How to Draw Orchid — Free Practice Sheets

ANSWER / CASE 1

orchid: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

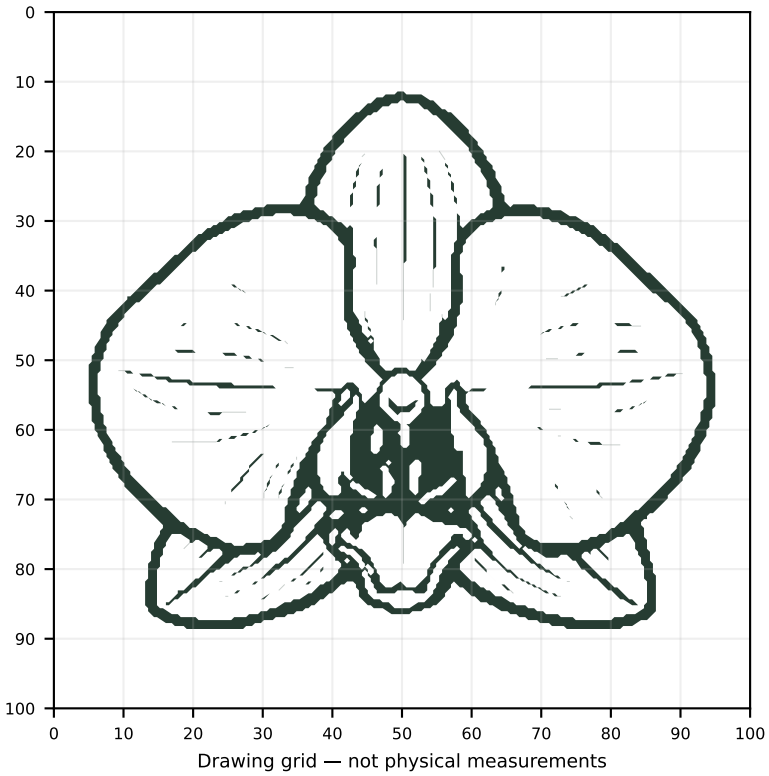

ANSWER: Example solution: preserve three large rounded outer petals forming a triangular silhouette, central lip petal with a complex, folded shape at the bottom center, curved stem implied by the central vertical structure and column. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a large central teardrop-shaped petal pointing upward.
2. Add two broad, rounded side petals flanking the central petal to form a triangular outline.
3. Sketch the central column and the folded lip petal at the bottom center, overlapping the lower edges of the side petals.
4. Add fine radiating vein lines inside the petals and define the curved stem/column structure in the center.

ANSWER / CASE 2

orchid: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

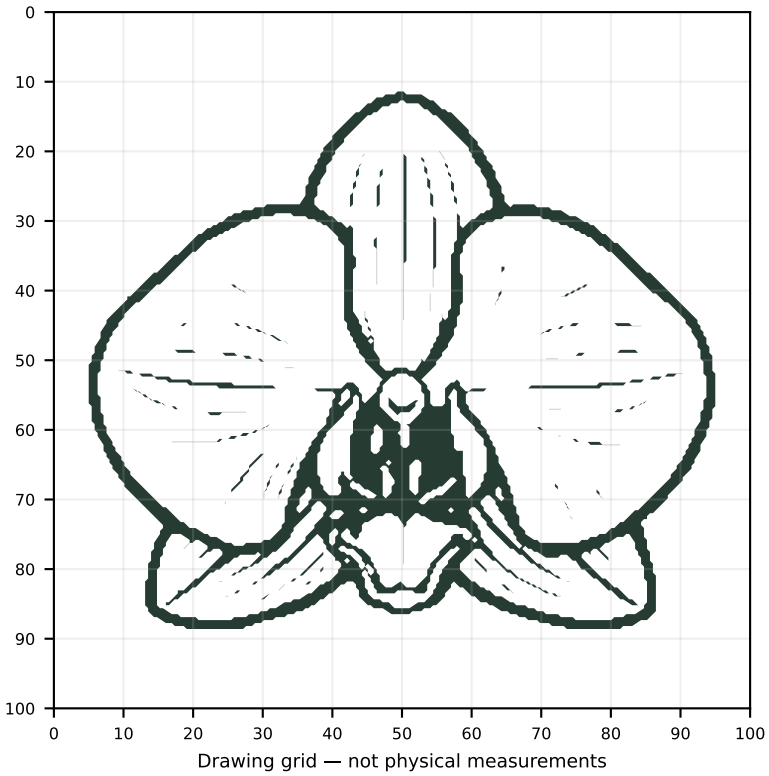

ANSWER: Example solution: preserve three large rounded outer petals forming a triangular silhouette, central lip petal with a complex, folded shape at the bottom center, curved stem implied by the central vertical structure and column. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a large central teardrop-shaped petal pointing upward.
2. Add two broad, rounded side petals flanking the central petal to form a triangular outline.
3. Sketch the central column and the folded lip petal at the bottom center, overlapping the lower edges of the side petals.
4. Add fine radiating vein lines inside the petals and define the curved stem/column structure in the center.

ANSWER / CASE 3

orchid: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

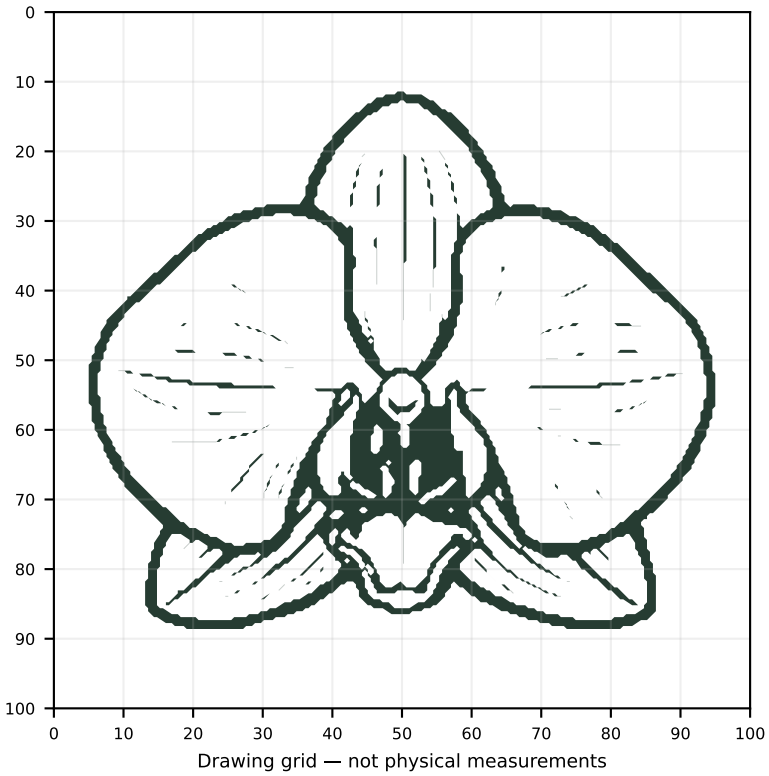

ANSWER: Example solution: preserve three large rounded outer petals forming a triangular silhouette, central lip petal with a complex, folded shape at the bottom center, curved stem implied by the central vertical structure and column. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a large central teardrop-shaped petal pointing upward.
2. Add two broad, rounded side petals flanking the central petal to form a triangular outline.
3. Sketch the central column and the folded lip petal at the bottom center, overlapping the lower edges of the side petals.
4. Add fine radiating vein lines inside the petals and define the curved stem/column structure in the center.

How to Draw Orchid — Free Practice Sheets

ANSWER / CASE 4

orchid: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve three large rounded outer petals forming a triangular silhouette, central lip petal with a complex, folded shape at the bottom center, curved stem implied by the central vertical structure and column. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a large central teardrop-shaped petal pointing upward.
2. Add two broad, rounded side petals flanking the central petal to form a triangular outline.
3. Sketch the central column and the folded lip petal at the bottom center, overlapping the lower edges of the side petals.
4. Add fine radiating vein lines inside the petals and define the curved stem/column structure in the center.
