How to Draw Subway Train — Free Practice Sheets

ANSWER / CASE 1

subway train: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

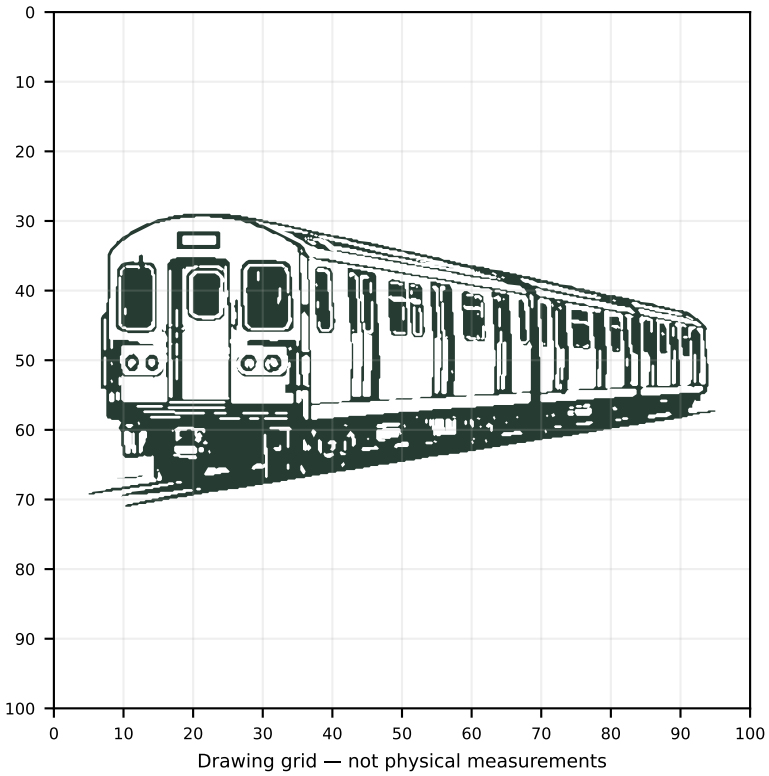

ANSWER: Example solution: preserve long rectangular car body, row of side windows along the train, front cab with doors and headlights. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long rectangular box for the main train body, angled slightly to show perspective.
2. Add a rounded front cab section with a central door, two front windows, and headlights.
3. Draw a row of rectangular windows along the side of the train, spacing them evenly.
4. Add wheels and undercarriage details beneath the body, then repeat the car shape for additional connected cars.

How to Draw Subway Train — Free Practice Sheets

ANSWER / CASE 2

subway train: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

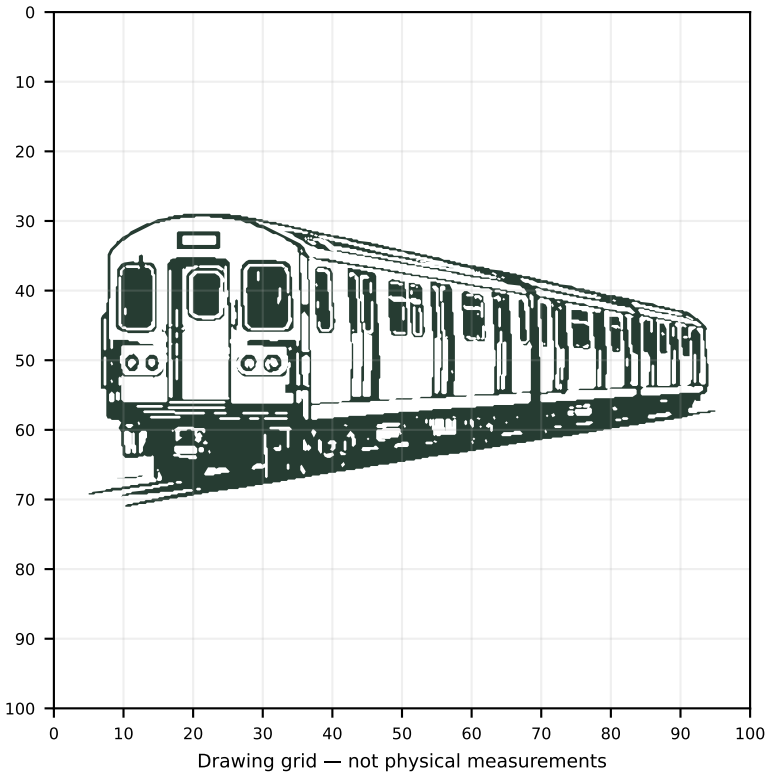

ANSWER: Example solution: preserve long rectangular car body, row of side windows along the train, front cab with doors and headlights. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long rectangular box for the main train body, angled slightly to show perspective.
2. Add a rounded front cab section with a central door, two front windows, and headlights.
3. Draw a row of rectangular windows along the side of the train, spacing them evenly.
4. Add wheels and undercarriage details beneath the body, then repeat the car shape for additional connected cars.

How to Draw Subway Train — Free Practice Sheets

ANSWER / CASE 3

subway train: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

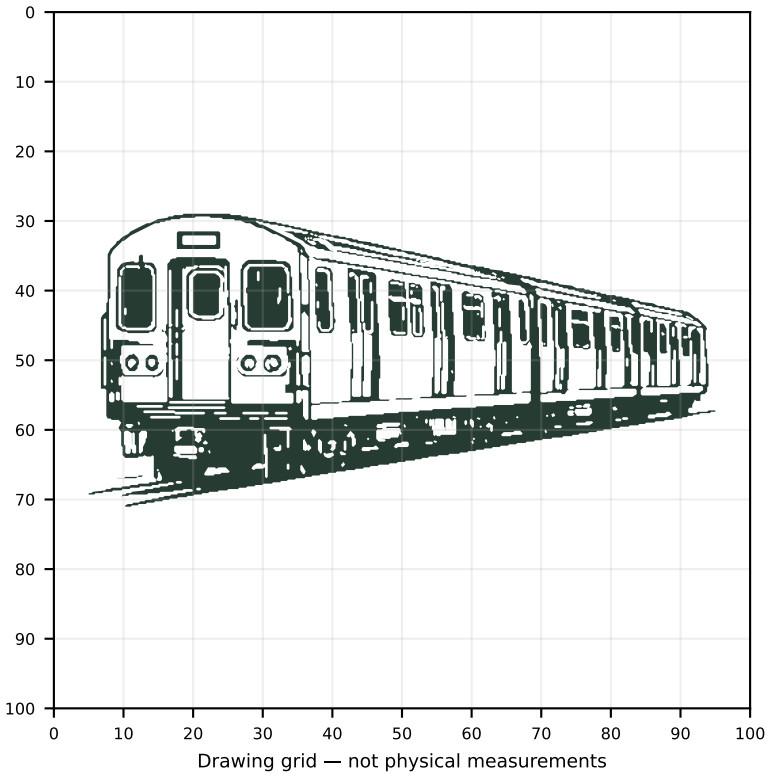

ANSWER: Example solution: preserve long rectangular car body, row of side windows along the train, front cab with doors and headlights. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long rectangular box for the main train body, angled slightly to show perspective.
2. Add a rounded front cab section with a central door, two front windows, and headlights.
3. Draw a row of rectangular windows along the side of the train, spacing them evenly.
4. Add wheels and undercarriage details beneath the body, then repeat the car shape for additional connected cars.

How to Draw Subway Train — Free Practice Sheets

ANSWER / CASE 4

subway train: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve long rectangular car body, row of side windows along the train, front cab with doors and headlights. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long rectangular box for the main train body, angled slightly to show perspective.
2. Add a rounded front cab section with a central door, two front windows, and headlights.
3. Draw a row of rectangular windows along the side of the train, spacing them evenly.
4. Add wheels and undercarriage details beneath the body, then repeat the car shape for additional connected cars.
