How to Draw Truck — Free Practice Sheets

ANSWER / CASE 1

truck: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

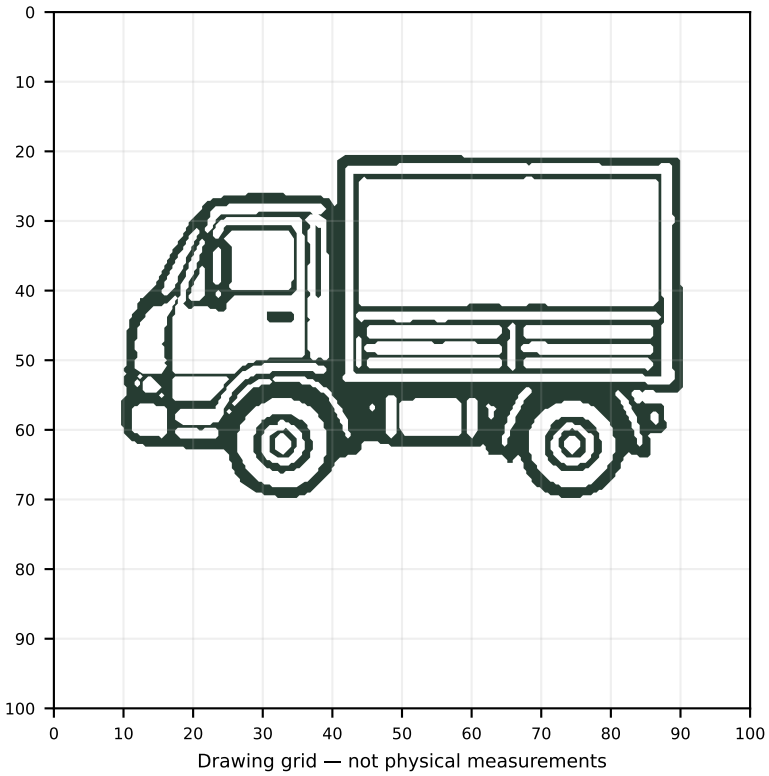

ANSWER: Example solution: preserve cab with sloped windshield and side window, large rectangular cargo bed with horizontal panel lines, two large wheels with concentric circular rims. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the cab outline starting from the sloped windshield, roofline, and side window, then add the front grille and bumper.
2. Attach the large rectangular cargo bed behind the cab, using a double-line border and horizontal slats on the lower section.
3. Add two large wheels with concentric circles positioned under the cab and rear of the cargo bed.
4. Connect the cab and bed with a chassis line and add small details like the side mirror and door handle.

How to Draw Truck — Free Practice Sheets

ANSWER / CASE 2

truck: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

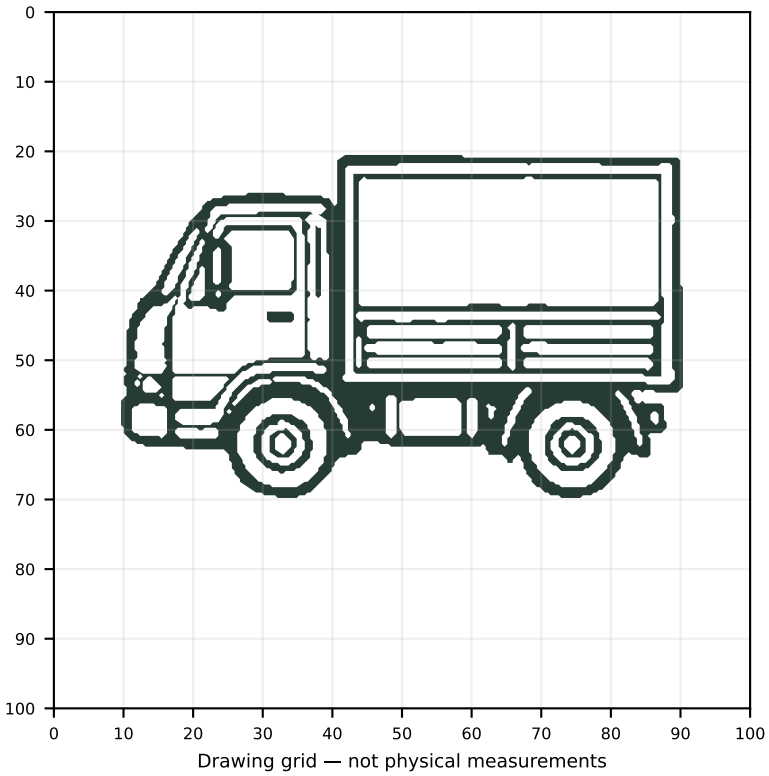

ANSWER: Example solution: preserve cab with sloped windshield and side window, large rectangular cargo bed with horizontal panel lines, two large wheels with concentric circular rims. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the cab outline starting from the sloped windshield, roofline, and side window, then add the front grille and bumper.
2. Attach the large rectangular cargo bed behind the cab, using a double-line border and horizontal slats on the lower section.
3. Add two large wheels with concentric circles positioned under the cab and rear of the cargo bed.
4. Connect the cab and bed with a chassis line and add small details like the side mirror and door handle.

ANSWER / CASE 3

truck: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

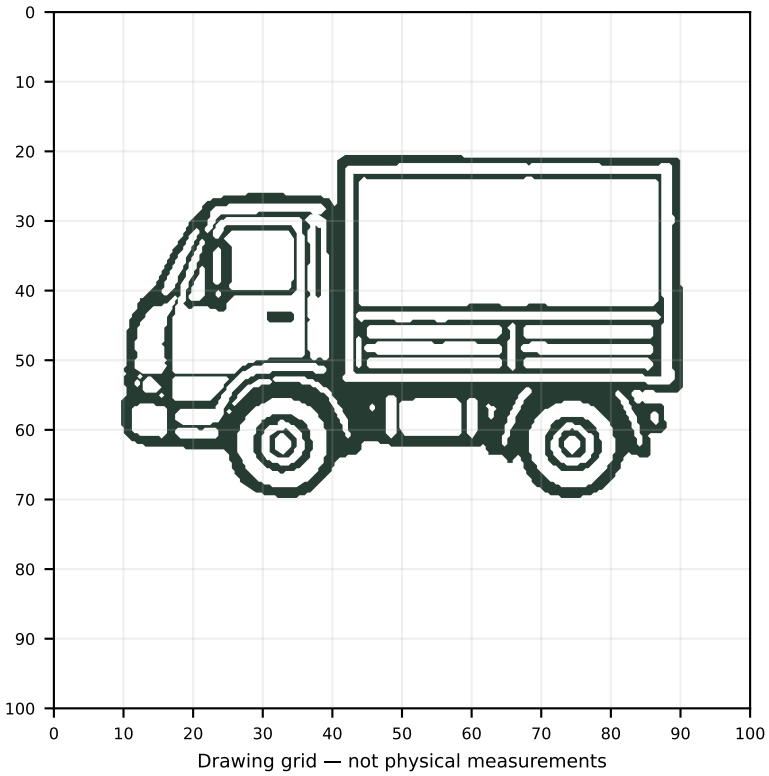

ANSWER: Example solution: preserve cab with sloped windshield and side window, large rectangular cargo bed with horizontal panel lines, two large wheels with concentric circular rims. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the cab outline starting from the sloped windshield, roofline, and side window, then add the front grille and bumper.
2. Attach the large rectangular cargo bed behind the cab, using a double-line border and horizontal slats on the lower section.
3. Add two large wheels with concentric circles positioned under the cab and rear of the cargo bed.
4. Connect the cab and bed with a chassis line and add small details like the side mirror and door handle.

How to Draw Truck — Free Practice Sheets

ANSWER / CASE 4

truck: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve cab with sloped windshield and side window, large rectangular cargo bed with horizontal panel lines, two large wheels with concentric circular rims. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the cab outline starting from the sloped windshield, roofline, and side window, then add the front grille and bumper.
2. Attach the large rectangular cargo bed behind the cab, using a double-line border and horizontal slats on the lower section.
3. Add two large wheels with concentric circles positioned under the cab and rear of the cargo bed.
4. Connect the cab and bed with a chassis line and add small details like the side mirror and door handle.
