How to Draw Fire Truck — Free Practice Sheets

ANSWER / CASE 1

fire truck: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

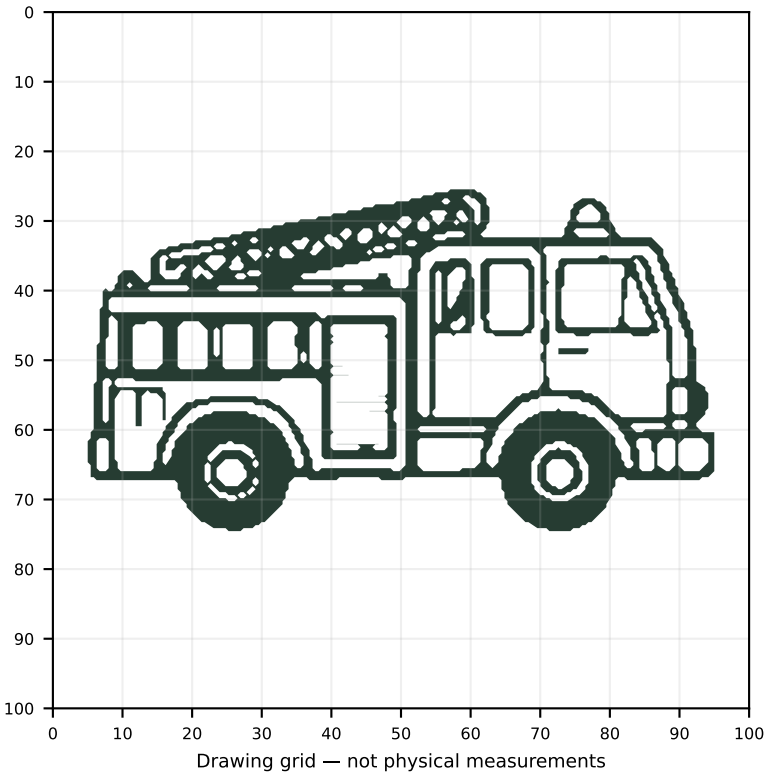

ANSWER: Example solution: preserve long boxy body with rear equipment section, ladder mounted diagonally on top, large wheels and front cab with windows. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the long rectangular body and the taller front cab as two connected boxy shapes.
2. Add the two large circular wheels with inner hub circles beneath the body.
3. Place the diagonal ladder on top of the rear body, using a long rectangle with cross-bracing lines.
4. Add cab windows, a roof light, and a front bumper to complete the fire truck silhouette.

ANSWER / CASE 2

fire truck: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

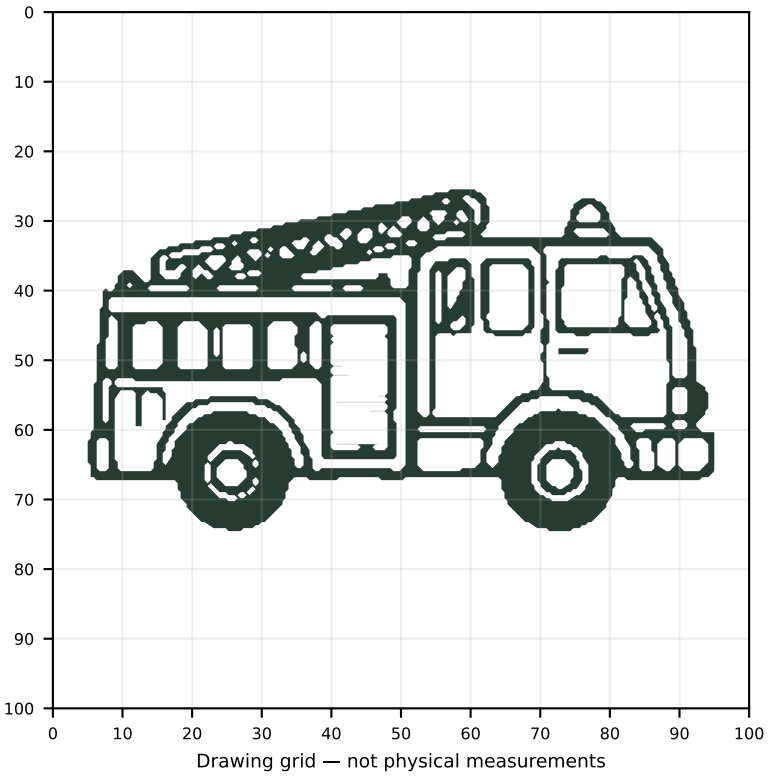

ANSWER: Example solution: preserve long boxy body with rear equipment section, ladder mounted diagonally on top, large wheels and front cab with windows. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the long rectangular body and the taller front cab as two connected boxy shapes.
2. Add the two large circular wheels with inner hub circles beneath the body.
3. Place the diagonal ladder on top of the rear body, using a long rectangle with cross-bracing lines.
4. Add cab windows, a roof light, and a front bumper to complete the fire truck silhouette.

How to Draw Fire Truck — Free Practice Sheets

ANSWER / CASE 3

fire truck: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

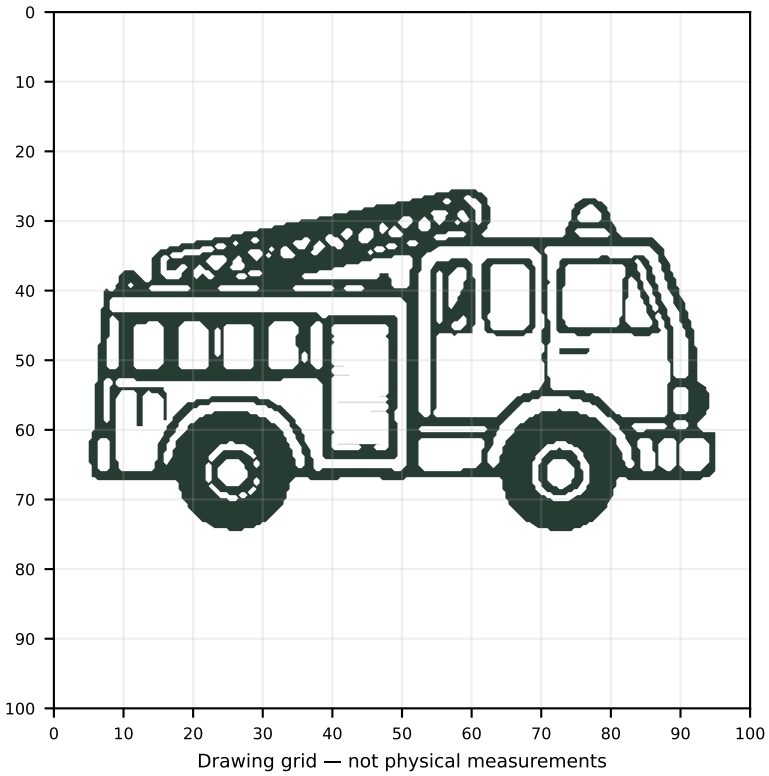

ANSWER: Example solution: preserve long boxy body with rear equipment section, ladder mounted diagonally on top, large wheels and front cab with windows. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the long rectangular body and the taller front cab as two connected boxy shapes.
2. Add the two large circular wheels with inner hub circles beneath the body.
3. Place the diagonal ladder on top of the rear body, using a long rectangle with cross-bracing lines.
4. Add cab windows, a roof light, and a front bumper to complete the fire truck silhouette.

How to Draw Fire Truck — Free Practice Sheets

ANSWER / CASE 4

fire truck: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve long boxy body with rear equipment section, ladder mounted diagonally on top, large wheels and front cab with windows. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the long rectangular body and the taller front cab as two connected boxy shapes.
2. Add the two large circular wheels with inner hub circles beneath the body.
3. Place the diagonal ladder on top of the rear body, using a long rectangle with cross-bracing lines.
4. Add cab windows, a roof light, and a front bumper to complete the fire truck silhouette.
