How to Draw Maple Leaf — Free Practice Sheets

ANSWER / CASE 1

maple leaf: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

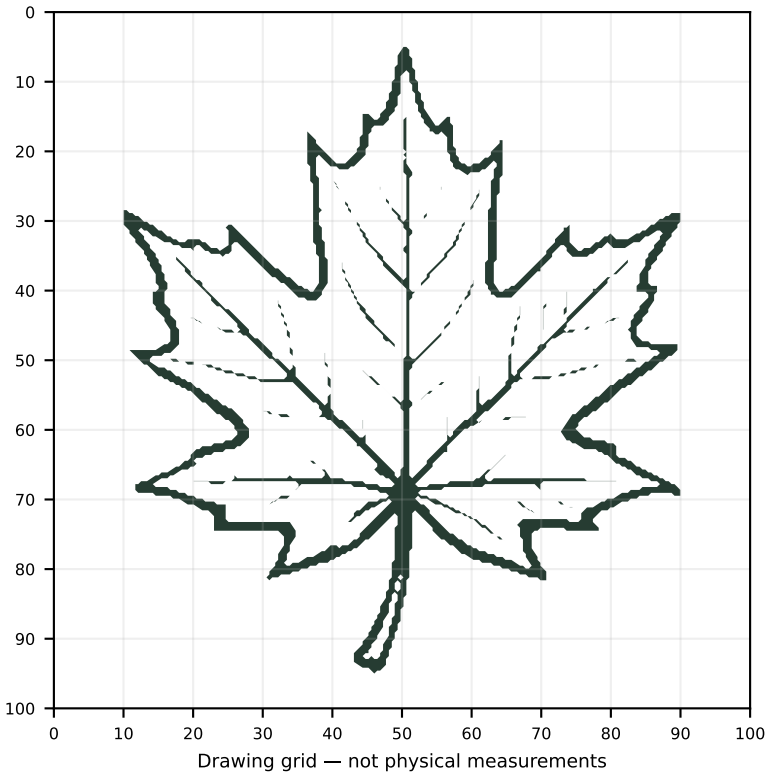

ANSWER: Example solution: preserve five pointed lobes with serrated edges, palmate vein pattern radiating from the base, long stem extending downward from the leaf base. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long curved stem at the bottom center.
2. From the top of the stem, draw five main veins radiating outward in a palmate pattern.
3. Outline each lobe around the veins with pointed tips and serrated edges.
4. Add secondary vein lines branching from the main veins inside each lobe.

How to Draw Maple Leaf — Free Practice Sheets

ANSWER / CASE 2

maple leaf: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

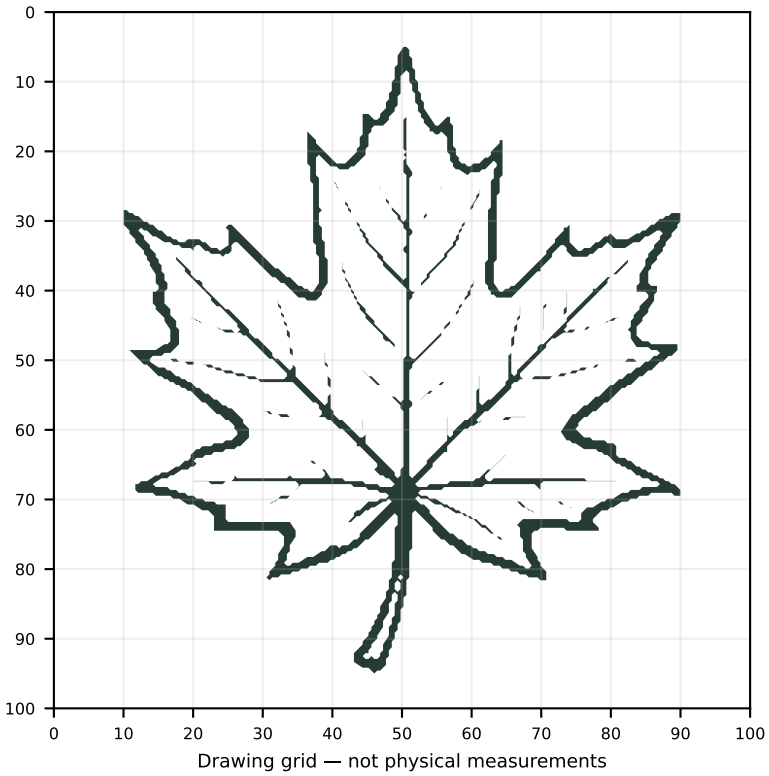

ANSWER: Example solution: preserve five pointed lobes with serrated edges, palmate vein pattern radiating from the base, long stem extending downward from the leaf base. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long curved stem at the bottom center.
2. From the top of the stem, draw five main veins radiating outward in a palmate pattern.
3. Outline each lobe around the veins with pointed tips and serrated edges.
4. Add secondary vein lines branching from the main veins inside each lobe.

How to Draw Maple Leaf — Free Practice Sheets

ANSWER / CASE 3

maple leaf: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

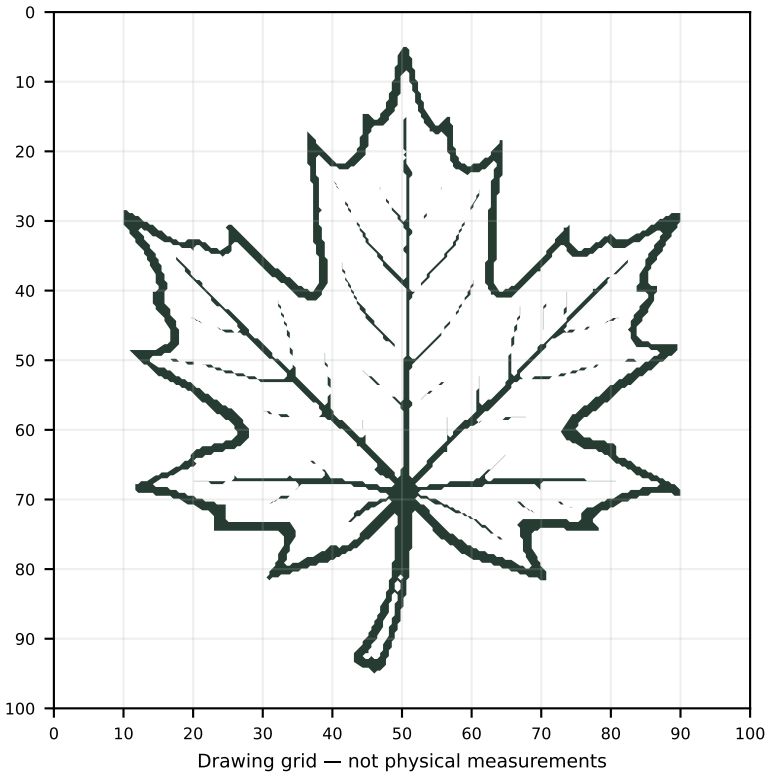

ANSWER: Example solution: preserve five pointed lobes with serrated edges, palmate vein pattern radiating from the base, long stem extending downward from the leaf base. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long curved stem at the bottom center.
2. From the top of the stem, draw five main veins radiating outward in a palmate pattern.
3. Outline each lobe around the veins with pointed tips and serrated edges.
4. Add secondary vein lines branching from the main veins inside each lobe.

How to Draw Maple Leaf — Free Practice Sheets

ANSWER / CASE 4

maple leaf: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve five pointed lobes with serrated edges, palmate vein pattern radiating from the base, long stem extending downward from the leaf base. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long curved stem at the bottom center.
2. From the top of the stem, draw five main veins radiating outward in a palmate pattern.
3. Outline each lobe around the veins with pointed tips and serrated edges.
4. Add secondary vein lines branching from the main veins inside each lobe.
