How to Draw Airplane — Free Practice Sheets

REFERENCE / CASE 1

airplane: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

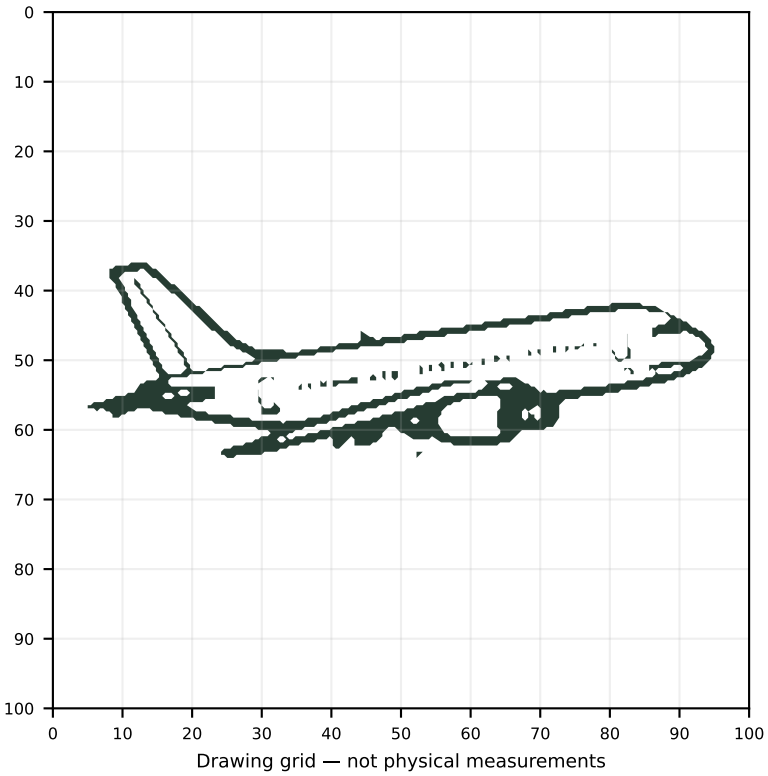

METHOD: Draw the long fuselage as a horizontal tube with a rounded nose and tapering toward the tail. Add the swept main wing extending downward/backward from the lower middle of the fuselage. Attach the vertical tail fin at the rear and the horizontal stabilizer near the tail. Draw the engine nacelle under the wing and add the row of small windows along the fuselage.
Use the separate practice sheet before checking the answer.

How to Draw Airplane — Free Practice Sheets

REFERENCE / CASE 2

airplane: Copy the reference onto the blank grid, using matching grid intersections.
Compare with the separate full reference sheet.

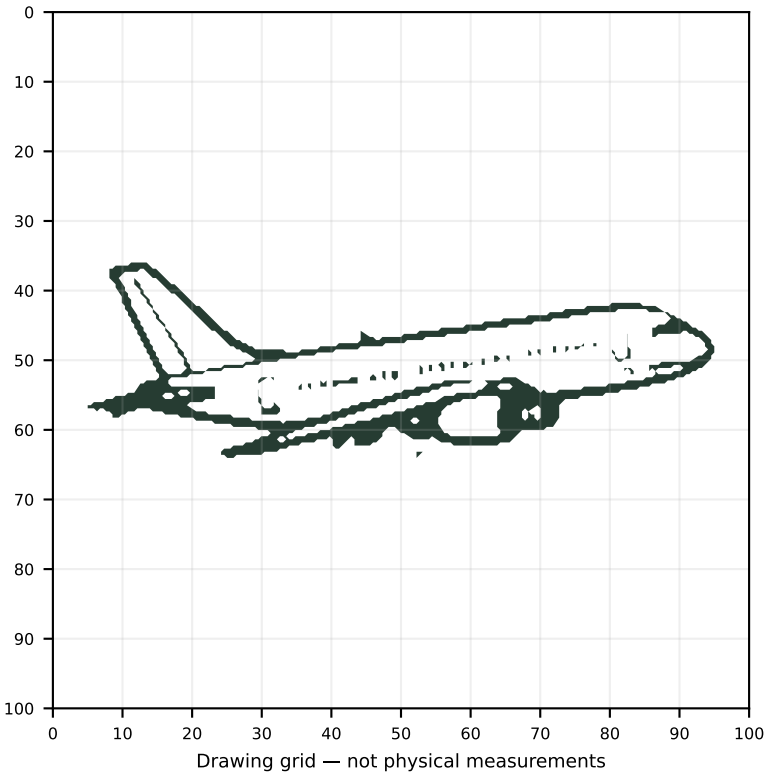

METHOD: Draw the long fuselage as a horizontal tube with a rounded nose and tapering toward the tail. Add the swept main wing extending downward/backward from the lower middle of the fuselage. Attach the vertical tail fin at the rear and the horizontal stabilizer near the tail. Draw the engine nacelle under the wing and add the row of small windows along the fuselage.
Use the separate practice sheet before checking the answer.

How to Draw Airplane — Free Practice Sheets

REFERENCE / CASE 3

airplane: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

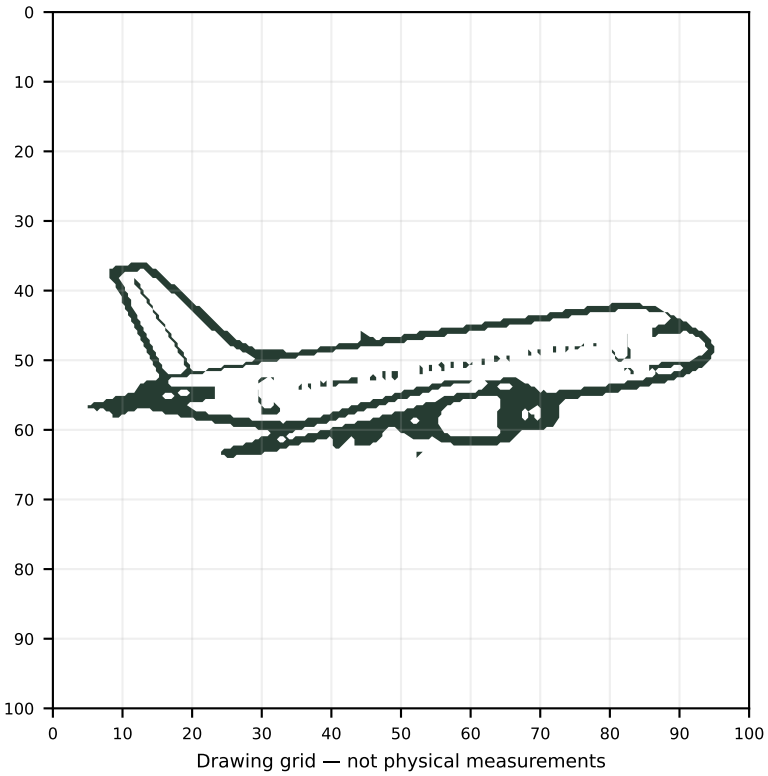

METHOD: Draw the long fuselage as a horizontal tube with a rounded nose and tapering toward the tail. Add the swept main wing extending downward/backward from the lower middle of the fuselage. Attach the vertical tail fin at the rear and the horizontal stabilizer near the tail. Draw the engine nacelle under the wing and add the row of small windows along the fuselage.
Use the separate practice sheet before checking the answer.

How to Draw Airplane — Free Practice Sheets

REFERENCE / CASE 4

airplane: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

METHOD: Draw the long fuselage as a horizontal tube with a rounded nose and tapering toward the tail. Add the swept main wing extending downward/backward from the lower middle of the fuselage. Attach the vertical tail fin at the rear and the horizontal stabilizer near the tail. Draw the engine nacelle under the wing and add the row of small windows along the fuselage.
Use the separate practice sheet before checking the answer.
