How to Draw Scooter — Free Practice Sheets

ANSWER / CASE 1

scooter: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

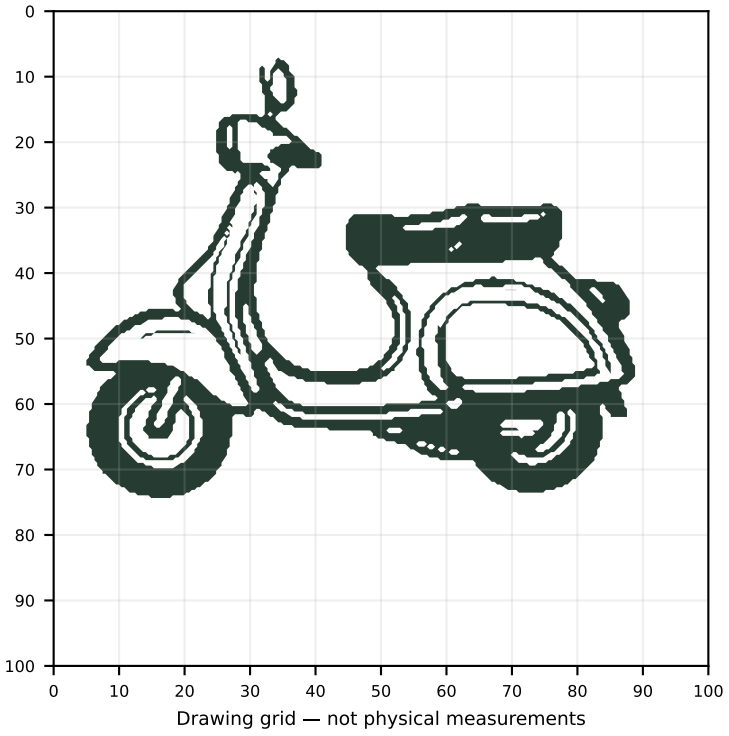

ANSWER: Example solution: preserve step-through frame with a low central floorboard, small front and rear wheels with dark tires, front handlebar column with a shield/leg-guard area and a small mirror. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw two small circles for the front and rear wheels, then add a low horizontal floorboard connecting them.
2. From the front wheel, draw a curved vertical column upward and add the handlebar and small mirror at the top.
3. Add the front leg-shield/fairing curve that flows down toward the floorboard.
4. Draw the long seat above the rear wheel and enclose the rounded rear side panel beneath it.

ANSWER / CASE 2

scooter: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

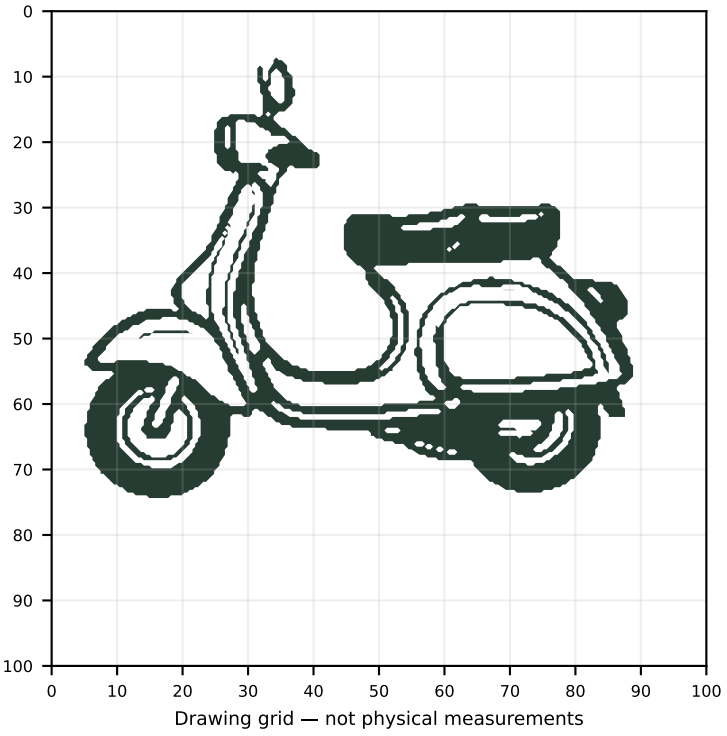

ANSWER: Example solution: preserve step-through frame with a low central floorboard, small front and rear wheels with dark tires, front handlebar column with a shield/leg-guard area and a small mirror. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw two small circles for the front and rear wheels, then add a low horizontal floorboard connecting them.
2. From the front wheel, draw a curved vertical column upward and add the handlebar and small mirror at the top.
3. Add the front leg-shield/fairing curve that flows down toward the floorboard.
4. Draw the long seat above the rear wheel and enclose the rounded rear side panel beneath it.

ANSWER / CASE 3

scooter: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

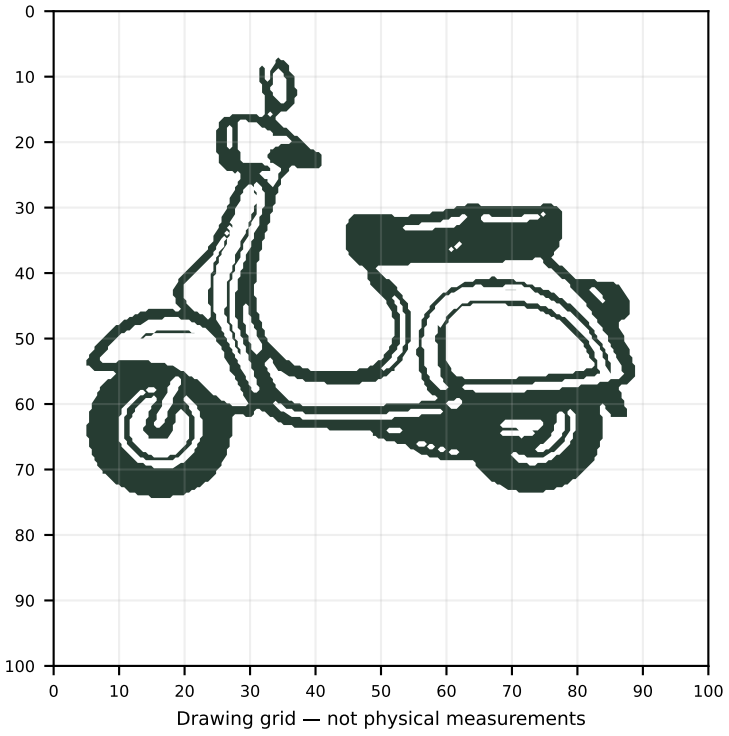

ANSWER: Example solution: preserve step-through frame with a low central floorboard, small front and rear wheels with dark tires, front handlebar column with a shield/leg-guard area and a small mirror. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw two small circles for the front and rear wheels, then add a low horizontal floorboard connecting them.
2. From the front wheel, draw a curved vertical column upward and add the handlebar and small mirror at the top.
3. Add the front leg-shield/fairing curve that flows down toward the floorboard.
4. Draw the long seat above the rear wheel and enclose the rounded rear side panel beneath it.

How to Draw Scooter — Free Practice Sheets

ANSWER / CASE 4

scooter: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve step-through frame with a low central floorboard, small front and rear wheels with dark tires, front handlebar column with a shield/leg-guard area and a small mirror. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw two small circles for the front and rear wheels, then add a low horizontal floorboard connecting them.
2. From the front wheel, draw a curved vertical column upward and add the handlebar and small mirror at the top.
3. Add the front leg-shield/fairing curve that flows down toward the floorboard.
4. Draw the long seat above the rear wheel and enclose the rounded rear side panel beneath it.
