How to Draw Harvester — Free Practice Sheets

REFERENCE / CASE 1

harvester: Trace the reference outline, then practise the contour independently. Compare with the separate full reference sheet.

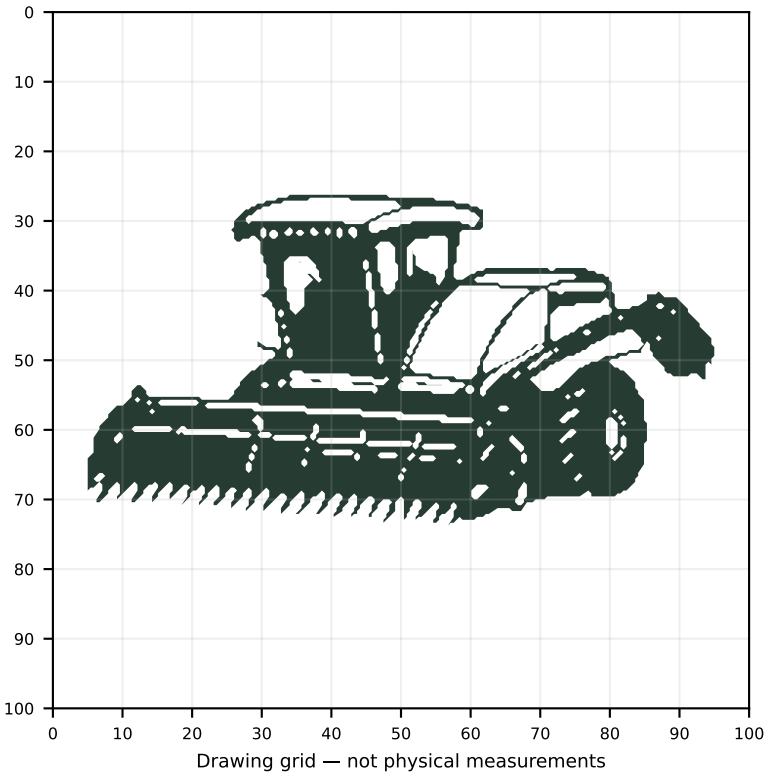

METHOD: Draw the long horizontal cutting head across the front, adding a row of downward teeth along its lower edge. Build the cab above and slightly behind the cutting head, using a boxy shape with a flat roof and window openings. Attach the rounded body/engine housing behind the cab and connect it to the cutting head with a supporting frame. Add the large rear wheel on the right side and the curved discharge chute extending backward from the top rear.
Use the separate practice sheet before checking the answer.

REFERENCE / CASE 2

harvester: Copy the reference onto the blank grid, using matching grid intersections. Compare with the separate full reference sheet.

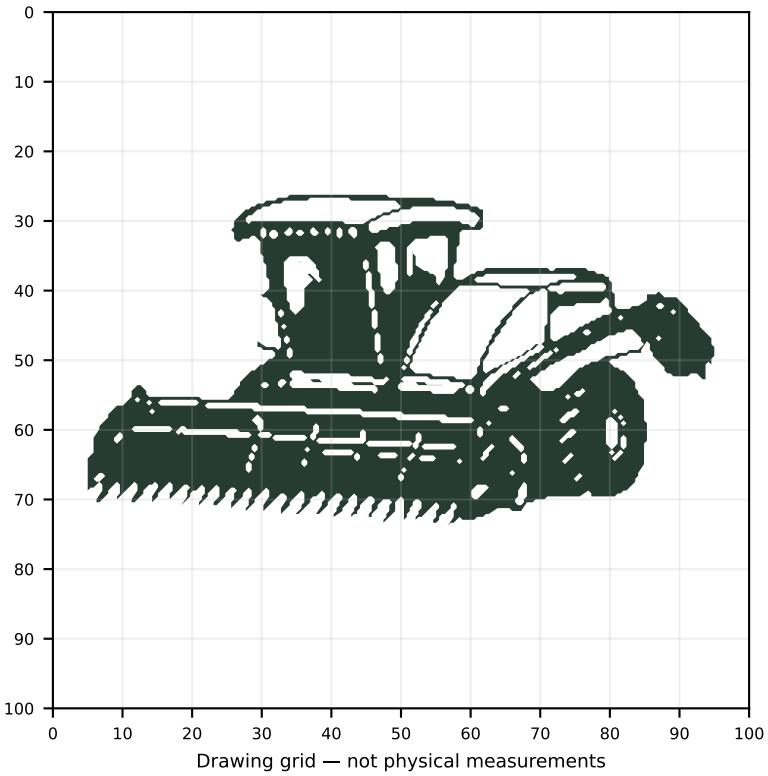

METHOD: Draw the long horizontal cutting head across the front, adding a row of downward teeth along its lower edge. Build the cab above and slightly behind the cutting head, using a boxy shape with a flat roof and window openings. Attach the rounded body/engine housing behind the cab and connect it to the cutting head with a supporting frame. Add the large rear wheel on the right side and the curved discharge chute extending backward from the top rear.
Use the separate practice sheet before checking the answer.

REFERENCE / CASE 3

harvester: Use the bounding frame and center guide to place the silhouette, then add the identifying details. Compare with the separate full reference sheet.

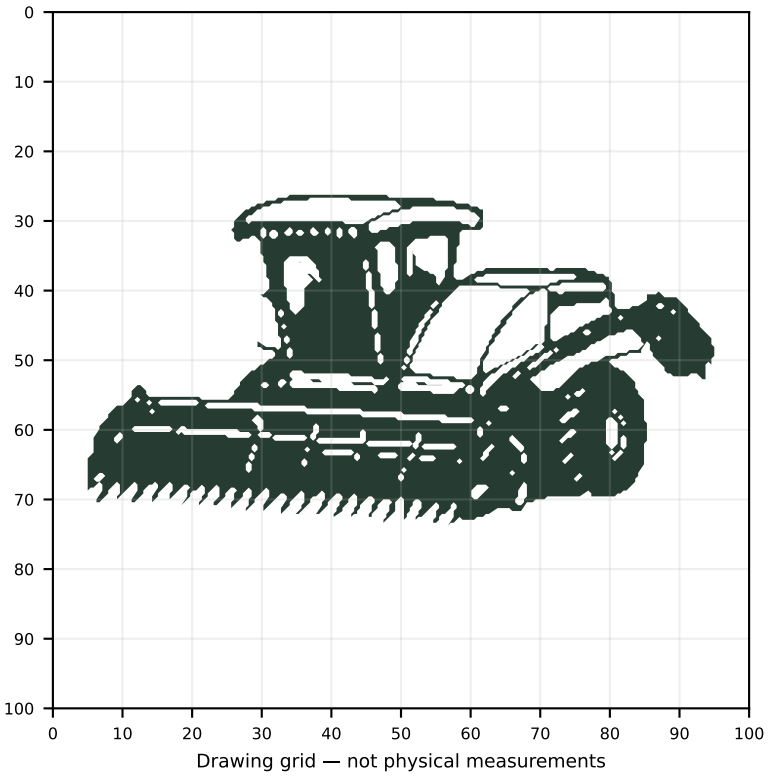

METHOD: Draw the long horizontal cutting head across the front, adding a row of downward teeth along its lower edge. Build the cab above and slightly behind the cutting head, using a boxy shape with a flat roof and window openings. Attach the rounded body/engine housing behind the cab and connect it to the cutting head with a supporting frame. Add the large rear wheel on the right side and the curved discharge chute extending backward from the top rear.
Use the separate practice sheet before checking the answer.

How to Draw Harvester — Free Practice Sheets

REFERENCE / CASE 4

harvester: Complete the blank right-hand portion using the full reference. Compare with the separate full reference sheet.

METHOD: Draw the long horizontal cutting head across the front, adding a row of downward teeth along its lower edge. Build the cab above and slightly behind the cutting head, using a boxy shape with a flat roof and window openings. Attach the rounded body/engine housing behind the cab and connect it to the cutting head with a supporting frame. Add the large rear wheel on the right side and the curved discharge chute extending backward from the top rear.
Use the separate practice sheet before checking the answer.
