How to Draw Rapeseed — Free Practice Sheets

ANSWER / CASE 1

rapeseed: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

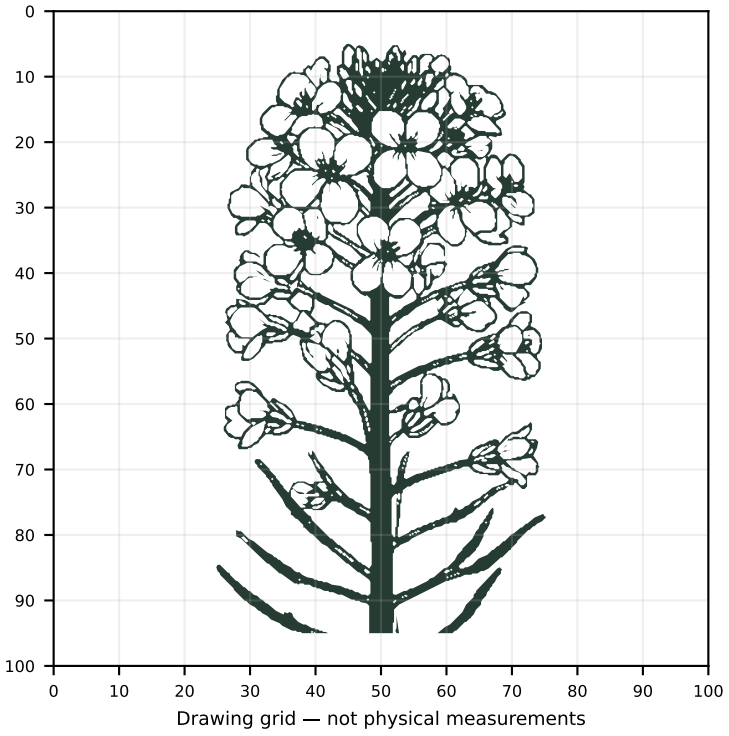

ANSWER: Example solution: preserve Central vertical stem with alternating lateral branches forming a roughly triangular canopy silhouette., Four-petaled flower shapes arranged in a dense cluster at the top, with smaller buds near the apex., Long, narrow, pointed leaf shapes concentrated near the base and lower stem, angled downward and outward.. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a central vertical axis from the base to the top of the composition.
2. Add alternating lateral branches along the upper two-thirds of the stem, decreasing in length toward the apex.
3. Place four-petaled flower outlines in a dense cluster at the top and along the upper branches.
4. Add long, narrow leaf outlines at the base and lower stem, angled downward and outward.

How to Draw Rapeseed — Free Practice Sheets

ANSWER / CASE 2

rapeseed: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

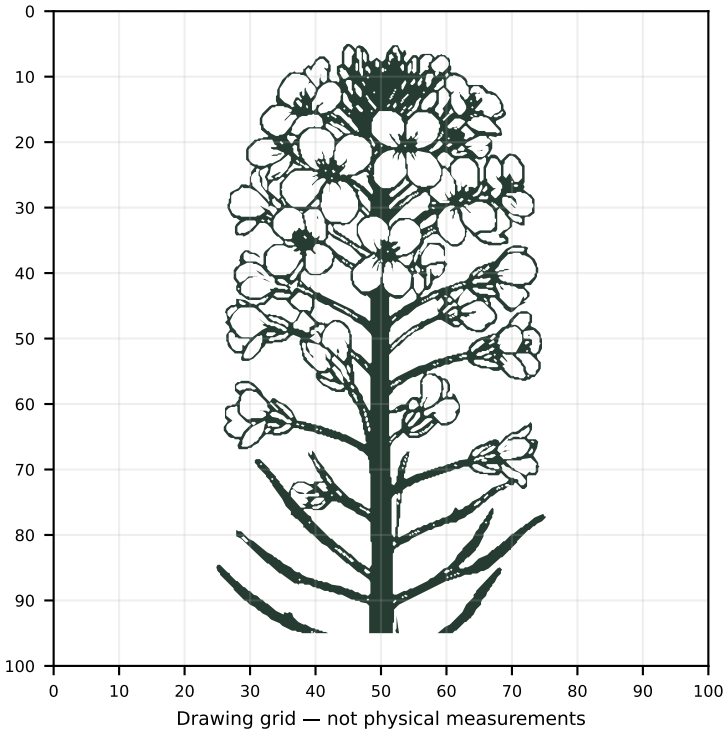

ANSWER: Example solution: preserve Central vertical stem with alternating lateral branches forming a roughly triangular canopy silhouette., Four-petaled flower shapes arranged in a dense cluster at the top, with smaller buds near the apex., Long, narrow, pointed leaf shapes concentrated near the base and lower stem, angled downward and outward.. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a central vertical axis from the base to the top of the composition.
2. Add alternating lateral branches along the upper two-thirds of the stem, decreasing in length toward the apex.
3. Place four-petaled flower outlines in a dense cluster at the top and along the upper branches.
4. Add long, narrow leaf outlines at the base and lower stem, angled downward and outward.

How to Draw Rapeseed — Free Practice Sheets

ANSWER / CASE 3

rapeseed: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

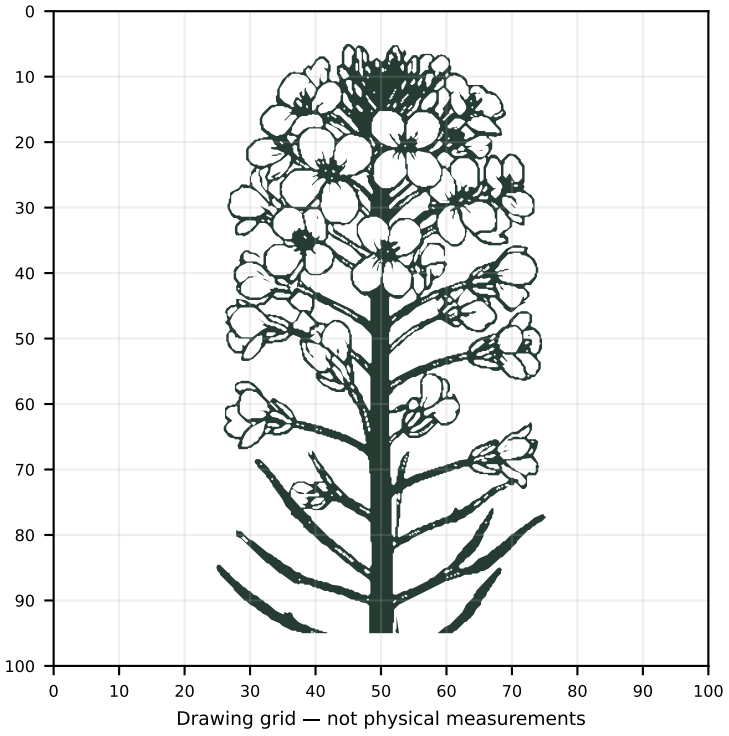

ANSWER: Example solution: preserve Central vertical stem with alternating lateral branches forming a roughly triangular canopy silhouette., Four-petaled flower shapes arranged in a dense cluster at the top, with smaller buds near the apex., Long, narrow, pointed leaf shapes concentrated near the base and lower stem, angled downward and outward.. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a central vertical axis from the base to the top of the composition.
2. Add alternating lateral branches along the upper two-thirds of the stem, decreasing in length toward the apex.
3. Place four-petaled flower outlines in a dense cluster at the top and along the upper branches.
4. Add long, narrow leaf outlines at the base and lower stem, angled downward and outward.

How to Draw Rapeseed — Free Practice Sheets

ANSWER / CASE 4

rapeseed: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve Central vertical stem with alternating lateral branches forming a roughly triangular canopy silhouette., Four-petaled flower shapes arranged in a dense cluster at the top, with smaller buds near the apex., Long, narrow, pointed leaf shapes concentrated near the base and lower stem, angled downward and outward.. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a central vertical axis from the base to the top of the composition.
2. Add alternating lateral branches along the upper two-thirds of the stem, decreasing in length toward the apex.
3. Place four-petaled flower outlines in a dense cluster at the top and along the upper branches.
4. Add long, narrow leaf outlines at the base and lower stem, angled downward and outward.
