How to Draw Canoe — Free Practice Sheets

ANSWER / CASE 1

canoe: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

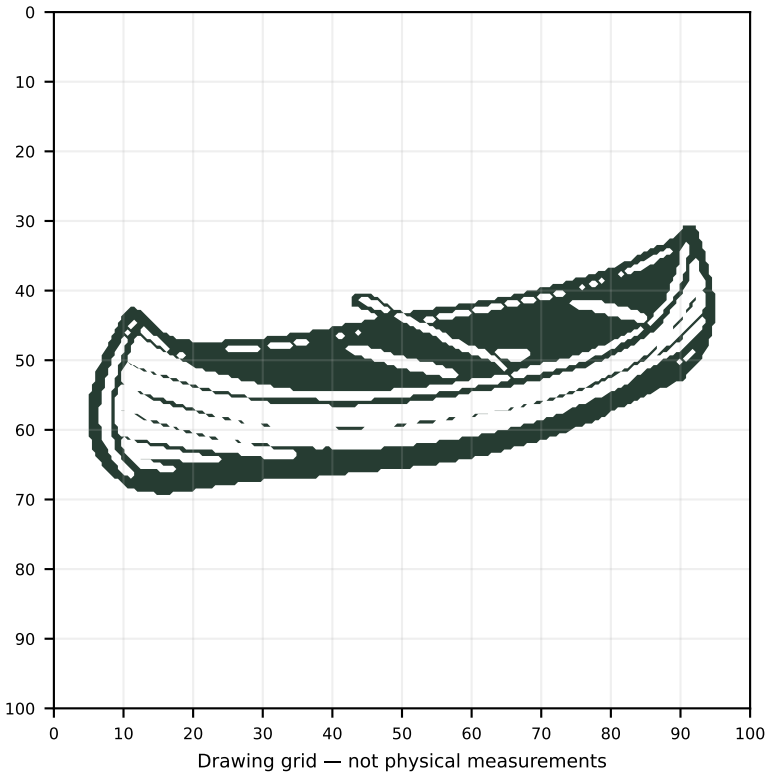

ANSWER: Example solution: preserve long curved hull with a gently arched bottom, pointed, slightly upturned ends at both bow and stern, interior cross seats/thwarts visible as horizontal bars. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long, shallow curved line for the bottom of the hull.
2. Add two pointed, slightly raised end profiles at the left and right to form the bow and stern.
3. Connect the ends with an upper rim line and add a few parallel hull lines for planking.
4. Place two or three horizontal cross seats inside the hull and add a diagonal paddle across the top.

ANSWER / CASE 2

canoe: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

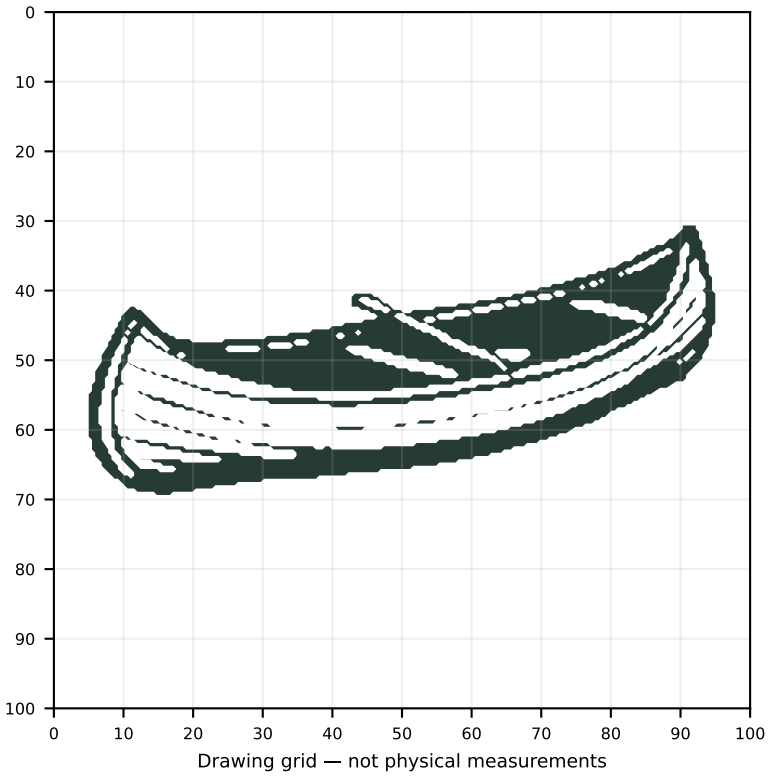

ANSWER: Example solution: preserve long curved hull with a gently arched bottom, pointed, slightly upturned ends at both bow and stern, interior cross seats/thwarts visible as horizontal bars. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long, shallow curved line for the bottom of the hull.
2. Add two pointed, slightly raised end profiles at the left and right to form the bow and stern.
3. Connect the ends with an upper rim line and add a few parallel hull lines for planking.
4. Place two or three horizontal cross seats inside the hull and add a diagonal paddle across the top.

ANSWER / CASE 3

canoe: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

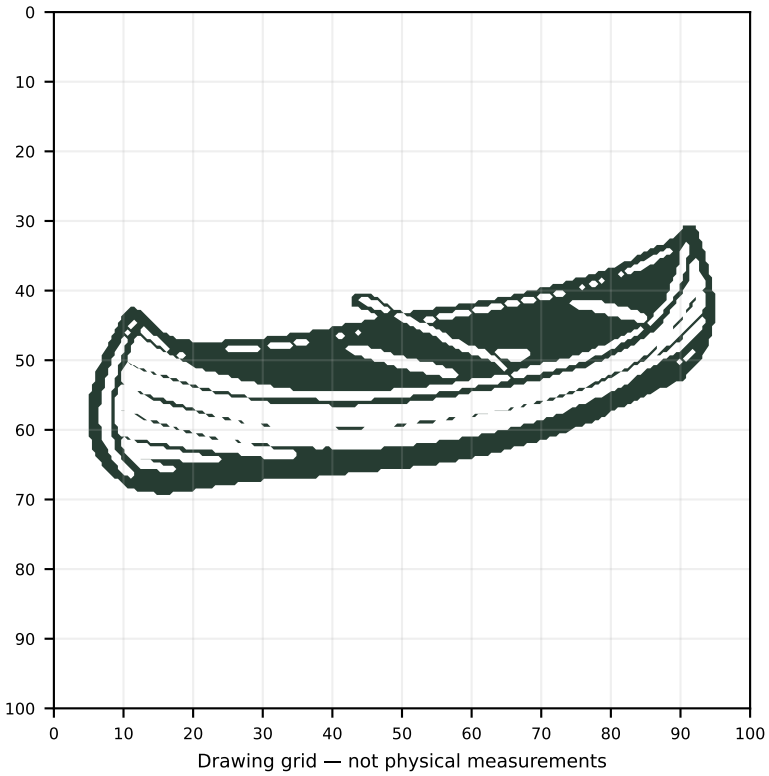

ANSWER: Example solution: preserve long curved hull with a gently arched bottom, pointed, slightly upturned ends at both bow and stern, interior cross seats/thwarts visible as horizontal bars. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long, shallow curved line for the bottom of the hull.
2. Add two pointed, slightly raised end profiles at the left and right to form the bow and stern.
3. Connect the ends with an upper rim line and add a few parallel hull lines for planking.
4. Place two or three horizontal cross seats inside the hull and add a diagonal paddle across the top.
