How to Draw Motorcycle — Free Practice Sheets

REFERENCE / CASE 1

motorcycle: Trace the reference outline, then practise the contour independently.
Compare with the separate full reference sheet.

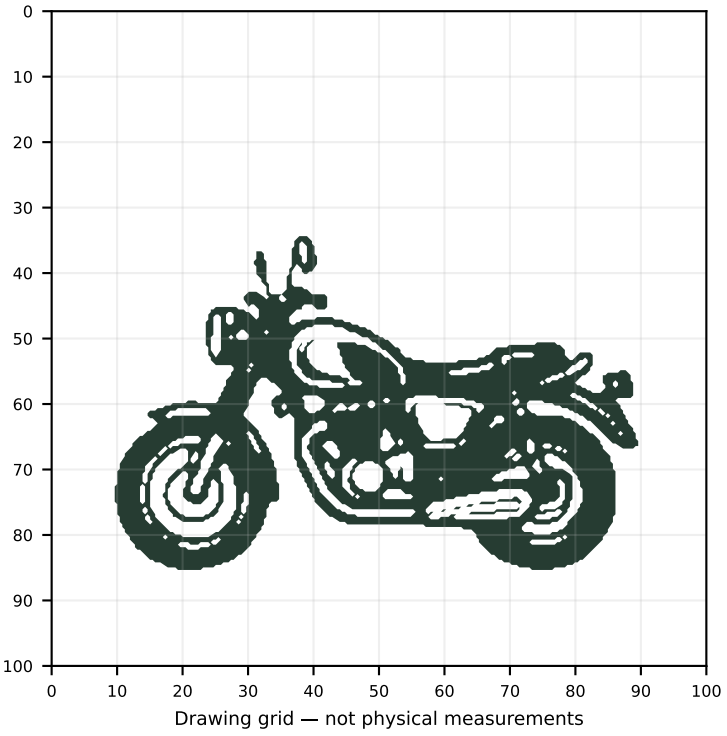

METHOD: Draw two large circles for the front and rear wheels, then add concentric inner circles and short radial spokes to suggest spoked rims. Sketch the main frame as a low horizontal line connecting the rear wheel to the steering head, then place the rounded fuel tank above the front half and the seat above the rear half. Add the exposed engine as a compact block between the wheels below the tank, and draw the exhaust pipe as a long low tube running from the engine toward the rear wheel. Finish the front fork, handlebars, headlight, and rear fender, then outline the tires and add simple line details to the tank, engine, and seat.
Use the separate practice sheet before checking the answer.

How to Draw Motorcycle — Free Practice Sheets

REFERENCE / CASE 2

motorcycle: Copy the reference onto the blank grid, using matching grid intersections.
Compare with the separate full reference sheet.

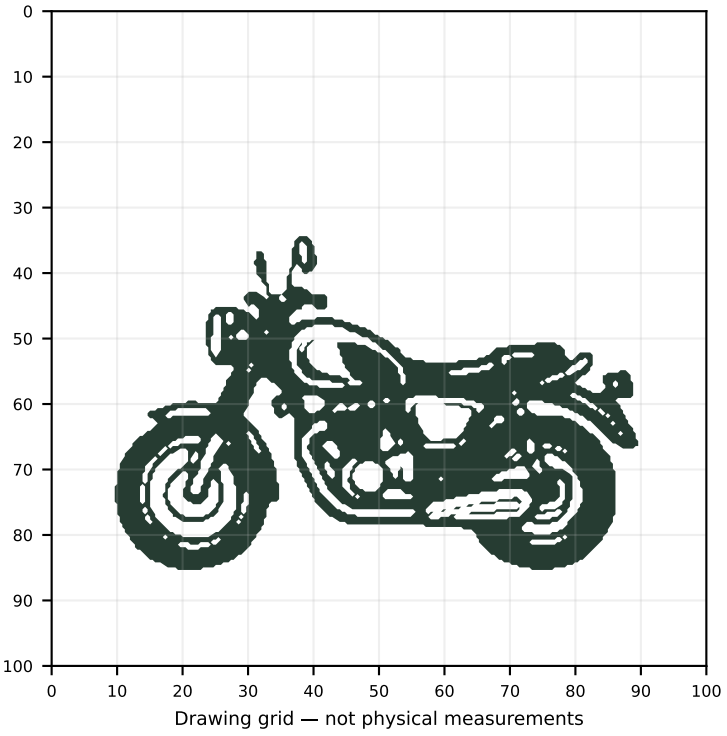

METHOD: Draw two large circles for the front and rear wheels, then add concentric inner circles and short radial spokes to suggest spoked rims. Sketch the main frame as a low horizontal line connecting the rear wheel to the steering head, then place the rounded fuel tank above the front half and the seat above the rear half. Add the exposed engine as a compact block between the wheels below the tank, and draw the exhaust pipe as a long low tube running from the engine toward the rear wheel. Finish the front fork, handlebars, headlight, and rear fender, then outline the tires and add simple line details to the tank, engine, and seat.
Use the separate practice sheet before checking the answer.

REFERENCE / CASE 3

motorcycle: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

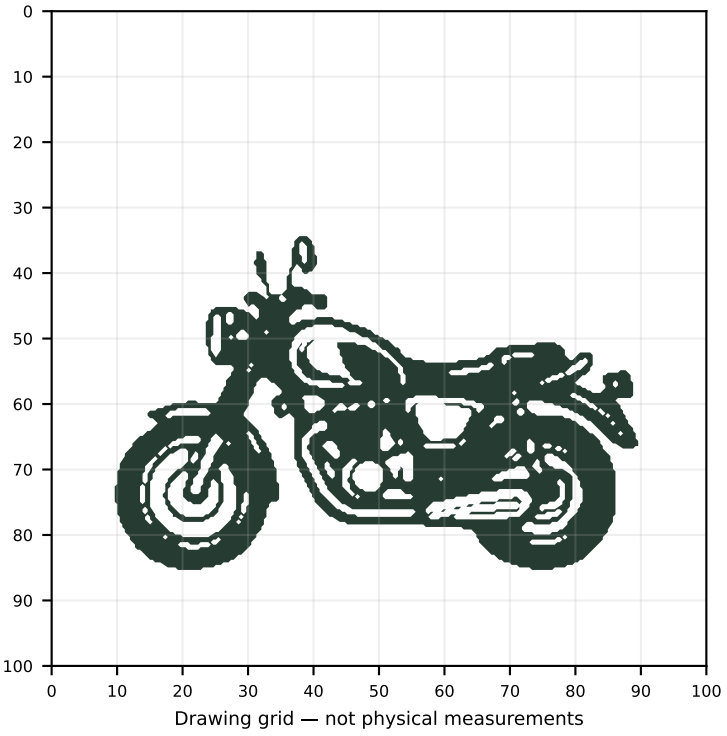

METHOD: Draw two large circles for the front and rear wheels, then add concentric inner circles and short radial spokes to suggest spoked rims. Sketch the main frame as a low horizontal line connecting the rear wheel to the steering head, then place the rounded fuel tank above the front half and the seat above the rear half. Add the exposed engine as a compact block between the wheels below the tank, and draw the exhaust pipe as a long low tube running from the engine toward the rear wheel. Finish the front fork, handlebars, headlight, and rear fender, then outline the tires and add simple line details to the tank, engine, and seat.
Use the separate practice sheet before checking the answer.

How to Draw Motorcycle — Free Practice Sheets

REFERENCE / CASE 4

motorcycle: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

METHOD: Draw two large circles for the front and rear wheels, then add concentric inner circles and short radial spokes to suggest spoked rims. Sketch the main frame as a low horizontal line connecting the rear wheel to the steering head, then place the rounded fuel tank above the front half and the seat above the rear half. Add the exposed engine as a compact block between the wheels below the tank, and draw the exhaust pipe as a long low tube running from the engine toward the rear wheel. Finish the front fork, handlebars, headlight, and rear fender, then outline the tires and add simple line details to the tank, engine, and seat.
Use the separate practice sheet before checking the answer.
