How to Draw Tanker — Free Practice Sheets

ANSWER / CASE 1

tanker: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

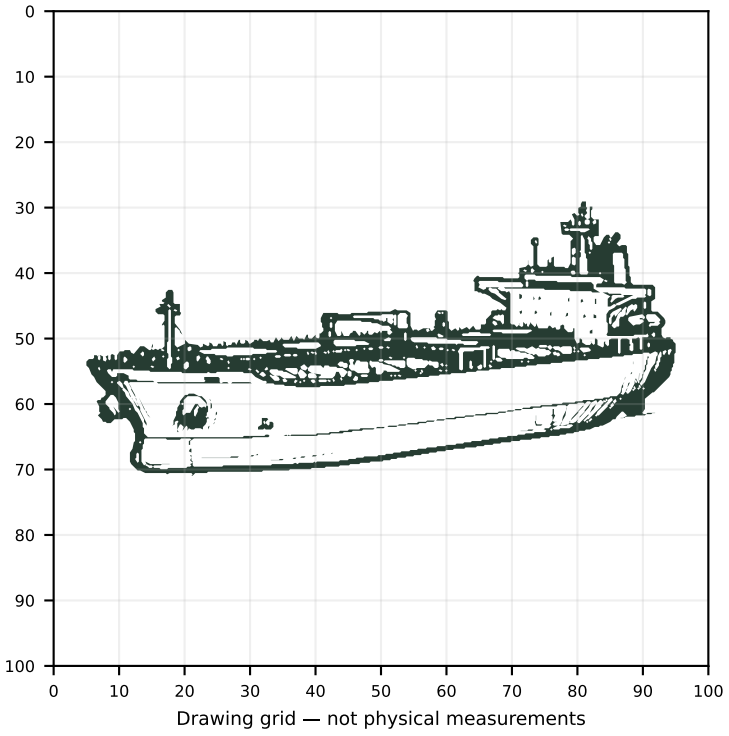

ANSWER: Example solution: preserve long flat deck with pipeline/manifold structures, raised multi-level superstructure and bridge at the stern, large elongated hull with pointed bow and rounded stern. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the long low hull as a horizontal tapered shape, pointed at the bow and rounded at the stern.
2. Add a continuous flat deck line running most of the length of the hull.
3. Place the tall superstructure block with bridge windows and mast at the stern end.
4. Add deck details such as the pipeline/manifold frame amidships and small bow mast to reinforce the tanker layout.

How to Draw Tanker — Free Practice Sheets

ANSWER / CASE 2

tanker: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

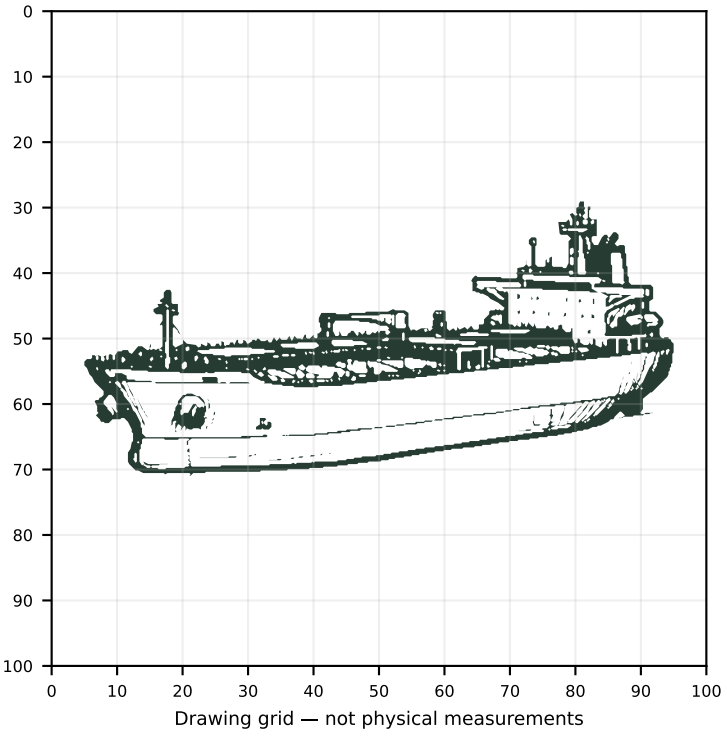

ANSWER: Example solution: preserve long flat deck with pipeline/manifold structures, raised multi-level superstructure and bridge at the stern, large elongated hull with pointed bow and rounded stern. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the long low hull as a horizontal tapered shape, pointed at the bow and rounded at the stern.
2. Add a continuous flat deck line running most of the length of the hull.
3. Place the tall superstructure block with bridge windows and mast at the stern end.
4. Add deck details such as the pipeline/manifold frame amidships and small bow mast to reinforce the tanker layout.

How to Draw Tanker — Free Practice Sheets

ANSWER / CASE 3

tanker: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

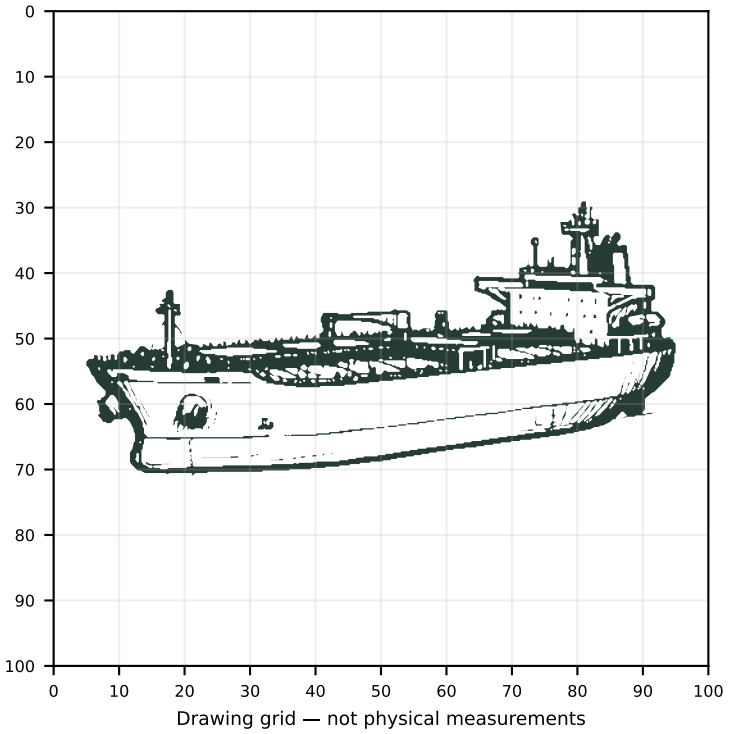

ANSWER: Example solution: preserve long flat deck with pipeline/manifold structures, raised multi-level superstructure and bridge at the stern, large elongated hull with pointed bow and rounded stern. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the long low hull as a horizontal tapered shape, pointed at the bow and rounded at the stern.
2. Add a continuous flat deck line running most of the length of the hull.
3. Place the tall superstructure block with bridge windows and mast at the stern end.
4. Add deck details such as the pipeline/manifold frame amidships and small bow mast to reinforce the tanker layout.

How to Draw Tanker — Free Practice Sheets

ANSWER / CASE 4

tanker: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve long flat deck with pipeline/manifold structures, raised multi-level superstructure and bridge at the stern, large elongated hull with pointed bow and rounded stern. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the long low hull as a horizontal tapered shape, pointed at the bow and rounded at the stern.
2. Add a continuous flat deck line running most of the length of the hull.
3. Place the tall superstructure block with bridge windows and mast at the stern end.
4. Add deck details such as the pipeline/manifold frame amidships and small bow mast to reinforce the tanker layout.
