How to Draw Harvester — Free Practice Sheets

ANSWER / CASE 1

harvester: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

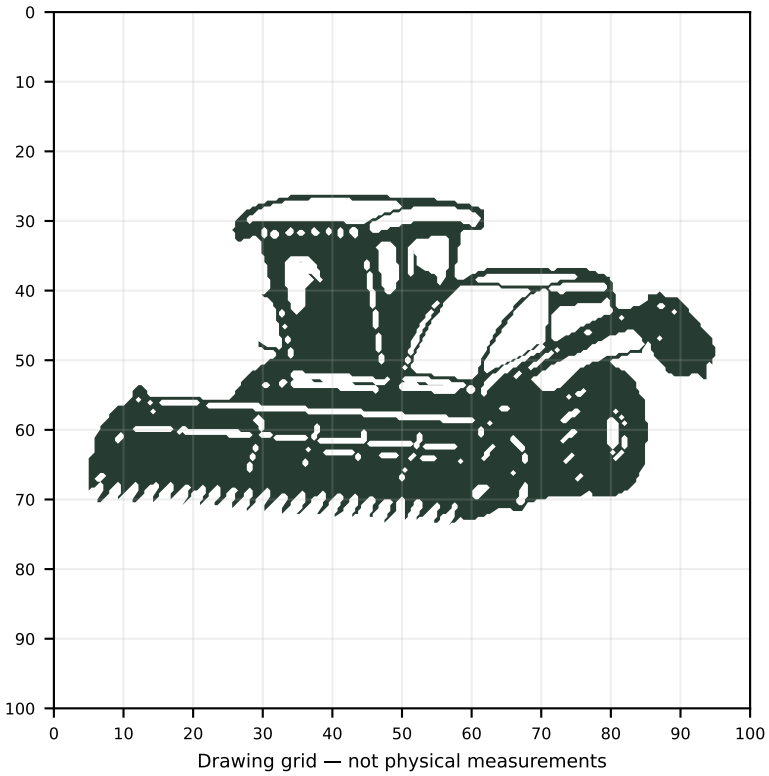

ANSWER: Example solution: preserve large front cutting head with many teeth, enclosed cab with roof and windows, big rear wheel visible on the right side. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the long horizontal cutting head across the front, adding a row of downward teeth along its lower edge.
2. Build the cab above and slightly behind the cutting head, using a boxy shape with a flat roof and window openings.
3. Attach the rounded body/engine housing behind the cab and connect it to the cutting head with a supporting frame.
4. Add the large rear wheel on the right side and the curved discharge chute extending backward from the top rear.

How to Draw Harvester — Free Practice Sheets

ANSWER / CASE 2

harvester: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

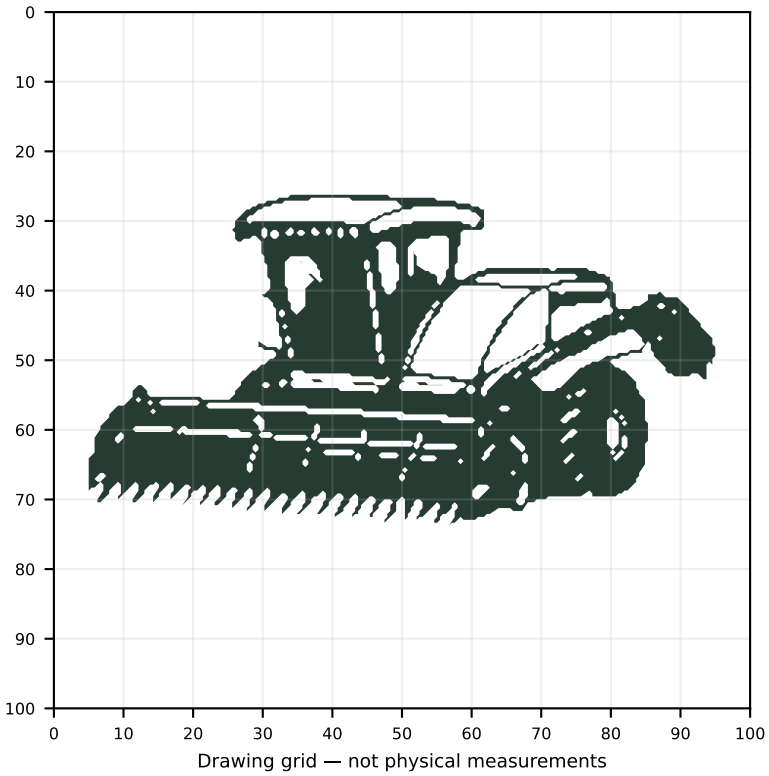

ANSWER: Example solution: preserve large front cutting head with many teeth, enclosed cab with roof and windows, big rear wheel visible on the right side. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the long horizontal cutting head across the front, adding a row of downward teeth along its lower edge.
2. Build the cab above and slightly behind the cutting head, using a boxy shape with a flat roof and window openings.
3. Attach the rounded body/engine housing behind the cab and connect it to the cutting head with a supporting frame.
4. Add the large rear wheel on the right side and the curved discharge chute extending backward from the top rear.

ANSWER / CASE 3

harvester: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

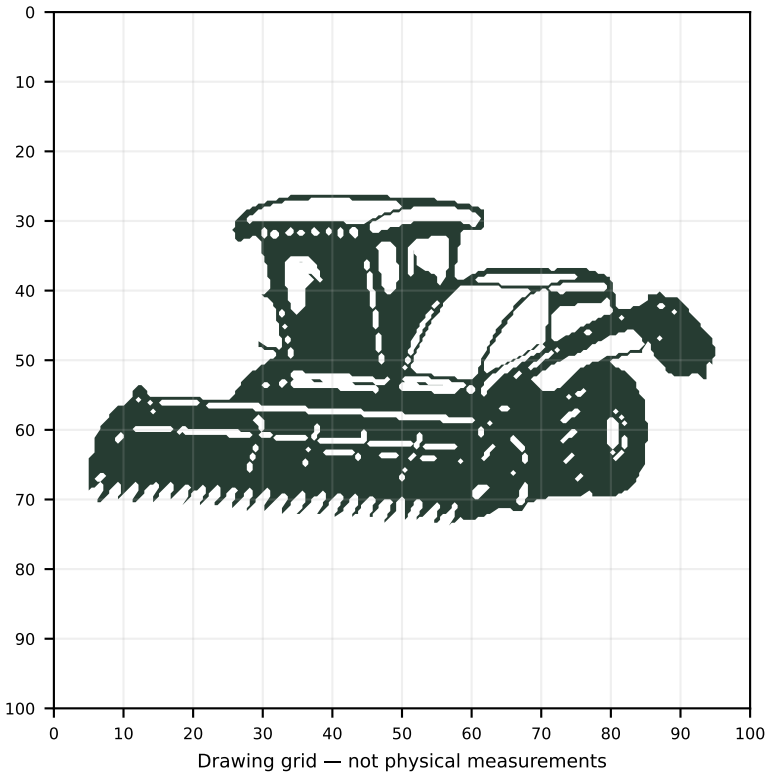

ANSWER: Example solution: preserve large front cutting head with many teeth, enclosed cab with roof and windows, big rear wheel visible on the right side. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the long horizontal cutting head across the front, adding a row of downward teeth along its lower edge.
2. Build the cab above and slightly behind the cutting head, using a boxy shape with a flat roof and window openings.
3. Attach the rounded body/engine housing behind the cab and connect it to the cutting head with a supporting frame.
4. Add the large rear wheel on the right side and the curved discharge chute extending backward from the top rear.

How to Draw Harvester — Free Practice Sheets

ANSWER / CASE 4

harvester: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

ANSWER: Example solution: preserve large front cutting head with many teeth, enclosed cab with roof and windows, big rear wheel visible on the right side. Other drawings can be correct; assess the visible features and proportions rather than pixel-perfect matching.
1. Draw the long horizontal cutting head across the front, adding a row of downward teeth along its lower edge.
2. Build the cab above and slightly behind the cutting head, using a boxy shape with a flat roof and window openings.
3. Attach the rounded body/engine housing behind the cab and connect it to the cutting head with a supporting frame.
4. Add the large rear wheel on the right side and the curved discharge chute extending backward from the top rear.
