How to Draw Motorcycle — Free Practice Sheets

ANSWER / CASE 1

motorcycle: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

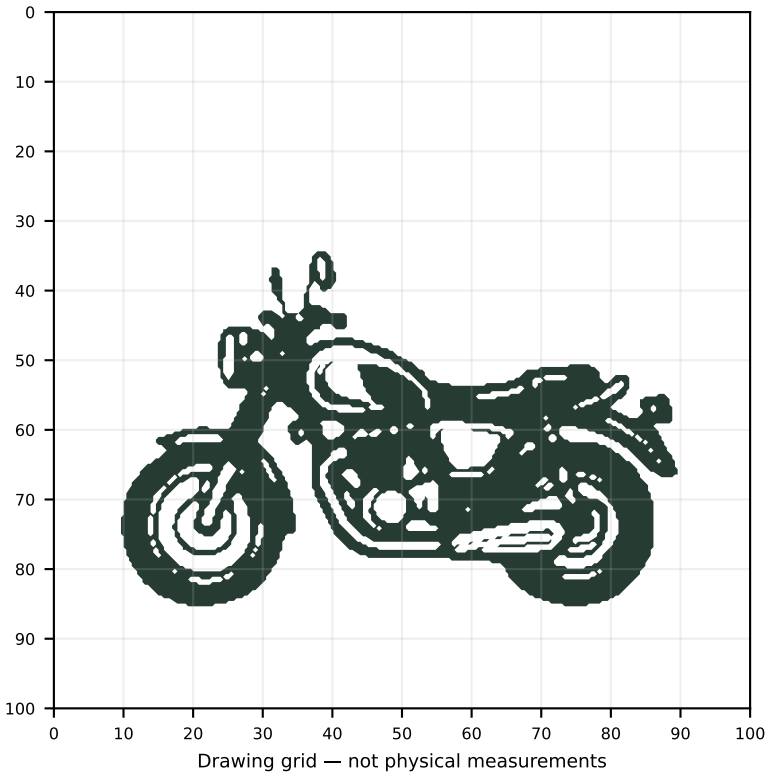

ANSWER: Example solution: preserve two large spoked wheels with concentric rim and hub lines, fuel tank between seat and handlebars, with a rounded teardrop outline, exposed engine block and exhaust pipe running low along the right side. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw two large circles for the front and rear wheels, then add concentric inner circles and short radial spokes to suggest spoked rims.
2. Sketch the main frame as a low horizontal line connecting the rear wheel to the steering head, then place the rounded fuel tank above the front half and the seat above the rear half.
3. Add the exposed engine as a compact block between the wheels below the tank, and draw the exhaust pipe as a long low tube running from the engine toward the rear wheel.
4. Finish the front fork, handlebars, headlight, and rear fender, then outline the tires and add simple line details to the tank, engine, and seat.

ANSWER / CASE 2

motorcycle: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

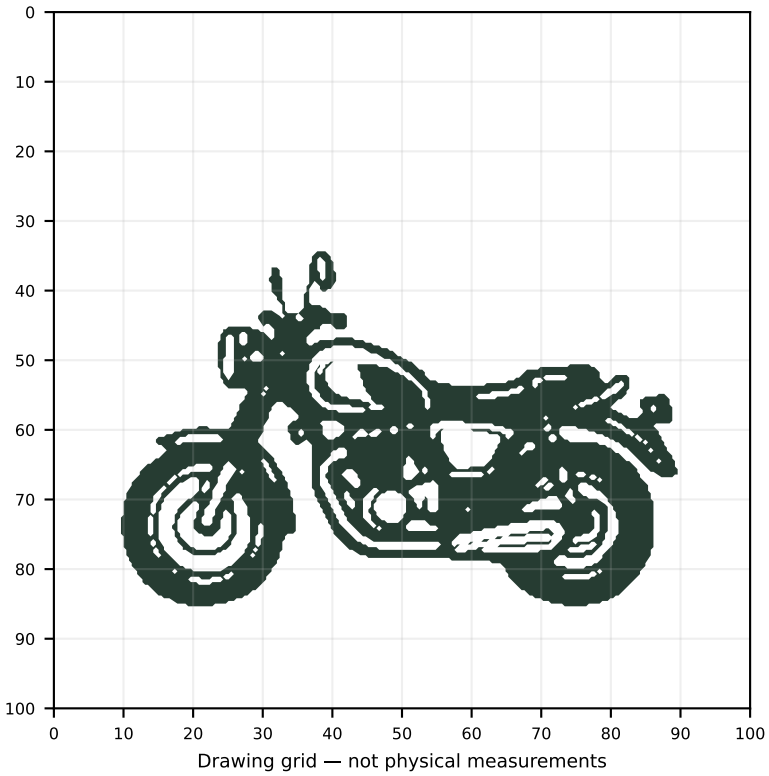

ANSWER: Example solution: preserve two large spoked wheels with concentric rim and hub lines, fuel tank between seat and handlebars, with a rounded teardrop outline, exposed engine block and exhaust pipe running low along the right side. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw two large circles for the front and rear wheels, then add concentric inner circles and short radial spokes to suggest spoked rims.
2. Sketch the main frame as a low horizontal line connecting the rear wheel to the steering head, then place the rounded fuel tank above the front half and the seat above the rear half.
3. Add the exposed engine as a compact block between the wheels below the tank, and draw the exhaust pipe as a long low tube running from the engine toward the rear wheel.
4. Finish the front fork, handlebars, headlight, and rear fender, then outline the tires and add simple line details to the tank, engine, and seat.

ANSWER / CASE 3

motorcycle: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

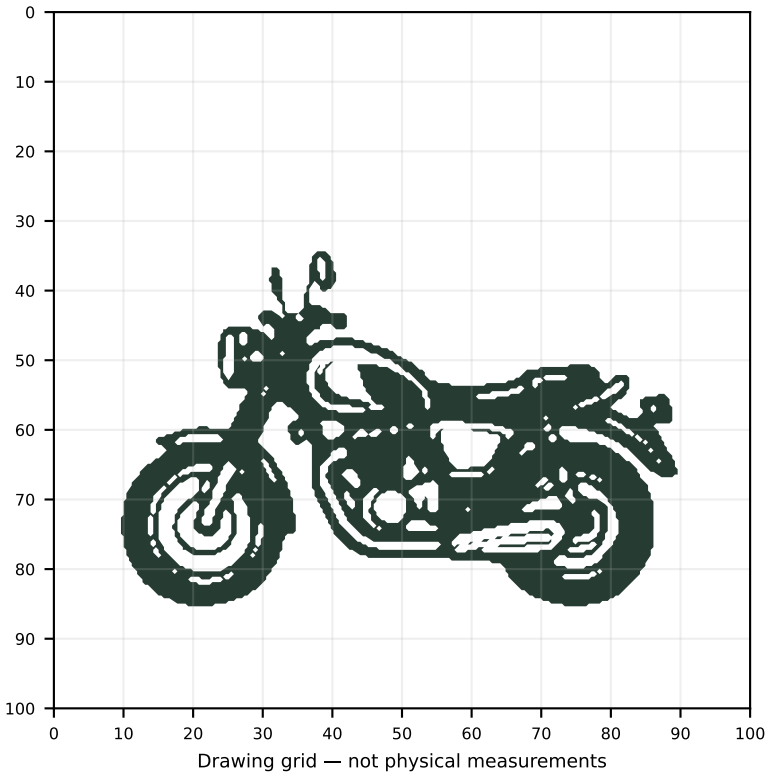

ANSWER: Example solution: preserve two large spoked wheels with concentric rim and hub lines, fuel tank between seat and handlebars, with a rounded teardrop outline, exposed engine block and exhaust pipe running low along the right side. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw two large circles for the front and rear wheels, then add concentric inner circles and short radial spokes to suggest spoked rims.
2. Sketch the main frame as a low horizontal line connecting the rear wheel to the steering head, then place the rounded fuel tank above the front half and the seat above the rear half.
3. Add the exposed engine as a compact block between the wheels below the tank, and draw the exhaust pipe as a long low tube running from the engine toward the rear wheel.
4. Finish the front fork, handlebars, headlight, and rear fender, then outline the tires and add simple line details to the tank, engine, and seat.

How to Draw Motorcycle — Free Practice Sheets

ANSWER / CASE 4

motorcycle: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve two large spoked wheels with concentric rim and hub lines, fuel tank between seat and handlebars, with a rounded teardrop outline, exposed engine block and exhaust pipe running low along the right side. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw two large circles for the front and rear wheels, then add concentric inner circles and short radial spokes to suggest spoked rims.
2. Sketch the main frame as a low horizontal line connecting the rear wheel to the steering head, then place the rounded fuel tank above the front half and the seat above the rear half.
3. Add the exposed engine as a compact block between the wheels below the tank, and draw the exhaust pipe as a long low tube running from the engine toward the rear wheel.
4. Finish the front fork, handlebars, headlight, and rear fender, then outline the tires and add simple line details to the tank, engine, and seat.
