How to Draw Four-Wheeler — Free Practice Sheets

ANSWER / CASE 1

four-wheeler: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

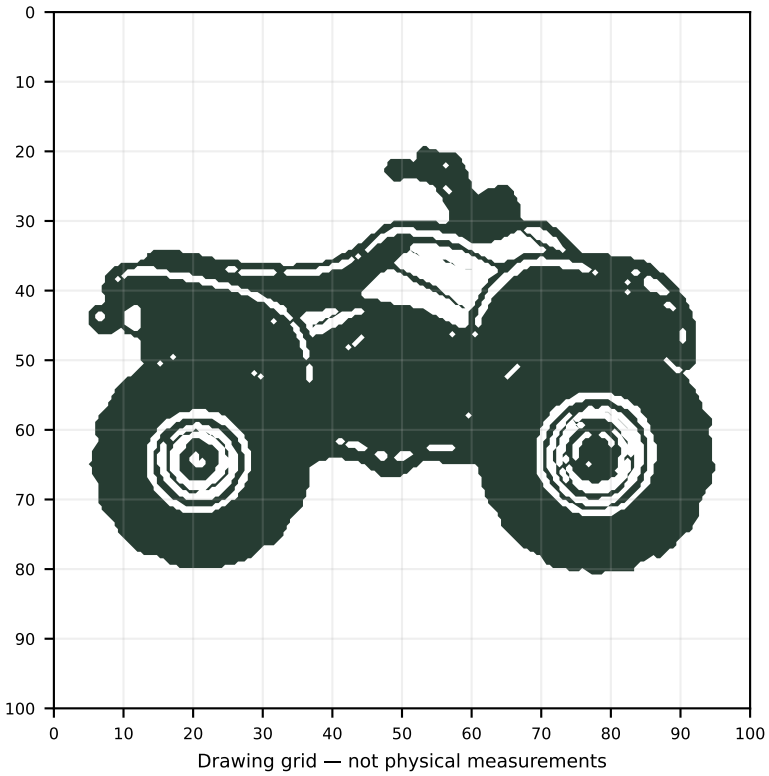

ANSWER: Example solution: preserve two large knobby tires visible in side profile, handlebars rising from the center of the body, compact rounded body/frame with seat area. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw two large circular wheels with thick knobby outer edges and concentric inner rims.
2. Connect the wheels with a low, compact body outline that arches over the rear wheel and narrows toward the front.
3. Add the seat and central body panels as layered shapes between the wheels.
4. Draw the handlebars as a small raised stem with grips above the front body area.

ANSWER / CASE 2

four-wheeler: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

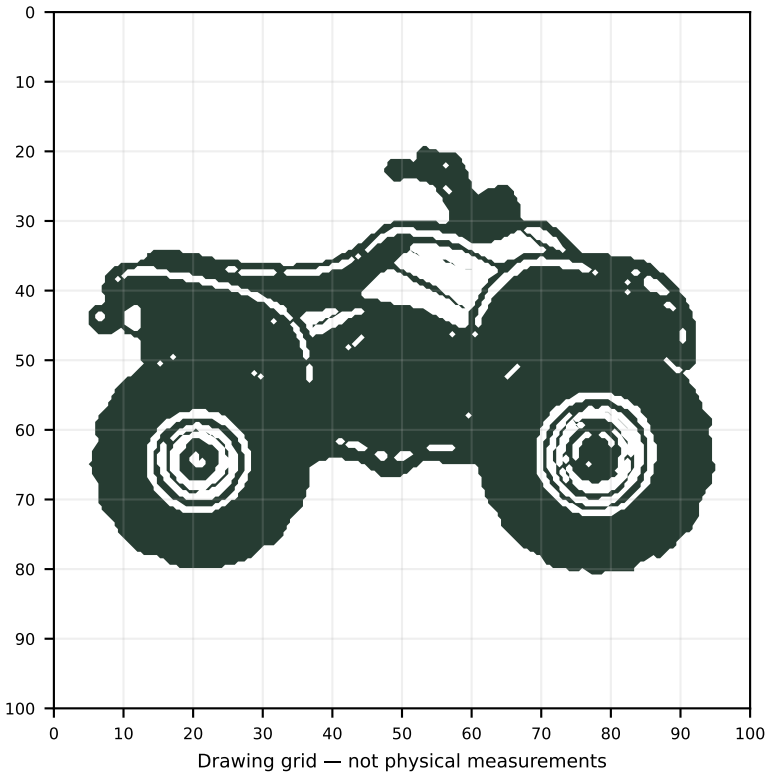

ANSWER: Example solution: preserve two large knobby tires visible in side profile, handlebars rising from the center of the body, compact rounded body/frame with seat area. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw two large circular wheels with thick knobby outer edges and concentric inner rims.
2. Connect the wheels with a low, compact body outline that arches over the rear wheel and narrows toward the front.
3. Add the seat and central body panels as layered shapes between the wheels.
4. Draw the handlebars as a small raised stem with grips above the front body area.

ANSWER / CASE 3

four-wheeler: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

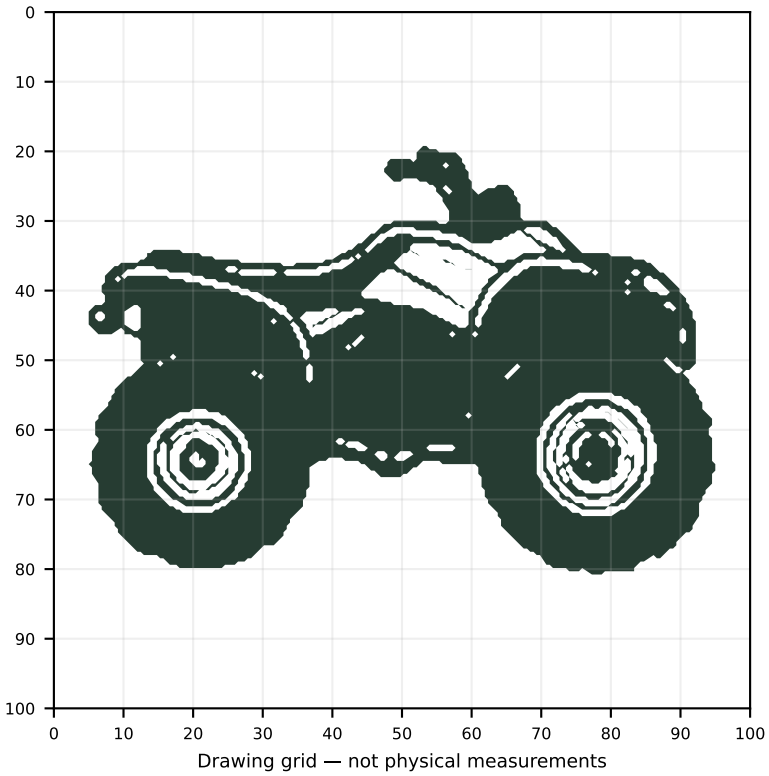

ANSWER: Example solution: preserve two large knobby tires visible in side profile, handlebars rising from the center of the body, compact rounded body/frame with seat area. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw two large circular wheels with thick knobby outer edges and concentric inner rims.
2. Connect the wheels with a low, compact body outline that arches over the rear wheel and narrows toward the front.
3. Add the seat and central body panels as layered shapes between the wheels.
4. Draw the handlebars as a small raised stem with grips above the front body area.

How to Draw Four-Wheeler — Free Practice Sheets

ANSWER / CASE 4

four-wheeler: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve two large knobby tires visible in side profile, handlebars rising from the center of the body, compact rounded body/frame with seat area. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw two large circular wheels with thick knobby outer edges and concentric inner rims.
2. Connect the wheels with a low, compact body outline that arches over the rear wheel and narrows toward the front.
3. Add the seat and central body panels as layered shapes between the wheels.
4. Draw the handlebars as a small raised stem with grips above the front body area.
