How to Draw Torpedo — Free Practice Sheets

REFERENCE / CASE 1

torpedo: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

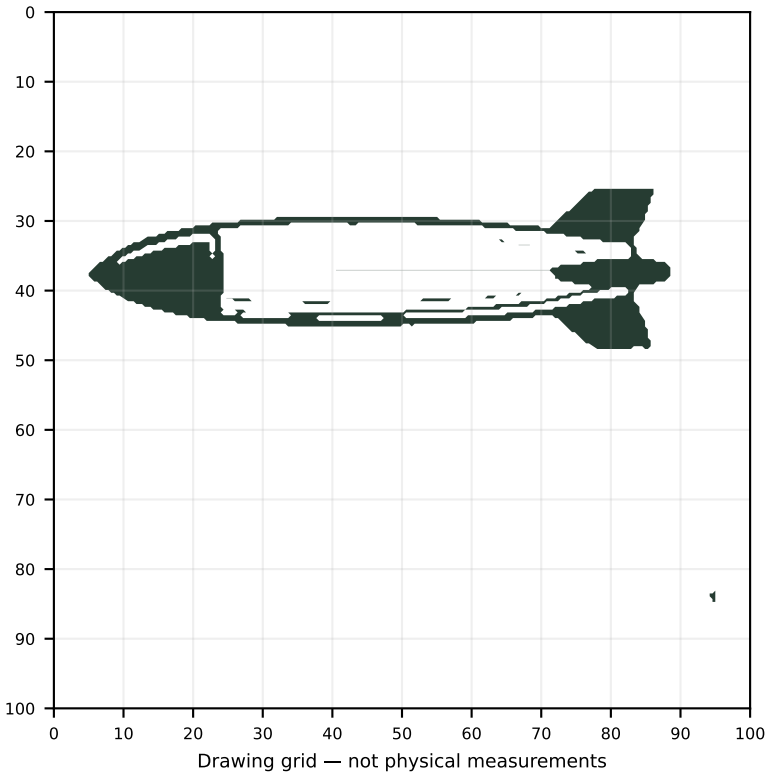

METHOD: Draw a long horizontal oval/cylinder for the main body, tapering to a point at the left end. Add a curved line near the left tip to separate the dark nose cone from the body. Draw the tail assembly on the right: a vertical fin above and below the body plus a small horizontal fin/propeller hub. Outline the body with clean contour lines and add a few horizontal guide lines along the side for shape definition.
Use the separate practice sheet before checking the answer.

How to Draw Torpedo — Free Practice Sheets

REFERENCE / CASE 2

torpedo: Copy the reference onto the blank grid, using matching grid intersections.
Compare with the separate full reference sheet.

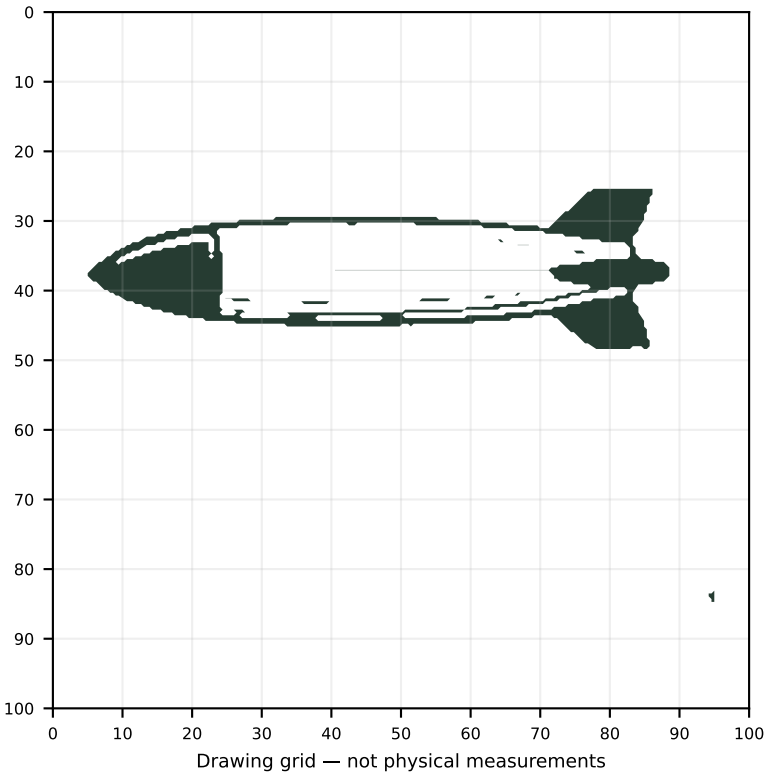

METHOD: Draw a long horizontal oval/cylinder for the main body, tapering to a point at the left end. Add a curved line near the left tip to separate the dark nose cone from the body. Draw the tail assembly on the right: a vertical fin above and below the body plus a small horizontal fin/propeller hub. Outline the body with clean contour lines and add a few horizontal guide lines along the side for shape definition.
Use the separate practice sheet before checking the answer.

How to Draw Torpedo — Free Practice Sheets

REFERENCE / CASE 3

torpedo: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

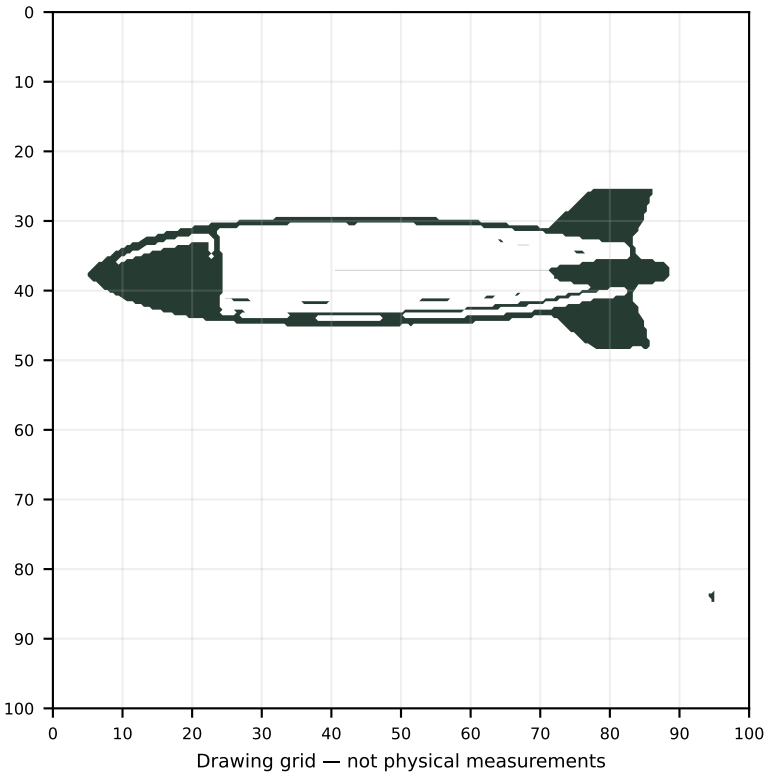

METHOD: Draw a long horizontal oval/cylinder for the main body, tapering to a point at the left end. Add a curved line near the left tip to separate the dark nose cone from the body. Draw the tail assembly on the right: a vertical fin above and below the body plus a small horizontal fin/propeller hub. Outline the body with clean contour lines and add a few horizontal guide lines along the side for shape definition.
Use the separate practice sheet before checking the answer.

How to Draw Torpedo — Free Practice Sheets

REFERENCE / CASE 4

torpedo: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

METHOD: Draw a long horizontal oval/cylinder for the main body, tapering to a point at the left end. Add a curved line near the left tip to separate the dark nose cone from the body. Draw the tail assembly on the right: a vertical fin above and below the body plus a small horizontal fin/propeller hub. Outline the body with clean contour lines and add a few horizontal guide lines along the side for shape definition.
Use the separate practice sheet before checking the answer.
