How to Draw Water Lily — Free Practice Sheets

ANSWER / CASE 1

water lily: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

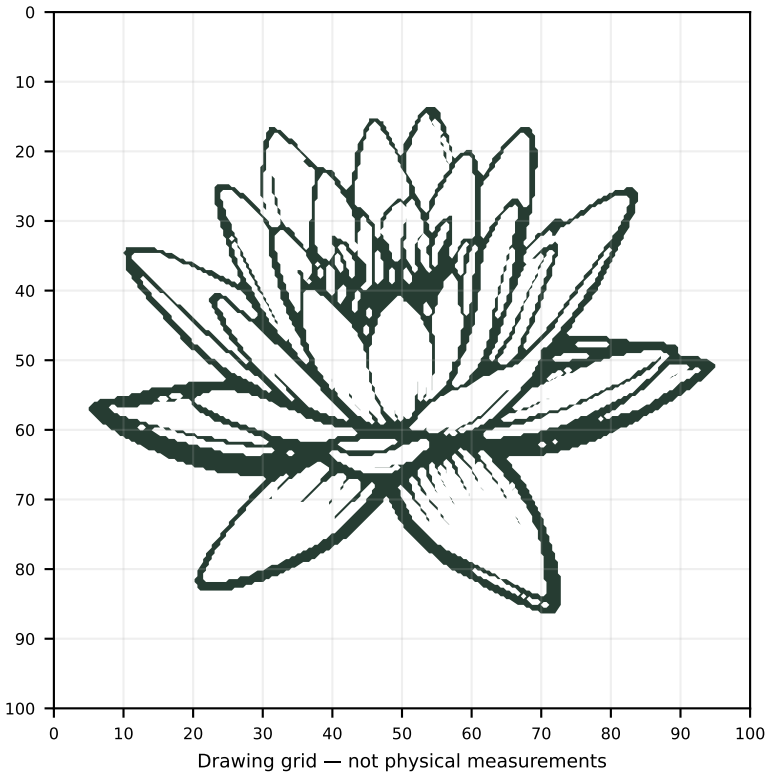

ANSWER: Example solution: preserve layered pointed petals radiating from a central cluster, central stamen area with small pointed structures, broad rounded outer petals forming a base. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a small central oval to mark the stamen cluster.
2. Add a ring of short pointed petals around the center, then layer progressively longer pointed petals outward.
3. Draw broad rounded outer petals at the base, overlapping the inner layers.
4. Add a rounded floating pad shape behind the flower and outline the petals with clean contour lines.

How to Draw Water Lily — Free Practice Sheets

ANSWER / CASE 2

water lily: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

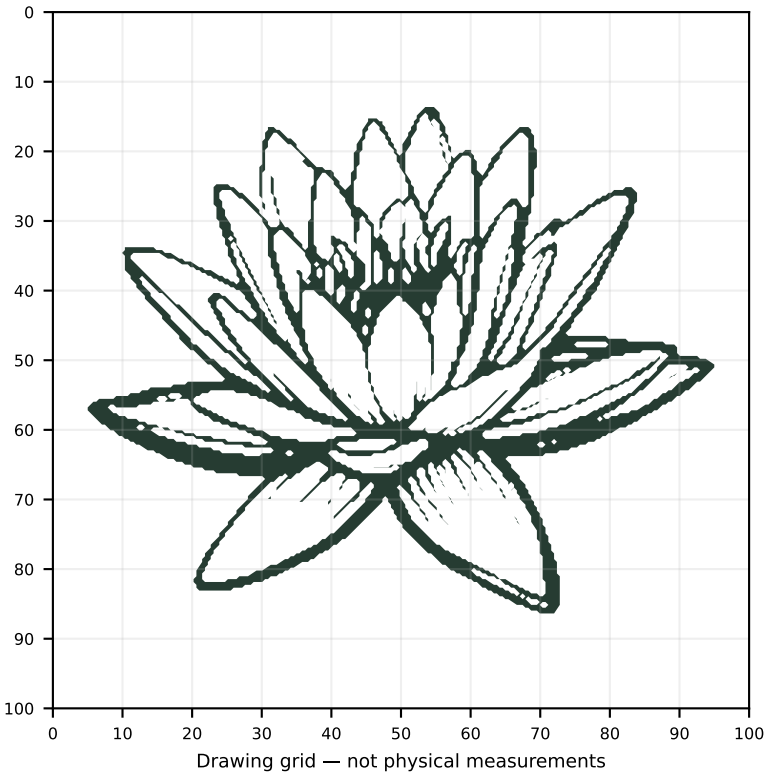

ANSWER: Example solution: preserve layered pointed petals radiating from a central cluster, central stamen area with small pointed structures, broad rounded outer petals forming a base. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a small central oval to mark the stamen cluster.
2. Add a ring of short pointed petals around the center, then layer progressively longer pointed petals outward.
3. Draw broad rounded outer petals at the base, overlapping the inner layers.
4. Add a rounded floating pad shape behind the flower and outline the petals with clean contour lines.

How to Draw Water Lily — Free Practice Sheets

ANSWER / CASE 3

water lily: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

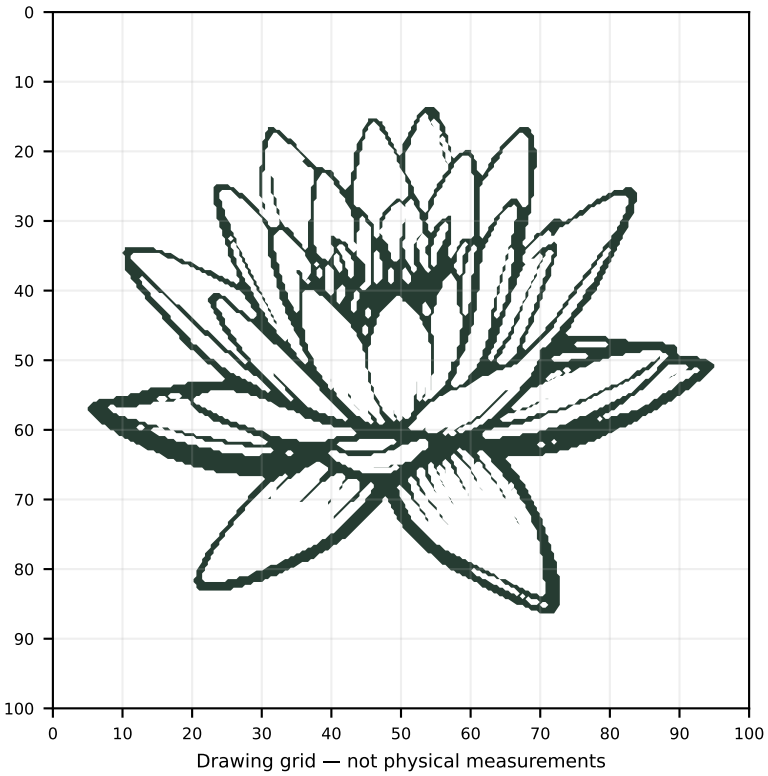

ANSWER: Example solution: preserve layered pointed petals radiating from a central cluster, central stamen area with small pointed structures, broad rounded outer petals forming a base. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a small central oval to mark the stamen cluster.
2. Add a ring of short pointed petals around the center, then layer progressively longer pointed petals outward.
3. Draw broad rounded outer petals at the base, overlapping the inner layers.
4. Add a rounded floating pad shape behind the flower and outline the petals with clean contour lines.

How to Draw Water Lily — Free Practice Sheets

ANSWER / CASE 4

water lily: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve layered pointed petals radiating from a central cluster, central stamen area with small pointed structures, broad rounded outer petals forming a base. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a small central oval to mark the stamen cluster.
2. Add a ring of short pointed petals around the center, then layer progressively longer pointed petals outward.
3. Draw broad rounded outer petals at the base, overlapping the inner layers.
4. Add a rounded floating pad shape behind the flower and outline the petals with clean contour lines.
