How to Draw Bicycle — Free Practice Sheets

ANSWER / CASE 1

bicycle: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

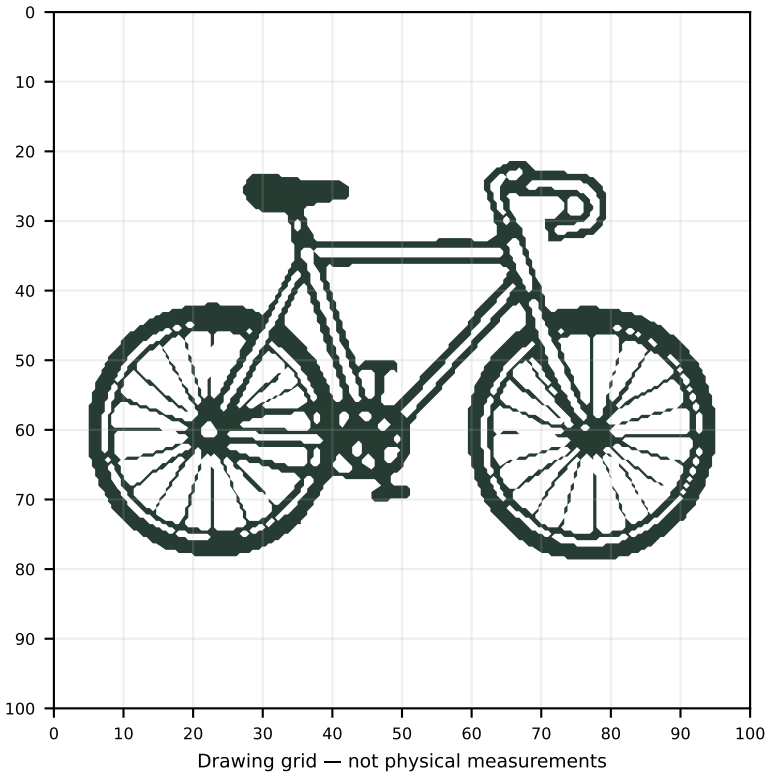

ANSWER: Example solution: preserve two equal-sized spoked wheels, triangular/diamond frame with top tube, down tube, and seat tube, handlebars with curved drops and a saddle on the seat post. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw two equal circles for the front and rear wheels, then add radial spokes and a central hub to each.
2. Connect the wheel hubs with a chainstay and seatstay to form the rear triangle, and draw the seat tube rising to the saddle.
3. Add the top tube from the seat tube to the head tube, and the down tube from the bottom bracket to the head tube.
4. Draw the fork from the head tube to the front hub, then add curved handlebars, a saddle, and the pedal/crank at the bottom bracket.

How to Draw Bicycle — Free Practice Sheets

ANSWER / CASE 2

bicycle: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

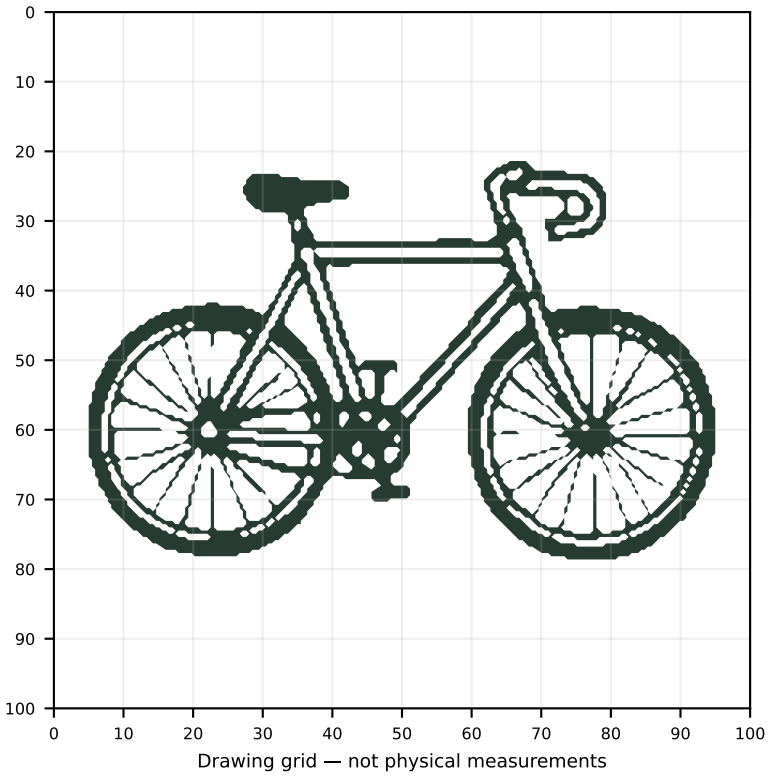

ANSWER: Example solution: preserve two equal-sized spoked wheels, triangular/diamond frame with top tube, down tube, and seat tube, handlebars with curved drops and a saddle on the seat post. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw two equal circles for the front and rear wheels, then add radial spokes and a central hub to each.
2. Connect the wheel hubs with a chainstay and seatstay to form the rear triangle, and draw the seat tube rising to the saddle.
3. Add the top tube from the seat tube to the head tube, and the down tube from the bottom bracket to the head tube.
4. Draw the fork from the head tube to the front hub, then add curved handlebars, a saddle, and the pedal/crank at the bottom bracket.

How to Draw Bicycle — Free Practice Sheets

ANSWER / CASE 3

bicycle: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

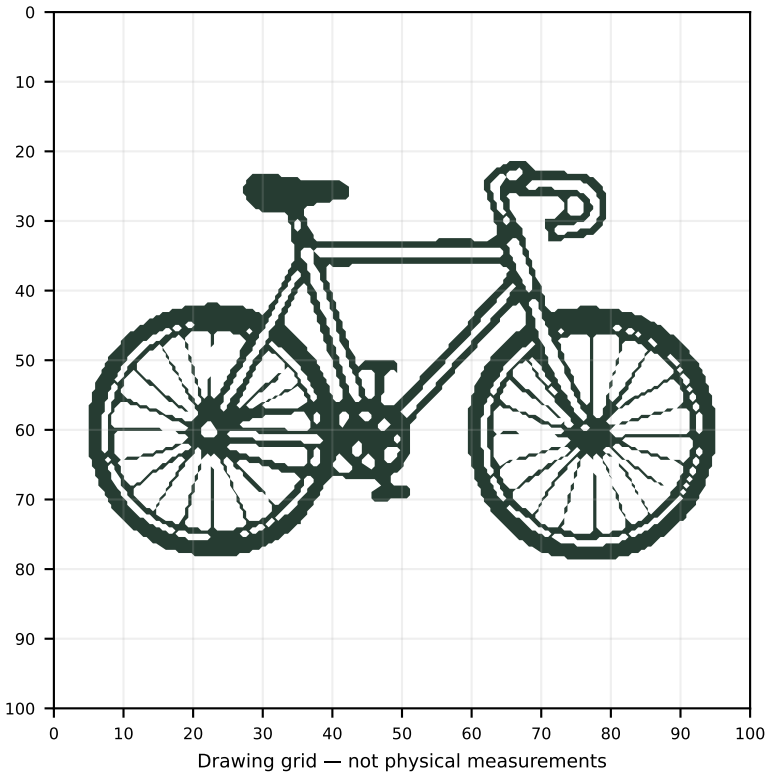

ANSWER: Example solution: preserve two equal-sized spoked wheels, triangular/diamond frame with top tube, down tube, and seat tube, handlebars with curved drops and a saddle on the seat post. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw two equal circles for the front and rear wheels, then add radial spokes and a central hub to each.
2. Connect the wheel hubs with a chainstay and seatstay to form the rear triangle, and draw the seat tube rising to the saddle.
3. Add the top tube from the seat tube to the head tube, and the down tube from the bottom bracket to the head tube.
4. Draw the fork from the head tube to the front hub, then add curved handlebars, a saddle, and the pedal/crank at the bottom bracket.

How to Draw Bicycle — Free Practice Sheets

ANSWER / CASE 4

bicycle: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve two equal-sized spoked wheels, triangular/diamond frame with top tube, down tube, and seat tube, handlebars with curved drops and a saddle on the seat post. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw two equal circles for the front and rear wheels, then add radial spokes and a central hub to each.
2. Connect the wheel hubs with a chainstay and seatstay to form the rear triangle, and draw the seat tube rising to the saddle.
3. Add the top tube from the seat tube to the head tube, and the down tube from the bottom bracket to the head tube.
4. Draw the fork from the head tube to the front hub, then add curved handlebars, a saddle, and the pedal/crank at the bottom bracket.
