How to Draw Maple Tree — Free Practice Sheets

ANSWER / CASE 1

maple tree: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

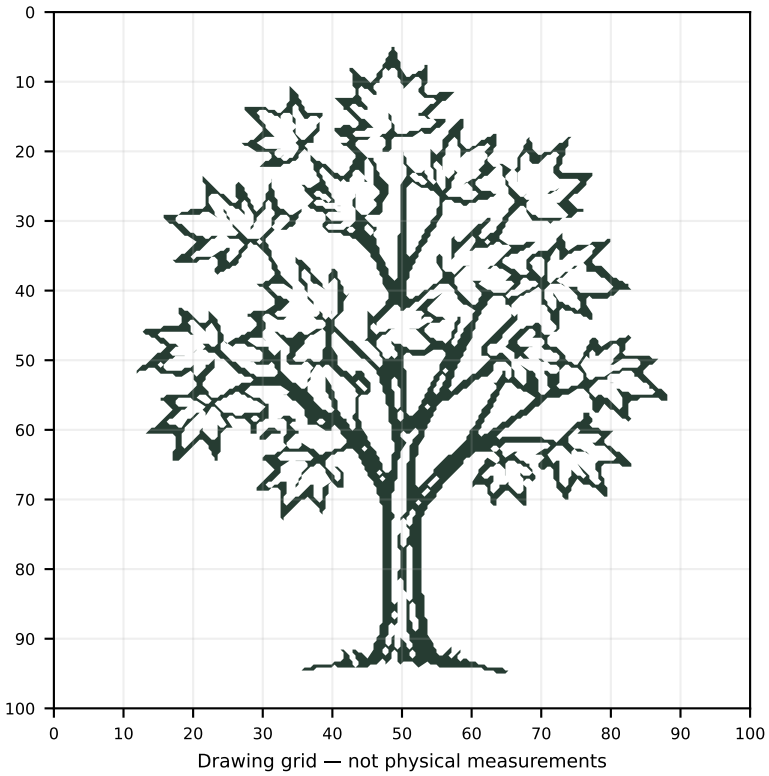

ANSWER: Example solution: preserve star-shaped lobed maple leaves with pointed tips, branching trunk that splits into multiple upward limbs, rounded overall canopy formed by clustered leaves. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a short vertical trunk with slight flare at the base and a few ground lines.
2. Split the trunk into several main branches that fan upward and outward.
3. Attach star-shaped lobed leaves along and at the ends of the branches to build a rounded canopy.
4. Add a few interior leaf outlines and branch lines to suggest depth while keeping the silhouette clean.

How to Draw Maple Tree — Free Practice Sheets

ANSWER / CASE 2

maple tree: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

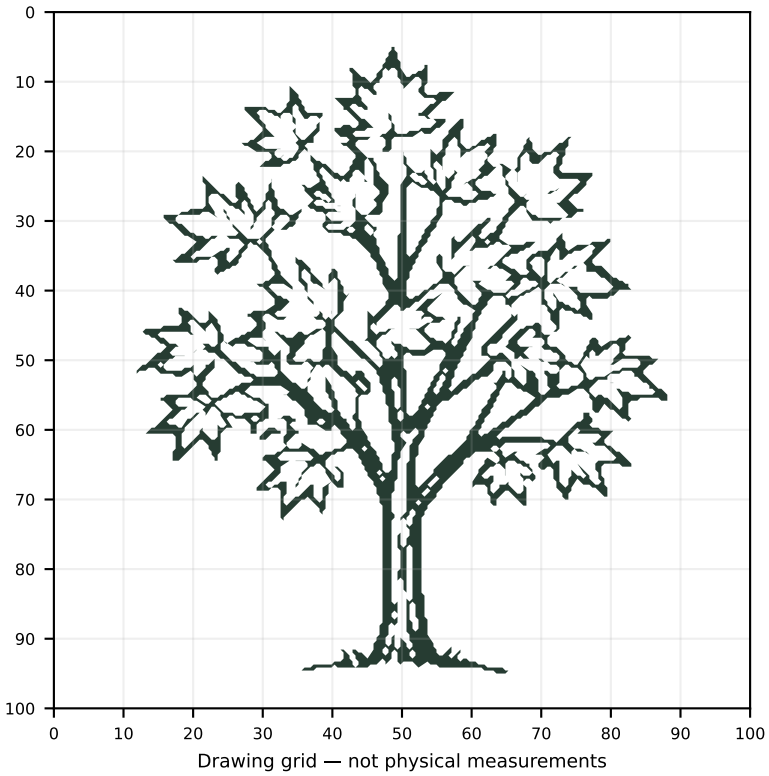

ANSWER: Example solution: preserve star-shaped lobed maple leaves with pointed tips, branching trunk that splits into multiple upward limbs, rounded overall canopy formed by clustered leaves. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a short vertical trunk with slight flare at the base and a few ground lines.
2. Split the trunk into several main branches that fan upward and outward.
3. Attach star-shaped lobed leaves along and at the ends of the branches to build a rounded canopy.
4. Add a few interior leaf outlines and branch lines to suggest depth while keeping the silhouette clean.

ANSWER / CASE 3

maple tree: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

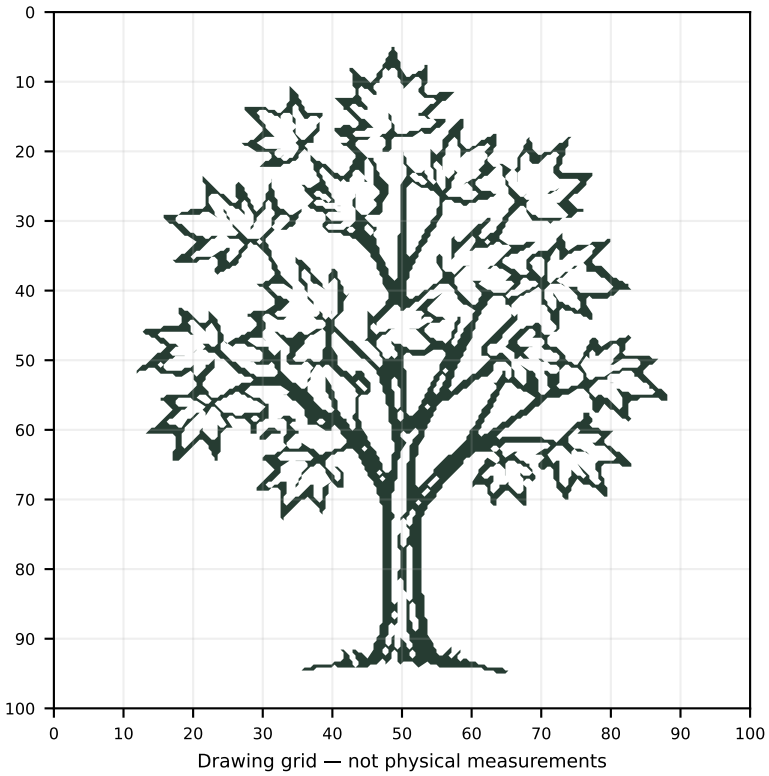

ANSWER: Example solution: preserve star-shaped lobed maple leaves with pointed tips, branching trunk that splits into multiple upward limbs, rounded overall canopy formed by clustered leaves. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a short vertical trunk with slight flare at the base and a few ground lines.
2. Split the trunk into several main branches that fan upward and outward.
3. Attach star-shaped lobed leaves along and at the ends of the branches to build a rounded canopy.
4. Add a few interior leaf outlines and branch lines to suggest depth while keeping the silhouette clean.

How to Draw Maple Tree — Free Practice Sheets

ANSWER / CASE 4

maple tree: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve star-shaped lobed maple leaves with pointed tips, branching trunk that splits into multiple upward limbs, rounded overall canopy formed by clustered leaves. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a short vertical trunk with slight flare at the base and a few ground lines.
2. Split the trunk into several main branches that fan upward and outward.
3. Attach star-shaped lobed leaves along and at the ends of the branches to build a rounded canopy.
4. Add a few interior leaf outlines and branch lines to suggest depth while keeping the silhouette clean.
