How to Draw Bumper Car — Free Practice Sheets

ANSWER / CASE 1

bumper car: Trace the reference outline, then practise the contour independently.
Compare with the separate full reference sheet.

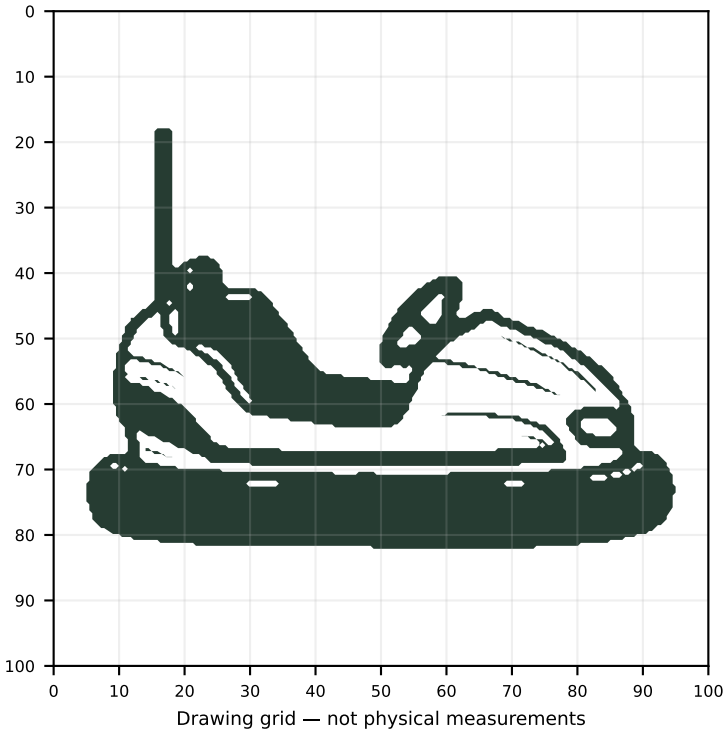

ANSWER: Example solution: preserve thick rounded black rubber bumper ring around the base, open cockpit with a single seat and steering wheel, tall vertical pole at the rear, likely a contact pole. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a wide, rounded horizontal oval for the rubber bumper base.
2. Add the car body above the base with a curved front hood and a raised rear section.
3. Cut out an open cockpit in the middle and place a single seat inside.
4. Add a steering wheel in front of the seat and a vertical pole at the rear.
