How to Draw Roller Coaster — Free Practice Sheets

ANSWER / CASE 1

roller coaster: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

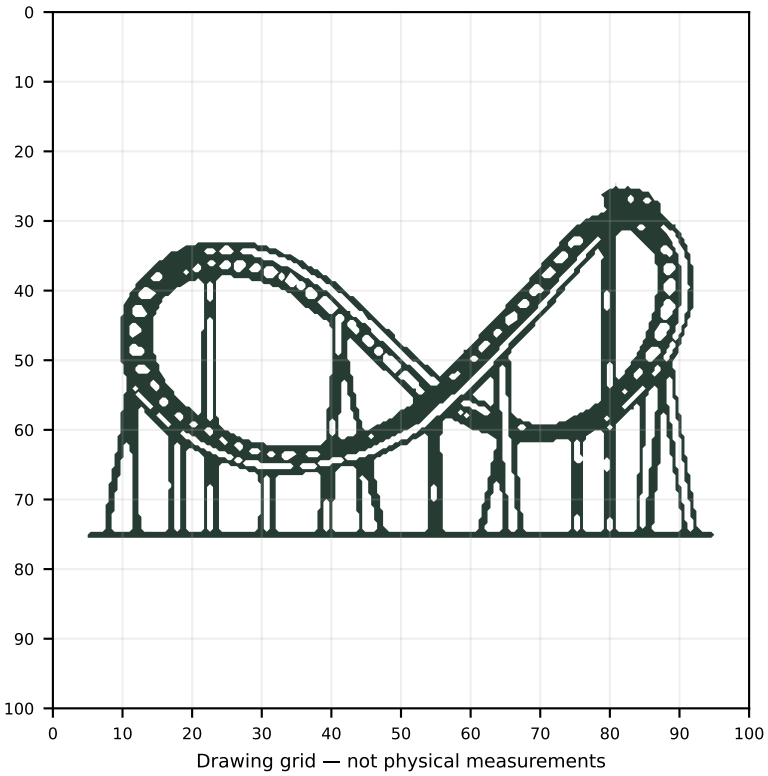

ANSWER: Example solution: preserve curving track forming a loop and a hill, vertical supporting pillars beneath the track, small car at the top of the right-hand hill. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long horizontal ground line.
2. Sketch the track as a continuous curving path: a left loop that dips and rises into a right hill.
3. Add vertical support pillars from the track down to the ground line.
4. Place a small car shape at the crest of the right hill and add cross-tie marks along the track.

How to Draw Roller Coaster — Free Practice Sheets

ANSWER / CASE 2

roller coaster: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

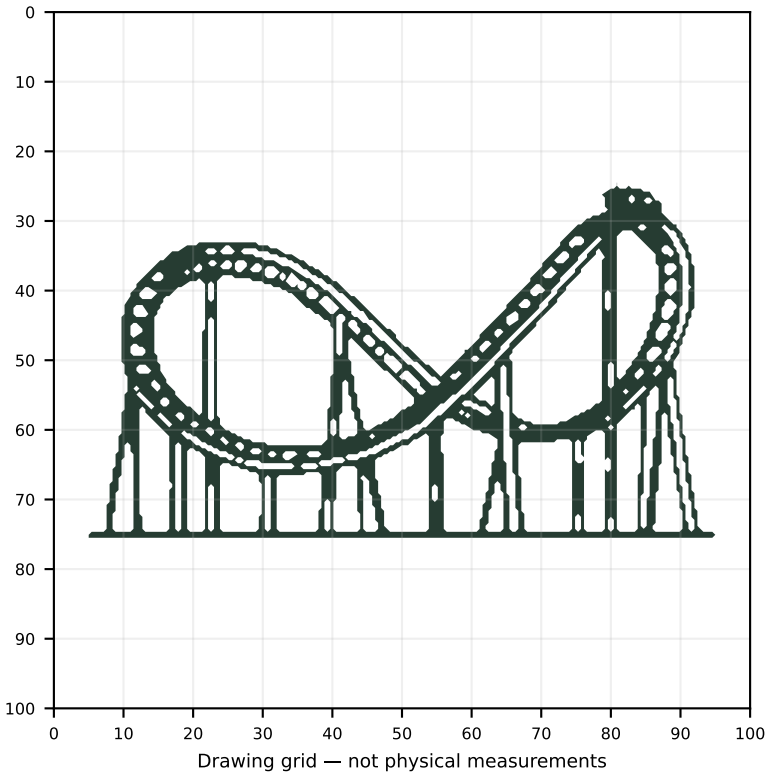

ANSWER: Example solution: preserve curving track forming a loop and a hill, vertical supporting pillars beneath the track, small car at the top of the right-hand hill. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long horizontal ground line.
2. Sketch the track as a continuous curving path: a left loop that dips and rises into a right hill.
3. Add vertical support pillars from the track down to the ground line.
4. Place a small car shape at the crest of the right hill and add cross-tie marks along the track.

ANSWER / CASE 3

roller coaster: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

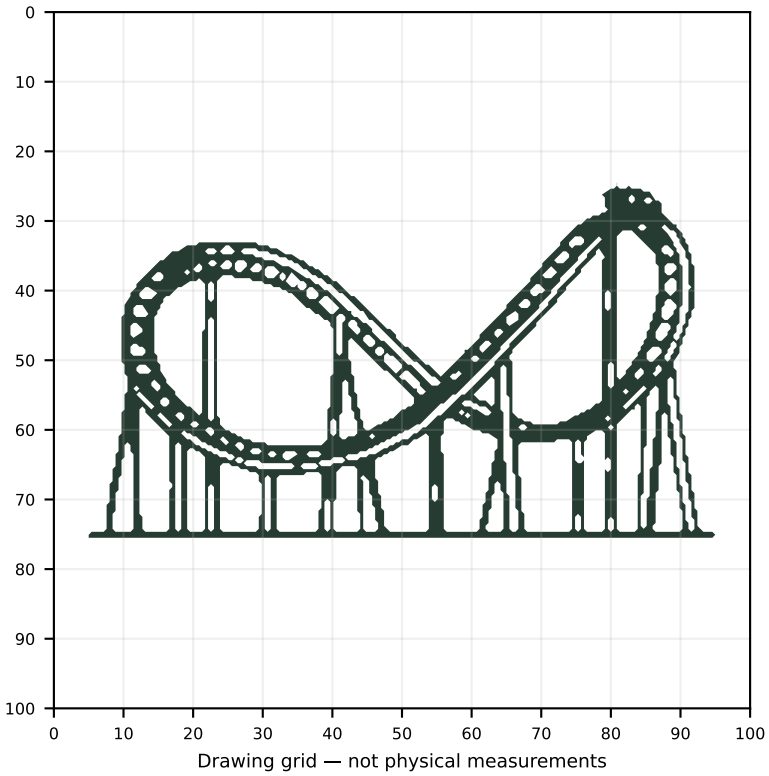

ANSWER: Example solution: preserve curving track forming a loop and a hill, vertical supporting pillars beneath the track, small car at the top of the right-hand hill. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long horizontal ground line.
2. Sketch the track as a continuous curving path: a left loop that dips and rises into a right hill.
3. Add vertical support pillars from the track down to the ground line.
4. Place a small car shape at the crest of the right hill and add cross-tie marks along the track.

How to Draw Roller Coaster — Free Practice Sheets

ANSWER / CASE 4

roller coaster: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve curving track forming a loop and a hill, vertical supporting pillars beneath the track, small car at the top of the right-hand hill. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long horizontal ground line.
2. Sketch the track as a continuous curving path: a left loop that dips and rises into a right hill.
3. Add vertical support pillars from the track down to the ground line.
4. Place a small car shape at the crest of the right hill and add cross-tie marks along the track.
