How to Draw Cargo Ship — Free Practice Sheets

ANSWER / CASE 1

cargo ship: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

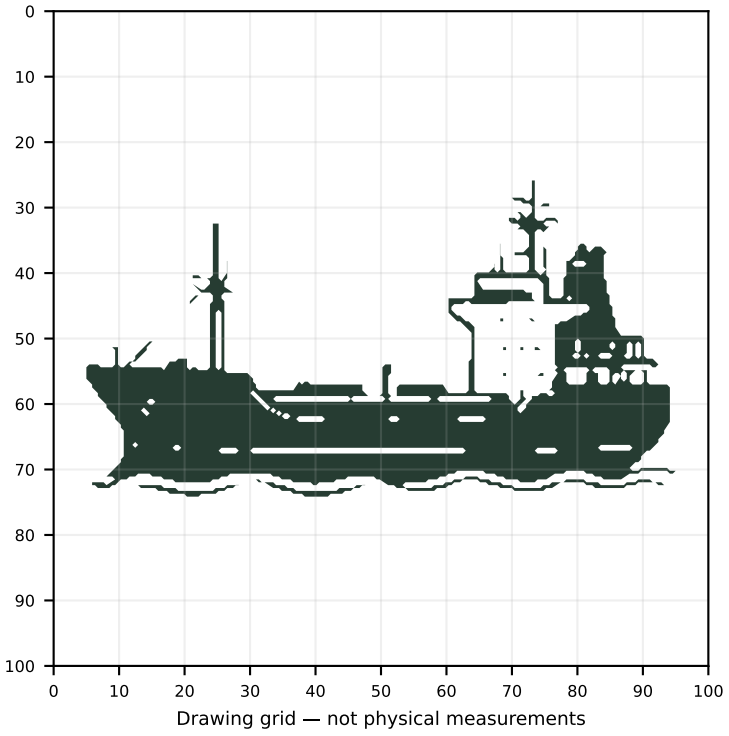

ANSWER: Example solution: preserve long low hull with pointed bow and rounded stern, stacked rectangular container blocks along the deck, multi-level bridge tower with mast and funnel near the stern. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long horizontal hull outline with a pointed bow on the left and a rounded stern on the right.
2. Add a wavy water line under the hull and a small circular porthole near the bow.
3. Place a row of low rectangular container blocks along the deck between bow and stern.
4. Build the bridge tower near the stern as stacked rectangles, then add the mast, antenna, and funnel above it.

ANSWER / CASE 2

cargo ship: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

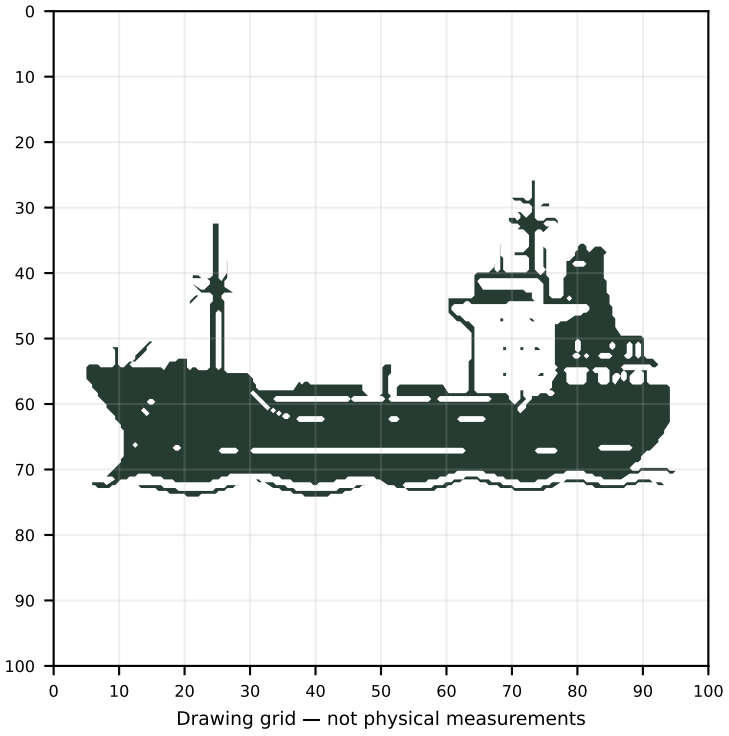

ANSWER: Example solution: preserve long low hull with pointed bow and rounded stern, stacked rectangular container blocks along the deck, multi-level bridge tower with mast and funnel near the stern. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long horizontal hull outline with a pointed bow on the left and a rounded stern on the right.
2. Add a wavy water line under the hull and a small circular porthole near the bow.
3. Place a row of low rectangular container blocks along the deck between bow and stern.
4. Build the bridge tower near the stern as stacked rectangles, then add the mast, antenna, and funnel above it.

ANSWER / CASE 3

cargo ship: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

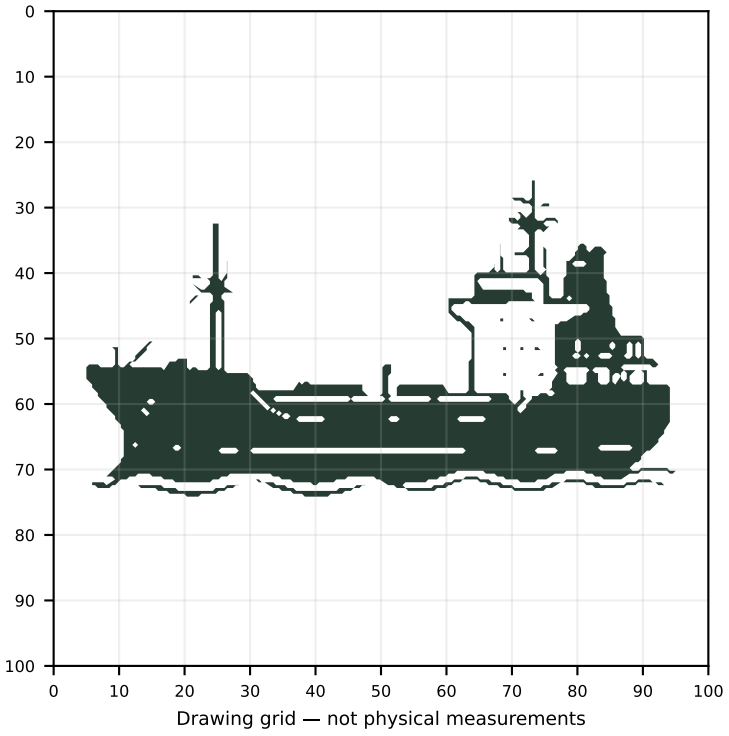

ANSWER: Example solution: preserve long low hull with pointed bow and rounded stern, stacked rectangular container blocks along the deck, multi-level bridge tower with mast and funnel near the stern. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long horizontal hull outline with a pointed bow on the left and a rounded stern on the right.
2. Add a wavy water line under the hull and a small circular porthole near the bow.
3. Place a row of low rectangular container blocks along the deck between bow and stern.
4. Build the bridge tower near the stern as stacked rectangles, then add the mast, antenna, and funnel above it.

How to Draw Cargo Ship — Free Practice Sheets

ANSWER / CASE 4

cargo ship: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve long low hull with pointed bow and rounded stern, stacked rectangular container blocks along the deck, multi-level bridge tower with mast and funnel near the stern. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw a long horizontal hull outline with a pointed bow on the left and a rounded stern on the right.
2. Add a wavy water line under the hull and a small circular porthole near the bow.
3. Place a row of low rectangular container blocks along the deck between bow and stern.
4. Build the bridge tower near the stern as stacked rectangles, then add the mast, antenna, and funnel above it.
