How to Draw Peapod — Free Practice Sheets

ANSWER / CASE 1

peapod: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

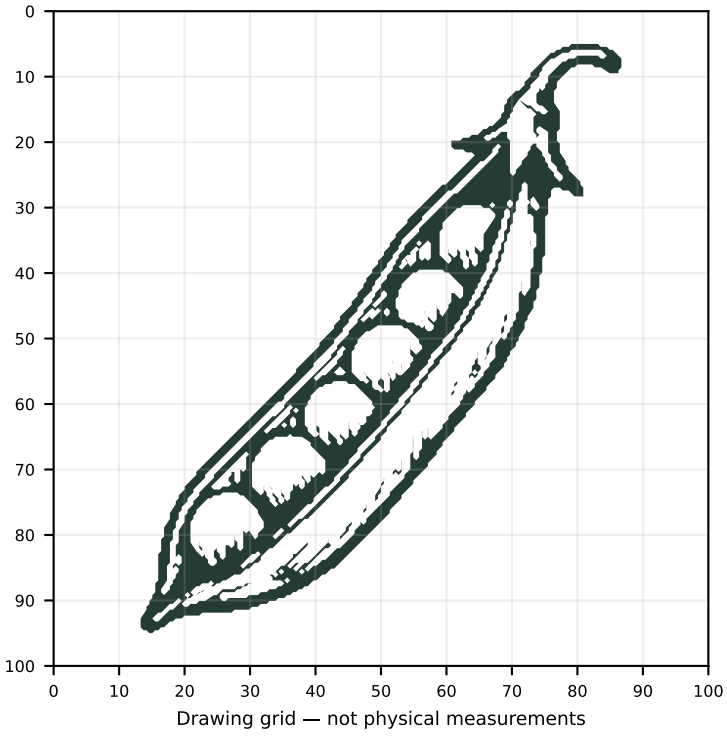

ANSWER: Example solution: preserve elongated curved pod, round peas inside, tapered ends. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long, gently curved pod outline with a pointed tip at the bottom and a stem/calyx at the top.
2. Add a second inner curved line to define the pod wall and create the open seam.
3. Place a row of round peas along the inside of the pod, following the curve.
4. Add the stem/calyx at the top and simple line shading along the pod edges.

How to Draw Peapod — Free Practice Sheets

ANSWER / CASE 2

peapod: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

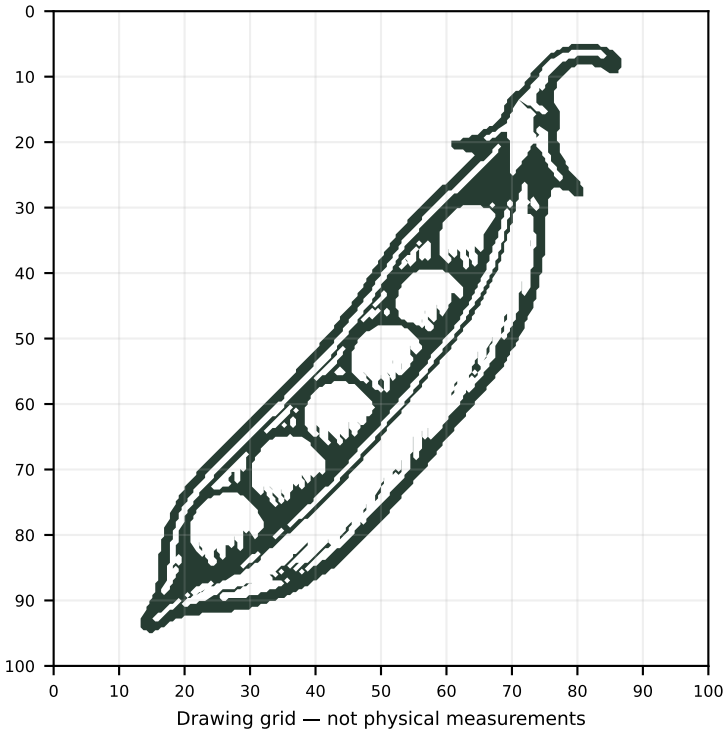

ANSWER: Example solution: preserve elongated curved pod, round peas inside, tapered ends. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long, gently curved pod outline with a pointed tip at the bottom and a stem/calyx at the top.
2. Add a second inner curved line to define the pod wall and create the open seam.
3. Place a row of round peas along the inside of the pod, following the curve.
4. Add the stem/calyx at the top and simple line shading along the pod edges.

How to Draw Peapod — Free Practice Sheets

ANSWER / CASE 3

peapod: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

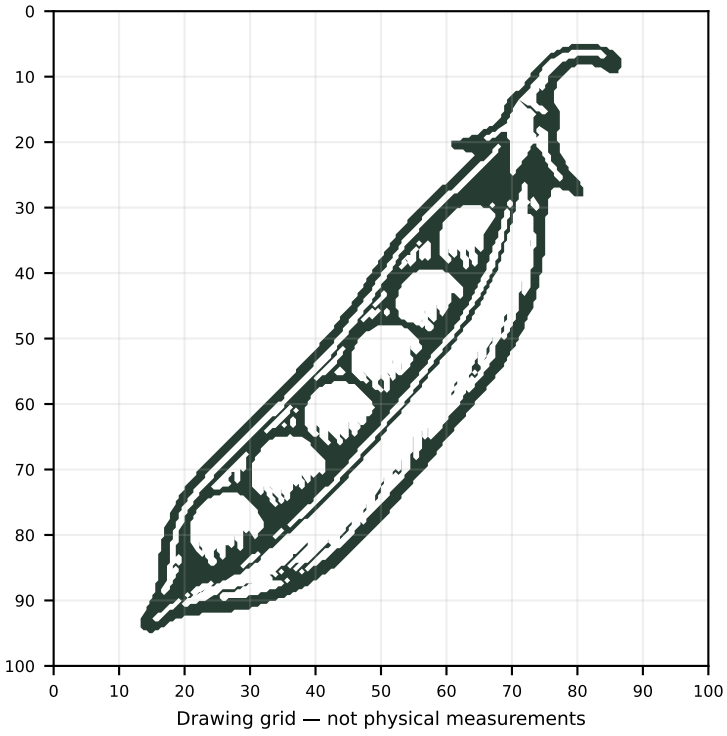

ANSWER: Example solution: preserve elongated curved pod, round peas inside, tapered ends. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long, gently curved pod outline with a pointed tip at the bottom and a stem/calyx at the top.
2. Add a second inner curved line to define the pod wall and create the open seam.
3. Place a row of round peas along the inside of the pod, following the curve.
4. Add the stem/calyx at the top and simple line shading along the pod edges.

How to Draw Peapod — Free Practice Sheets

ANSWER / CASE 4

peapod: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve elongated curved pod, round peas inside, tapered ends. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long, gently curved pod outline with a pointed tip at the bottom and a stem/calyx at the top.
2. Add a second inner curved line to define the pod wall and create the open seam.
3. Place a row of round peas along the inside of the pod, following the curve.
4. Add the stem/calyx at the top and simple line shading along the pod edges.
