrove — Free Practice Sheets

REFERENCE / CASE 1

mangrove: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

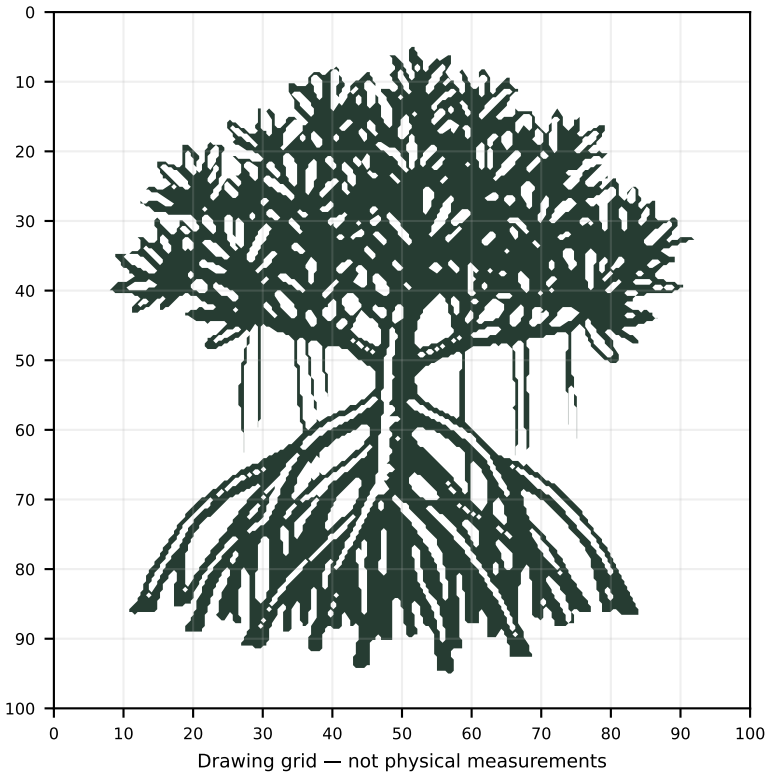

METHOD: Draw a central twisted trunk that forks into several upward branches. Add a dense rounded canopy of clustered elongated leaves around the branch tips. Draw arching stilt roots radiating outward and downward from the base of the trunk. Add thin hanging aerial roots descending from the branches into the root zone.
Use the separate practice sheet before checking the answer.

How to Draw Mangrove — Free Practice Sheets

REFERENCE / CASE 2

mangrove: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

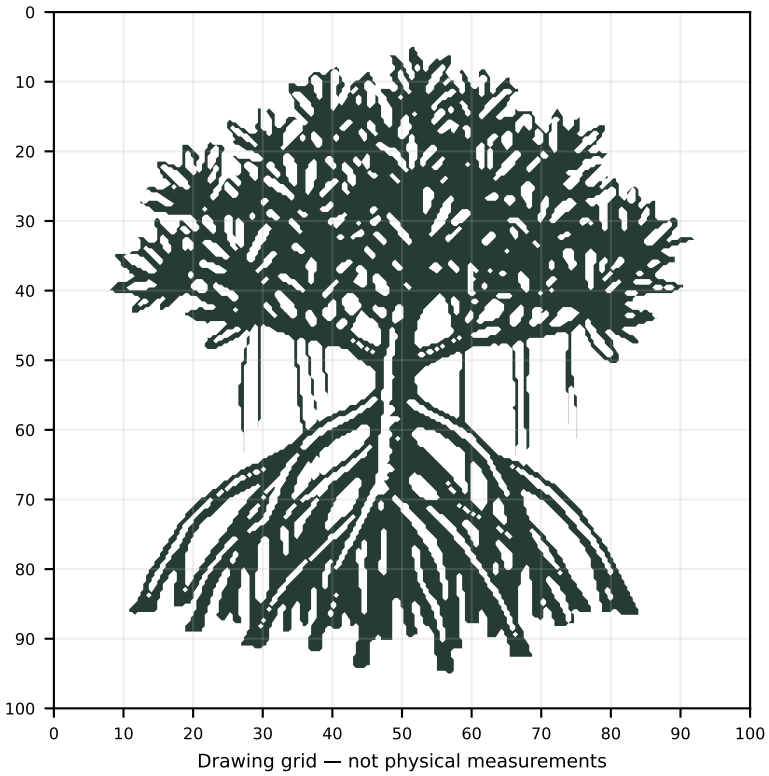

METHOD: Draw a central twisted trunk that forks into several upward branches. Add a dense rounded canopy of clustered elongated leaves around the branch tips. Draw arching stilt roots radiating outward and downward from the base of the trunk. Add thin hanging aerial roots descending from the branches into the root zone.
Use the separate practice sheet before checking the answer.

How to Draw Mangrove — Free Practice Sheets

REFERENCE / CASE 3

mangrove: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

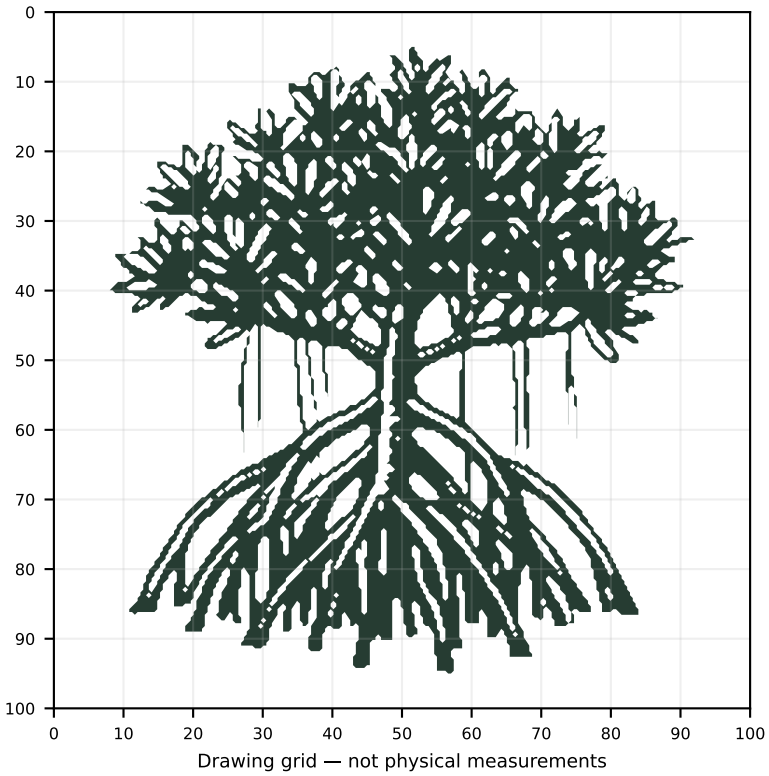

METHOD: Draw a central twisted trunk that forks into several upward branches. Add a dense rounded canopy of clustered elongated leaves around the branch tips. Draw arching stilt roots radiating outward and downward from the base of the trunk. Add thin hanging aerial roots descending from the branches into the root zone.
Use the separate practice sheet before checking the answer.

How to Draw Mangrove — Free Practice Sheets

REFERENCE / CASE 4

mangrove: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

METHOD: Draw a central twisted trunk that forks into several upward branches. Add a dense rounded canopy of clustered elongated leaves around the branch tips. Draw arching stilt roots radiating outward and downward from the base of the trunk. Add thin hanging aerial roots descending from the branches into the root zone.
Use the separate practice sheet before checking the answer.
