How to Draw Grapevine — Free Practice Sheets

ANSWER / CASE 1

grapevine: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

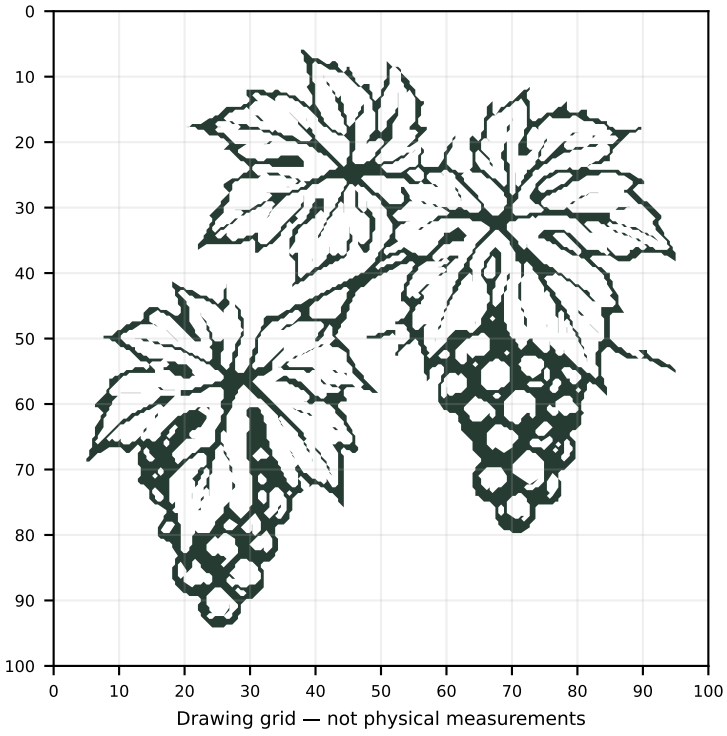

ANSWER: Example solution: preserve broad lobed leaves with serrated edges and visible veins, two hanging clusters of round grapes, curling tendrils and branching vine stems. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a central branching vine stem with a few curling tendrils.
2. Attach three broad lobed leaves with serrated edges and radiating veins to the stem.
3. Hang two clusters of overlapping round grapes from the stem, one on each side.
4. Add small curling tendrils near the grape clusters to complete the grapevine silhouette.

How to Draw Grapevine — Free Practice Sheets

ANSWER / CASE 2

grapevine: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

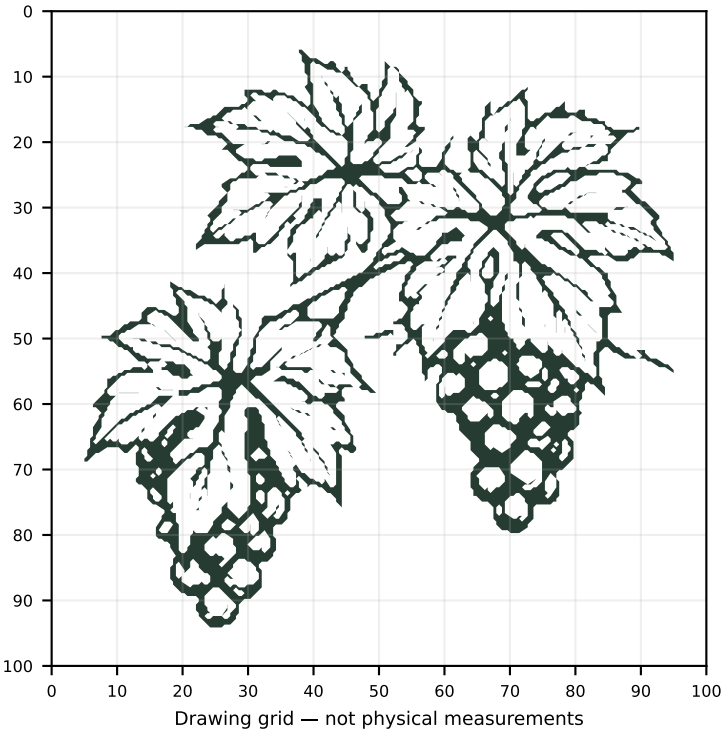

ANSWER: Example solution: preserve broad lobed leaves with serrated edges and visible veins, two hanging clusters of round grapes, curling tendrils and branching vine stems. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a central branching vine stem with a few curling tendrils.
2. Attach three broad lobed leaves with serrated edges and radiating veins to the stem.
3. Hang two clusters of overlapping round grapes from the stem, one on each side.
4. Add small curling tendrils near the grape clusters to complete the grapevine silhouette.

How to Draw Grapevine — Free Practice Sheets

ANSWER / CASE 3

grapevine: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

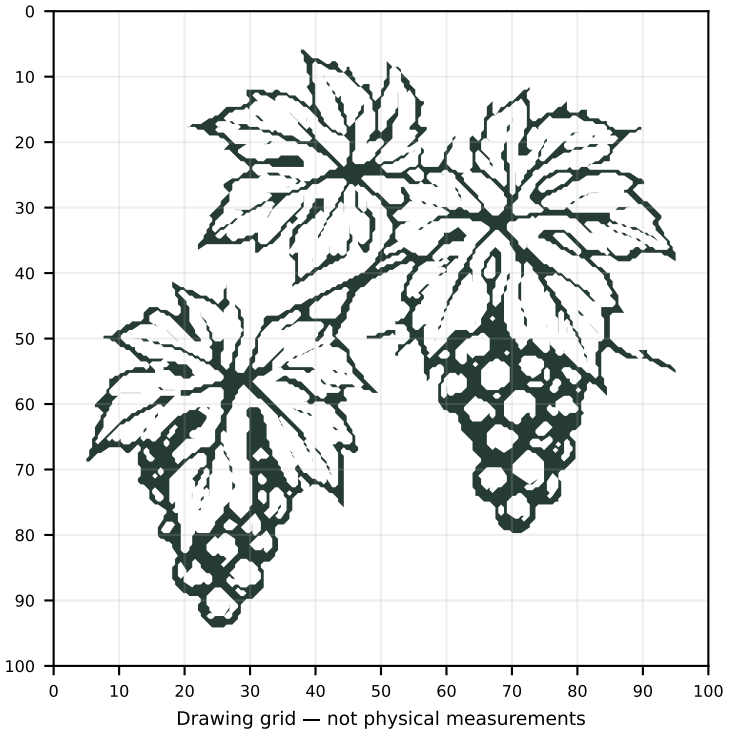

ANSWER: Example solution: preserve broad lobed leaves with serrated edges and visible veins, two hanging clusters of round grapes, curling tendrils and branching vine stems. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a central branching vine stem with a few curling tendrils.
2. Attach three broad lobed leaves with serrated edges and radiating veins to the stem.
3. Hang two clusters of overlapping round grapes from the stem, one on each side.
4. Add small curling tendrils near the grape clusters to complete the grapevine silhouette.

How to Draw Grapevine — Free Practice Sheets

ANSWER / CASE 4

grapevine: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve broad lobed leaves with serrated edges and visible veins, two hanging clusters of round grapes, curling tendrils and branching vine stems. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a central branching vine stem with a few curling tendrils.
2. Attach three broad lobed leaves with serrated edges and radiating veins to the stem.
3. Hang two clusters of overlapping round grapes from the stem, one on each side.
4. Add small curling tendrils near the grape clusters to complete the grapevine silhouette.
