How to Draw Papaya Tree — Free Practice Sheets

ANSWER / CASE 1

papaya tree: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

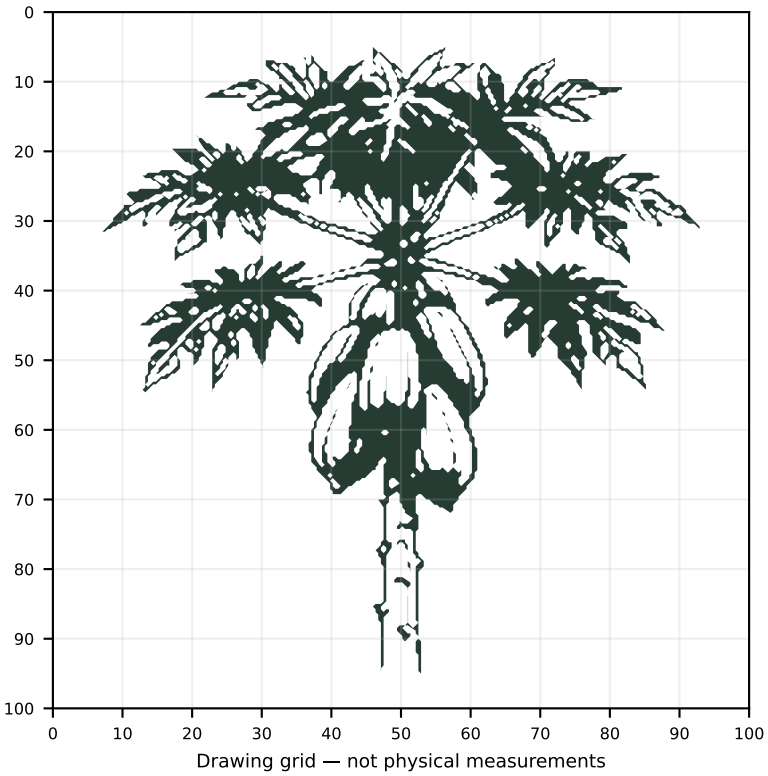

ANSWER: Example solution: preserve large deeply lobed palmate leaves radiating from long stalks at the top, single slender vertical trunk with visible leaf-base scars, cluster of large oval fruit hanging just below the leaf crown. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a single vertical trunk line with small horizontal scar marks along its length.
2. At the top of the trunk, draw a central junction and radiate several long leaf stalks outward.
3. Attach large palmate, deeply lobed leaf blades to the ends of the stalks.
4. Below the leaf crown, draw a tight cluster of overlapping oval fruit attached to the upper trunk.

ANSWER / CASE 2

papaya tree: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

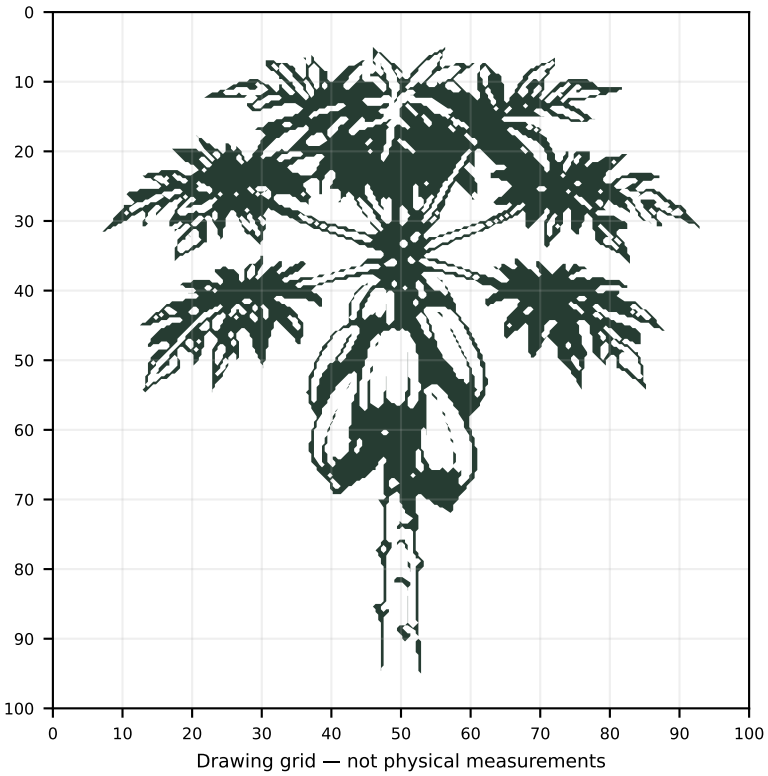

ANSWER: Example solution: preserve large deeply lobed palmate leaves radiating from long stalks at the top, single slender vertical trunk with visible leaf-base scars, cluster of large oval fruit hanging just below the leaf crown. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a single vertical trunk line with small horizontal scar marks along its length.
2. At the top of the trunk, draw a central junction and radiate several long leaf stalks outward.
3. Attach large palmate, deeply lobed leaf blades to the ends of the stalks.
4. Below the leaf crown, draw a tight cluster of overlapping oval fruit attached to the upper trunk.

ANSWER / CASE 3

papaya tree: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

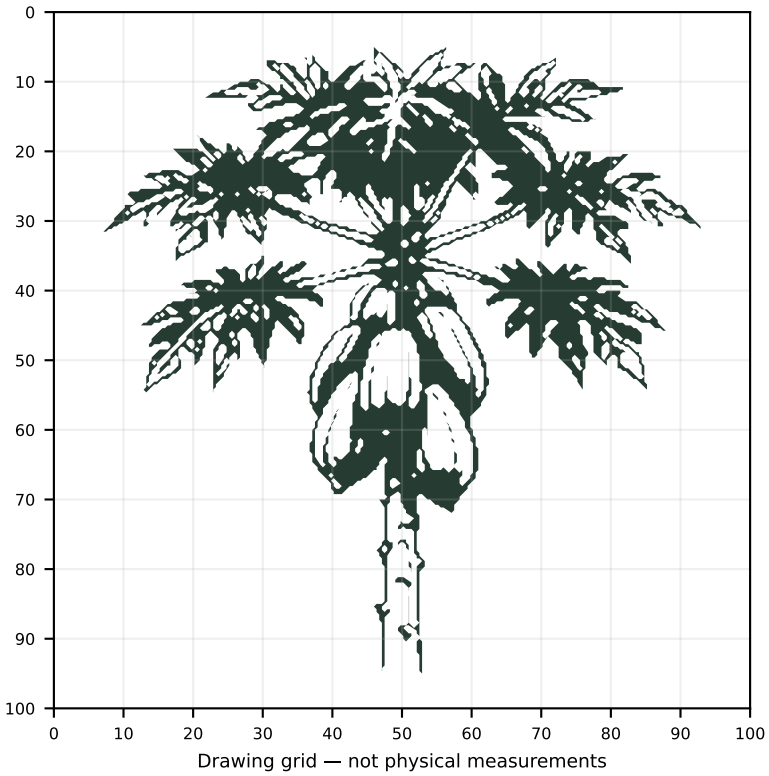

ANSWER: Example solution: preserve large deeply lobed palmate leaves radiating from long stalks at the top, single slender vertical trunk with visible leaf-base scars, cluster of large oval fruit hanging just below the leaf crown. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a single vertical trunk line with small horizontal scar marks along its length.
2. At the top of the trunk, draw a central junction and radiate several long leaf stalks outward.
3. Attach large palmate, deeply lobed leaf blades to the ends of the stalks.
4. Below the leaf crown, draw a tight cluster of overlapping oval fruit attached to the upper trunk.

How to Draw Papaya Tree — Free Practice Sheets

ANSWER / CASE 4

papaya tree: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve large deeply lobed palmate leaves radiating from long stalks at the top, single slender vertical trunk with visible leaf-base scars, cluster of large oval fruit hanging just below the leaf crown. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a single vertical trunk line with small horizontal scar marks along its length.
2. At the top of the trunk, draw a central junction and radiate several long leaf stalks outward.
3. Attach large palmate, deeply lobed leaf blades to the ends of the stalks.
4. Below the leaf crown, draw a tight cluster of overlapping oval fruit attached to the upper trunk.
